

This product is made as simulator of Flash bang for training.

ES simulator has same handling as real grenade and large sound (130db)

Using low pressure gas and commercial balloon makes cost to low and safety training.

We assume no responsibility for financial losses or claims from result of using product.

PART NAME ON DRAWING

LOADING

1. Remove the bottom case by rolling clockwise.
2. Remove the nozzle collar also by rolling clockwise and set the balloon. Wear the mouth of balloon to neck of the nozzle fixedly.
3. Assemble the nozzle collar again and fixed the balloon.
4. Assemble the bottom case again.
5. Fill the gas adequately after set safety lever and safety pin.

USAGE

1. Keep hold of safety lever, pull out safety pin.
2. Release safety lever.
3. Safety lever will fling away.
4. Slide or roll grenade to target point.

Timer works 1.5 - 2 second to explosion and makes large sound.

* If the gas was filled shortly, balloon couldn't be broken and stop growing.
You have to break balloon by safety pin or something sharp.

WARNING

Do not throw at person for direct hit.
Similar to stun grenade, it's more effective to slide or roll rather than throw.

Keep grenade away from children.

Take care of the situation and environment before use.

Size	158mm height X 50mm diameter
Weight	330g
Material	Aluminum, Brass, Steel, Rubber
Operational gas & pressure	Hfc152a, 50 ~ 110 Psi
Timer Work	1,5 ~ 2second
SPARE BALLOON	1bag (20balloons) 9us\$
