Firepower M14 Spring-powered airsoft rifle Instructions Manual

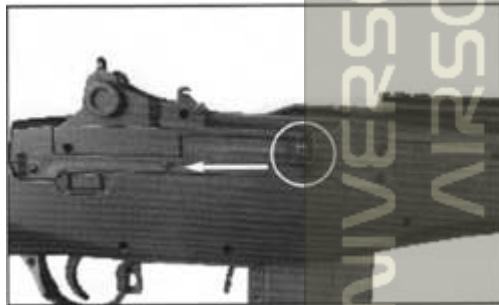

To release the magazine, push on the lock as shown on the picture and slide the magazine out of the rifle.

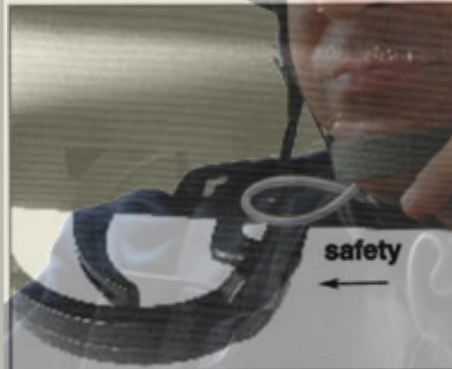

Slide the cursor (1) down to the locked position (2). Open the cover (3) on the top of the magazine and fill the recommended plastic ammo.

In order to fill the firing compartment of the magazine, turn the magazine upside down as shown in the photo (with top cover closed) and shake gently. This will allow some of the ammo to slide into the firing compartment.

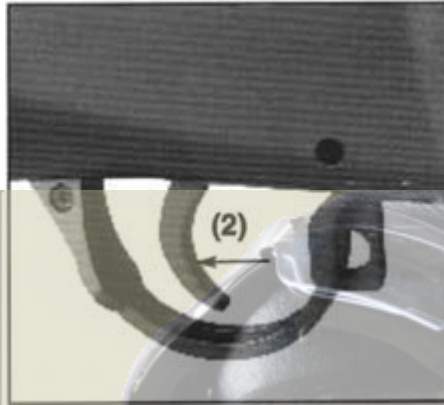

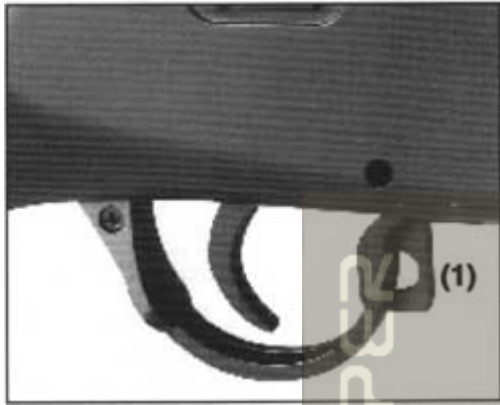

Slide back the cocking lever shown by a circle on the picture until a click is heard, then release. At this point, one ammo has been engaged in the chamber.

Once finished shooting, put the shooting selector back on the "Safe" position.

Make sure the rifle is stored empty of any ammunition, magazine removed, and SAFETY ON.

To start shooting, aim at a target, put the selector on fire position (1) and pull the trigger (2) (this rifle is a single shot action and requires loading after each shot).
