Instruction Manual

FIRING MODE & SAFETY

SAFETY ON
The trigger cannot be pulled

SEMI AUTO
Single shot

FULL AUTO
Automatic firing

BATTERY SETTING

CAUTION

1. Please select quality battery with the CE approval, to avoid any unnecessary damage on the product.
2. Please use either 8.4V or 9.6V battery, if different voltage used, it might damage the product.
3. Remove the battery from the product when it is not in use.
4. Do not wet nor incinerate the battery, nor to deform the terminal.

1. Charge up the battery.
2. Charging will be completed after 3 hours.

1. Push the butt plate lock (both sides)
2. Pull out the butt plate.

Take off the cover.

Pull out the wire connector.

Connect battery plug with the connector until you heard a click sound.

Insert the battery into stock.

Reinstall the battery cover and butt plate.

SETTING MAGAZINE

CAUTION

It is strongly recommended the use of G&G BB pellets only. Using low quality BB pellets will shorten product life span and void product warranty.

Open the cover of magazine.

Load G&G 5.95mm BB pellets into the magazine.

Close the cover plate then turn the gear until the sound changes.

Insert the magazine until you heard a click sound.

HOP-UP ADJUSTMENT

CAUTION

Do not catch your fingers in the dummy bolt. Never hold the gun sideways as the BB pellets will curve right or left.

Turn to **Normal** Turn to **Hop**

Too much Hop-up. (Turn the adjust lever toward **Normal**)

Best Position. ☒

Not enough Hop-up. (Turn the adjust lever toward **Hop**) or Too much Hop-up. (Turn the adjust lever toward **Normal**)

New Blow Back Pneumatic System

True to the faith of mimicking real life firearms, G&G is proud to present its new Pneumatic Blow Back system to its line of airsoft guns. Conventional airsoft blow back utilizes tow hook springs to mimic real life bolt actions, which often lead to excess wear and tear and poor reliability in the gear box. To alleviate the problem of conventional systems, G&G has independently developed the Pneumatic Blow Back system; a piston driven, gas operated mechanism to better mimic real life bolt actions. This new technology utilizes compressed air to move the bolt, which enables the action without adding extra stress to the gear box. This class leading system represents a significant milestone in the airsoft industry.
