

Instruction

WWW.GUAY2.COM

Adult supervision required. Always wear safety goggles when using this product. Misuse or careless handling of this product may cause injury. May be hazardous up to 50 meters.

You may be liable for damaging public or personal property or for injuring a person or an animal even if you only meant to shoot as a "practical joke." Always observe good manners and enjoy fun sport shooting.

Never direct the muzzle towards a person, animal or in any direction. That may cause harm or damage to the third party.

Select a safe place for operating the air gun, avoid places where people and cars are around.

Make sure to put the barrel and safety cap on the muzzle, except when you are shooting. Do this to prevent accident, discharge of BBs and also for dust protection purpose. Never pull the trigger while the barrel and the safety cap is attached

Safety procedures: 1.Attach the safety cap to the muzzle.

- 2.Set the selector lever to the safety position.
- 3. Remove the magazine. 4. Remove the battery.

Looking into the muzzle is extremely dangerous regardless of BBs having been loaded or not. If you get hit in the eye by a BB pellet, you may in worst case, lose your eye sight.

Operation of this air gun for competition use is restricted to users of 18 years old or more. Careless shooting and wrong operation are dangerous, causing eye damage or other injury.

When you carry the air gun, attach the safety cap, set the selector lever to the safety position and always put the air gun in a case or

Activating the trigger carelessly is extremely dangerous. Never put your finger on the trigger unless the safety cap is removed and you are ready to shoot a target.

or target practice or in a ame situation, you and all participants must wear safety goggles or other eve protective gear. Also, pay attention to ricochets. It is very important to pay attention to third parties

There may be cases where some BBs remain in the gun after the magazine has been removed. After removal of the magazne, direct the muzzle towards a safe direction and pull the trigger to confirm that there are no BBs remain in the gun, then attach the safety cap.

Always attach the safety cap to the muzzle, remove the battery and store the air gun in a case or bag and at a place that is out of reach by children.

Disassembling or modifying the gun may adversely affect the performance and make it dangerous. "It may be against the Law."

SELECTOR & SAFETY SETTING

SAFETY ON THE TRIGGER CANN

When not firing the gun or during storage, always set the selector to the 'S' position and attach the protective cap on the muzzle.

SEMI AUTO

Selector to the '1' position. The gun will fire one shot each time when pulling the trigger.

FULL AUTO AUTOMATIC FIRING

Selector to the '3' or 'A' position. The gun will be fired automatically while the trigger remains being pulled.

A CAUTION

Never operate the Selector while pulled the trigger. Pull the trigger with the Selector being set at safe mode may damage the air gun.

A CAUTION

Set the selector in correct position; otherwise malfunction may occur.

BATTERY SETTING

Turn the selector to the Safety position. The magazine should be removed before.

Turn up the alidade and push the handquard spring forward.

05

Push the pin then take off the handguard.

SETTING MAGAZINE

Push the button to release the magazine.

Load G&G 5.95mm BB pellets into the magazine. The magazine is capable of holding approximately 450 pellets.

Always use the G&G BB pellet or diameter 5.94 ~ 5.96 mm BBs for this air gun. G&G shall not be held responsible for any damage or accidents arising from the use of pellets supplied by other manufacturers.

Confirm that the safety lever is set to the Safety position and do not place your finger on the trigger.

After the BB pellets had been loaded, close the cover and turn the gear on the bottom of the magazine until the sound changes.

Set the magazine upward.

Connect firmly till a click sound is heard.

08

SIGHT ADJUSTMENT

Turning clockwise: To correct the shots leaning to the left. Turning counterclockwise: To correct the shots leaning to the right.

Rear Sight Adjustment

Flip-Up for aiming the rifle grenades.

Alidade (GRENADE SIGHT)

MOVABLE PARTS

Pull up the lock pin to release the scope mount and take off.

Press the stock and fold to right side of the gun.

Foldable Stock

07 SIGHT ADJUSTMENT MOVABLE PARTS

Make sure to install the magazine upwards and into the body.It had been installed properly when you heard a click sound.

Remove the protective cap only when you are ready for firing the gun.

Set the Selector Lever to '1', '3' or 'A' position.

A CAUTIO

e are possible cases that no firing occurs after pulling the trigge auto mode. In such cases, do not pull the trigger furiously. Fire ots in the full auto mode and then return to the semi auto operation

Activating the trigger carelessly is extremely dangerous. Never place your finger on the trigger unless the protective cap is removed and you are ready to shoot a target. Blank firing may occur when triggered, this is the normal operation of the gun.

MAINTENANCE

Do not jam the cleaning rod into the barrel by force. Should the EB's remains inside the barrel after following the instruction above with the protection cap over the barrel, point the gun to a safe direction and discharge any loosened BB's in semi-automatic mode

1.Drop a few drops of silicone oil or Teflon oil from the pellet entrance. Insert BB pellets into the magazine and fire around 1 to 2 magazines. 2.To complete the cleaning, use the cleaning rod (with cotton), to remove excess oil.

Maintenance When Bullet Speed Becomes Low

1. Return the hop up dial to the Normal position and insert the cleaning rod from the lead edge of the barrel. 2.To remove clogged BB's, carefully insert the cleaning rod inside the barrel with the flat tip facing down as shown below.

Removing Clogged Bullets

TROUBLE SHOOTING

When a problem occasion please check the steps below, other

Symptom Potential Selector lever is set to safety. Battery is not charged. No operation at all Battery connector is disconnected.
