Txxx M7A1 2009 Version

This is the 2009 updated version M7A1 AEG. It is a full metal AEG with full laser and engraved markings over the AEG and unique serial number on receiver. The AEG is equipped with the integrated M4 bolt lock/ release system which helps user to adjusting the hop-up easier. There are sling swivel slots at the front and end of the both sides of the RAS, also on the Magpul PTS CTR Carbine Stock and the sling adaptor. The vertical fore-grip has a storage compartment to store a CR123A battery, and a 11.1V 1100mAh Li-Ion battery can be installed inside the stock pipe. Package includes a 300rds magazine, fore-grip, sling swivel, bb loader and user manual.

- Code : KA AG 32
- Weight w/o magazine : 2.40 kg
- Overall length (Stock retracted) : 66 cm
- Overall length (Stock extended) : 73 cm
- Barrel length : 19 cm
- Main material : Aluminum, Nylon Fiber, High grade Polymer
- Color : Black
- Caliber : 6 mm BBs
- Method of operation : Electric power
- Battery type : Li-Ion battery for stock pipe
- Fire mode : Safe / Single / Full-auto

AEG is equipped with Authentic Magpul parts and accessories.

Trademark of S&W M&P15, used by permission of Cybergun.

S&W M&P15 MOE

This S&W M&P15 MOE (Magpul Original Equipment) rifle is another cross-over project between King Arms and Magpul Industries. It is a S&W official licensed product so full trademark and markings are engraved and laser-engraved on the metal receiver and over the AEG. The rifle is equipped with Magpul PTS MOE Grip, Magpul PTS MOE Carbine Stock, Magpul PTS MOE Handguard, Magpul PTS MBUS (Magpul Back Up Sight) and a 360 rounds PMAG. A 1600mAh 9.6V mini type battery can be installed inside the handguard. AEG is available in Black and Dark Earth color. Optional rails can be installed on the handguard slots, which sold separately.

- Code : KA-A6-52
- Weight w/o magazine : 2.57 kg
- Overall length (Stock retracted) : 78.5 cm
- Overall length (Stock extended) : 87 cm
- Barrel length : 38.8 cm
- Main material : Aluminum; High grade Polymer
- Color : Black / Dark Earth
- Caliber : 6 mm BBs
- Method of operation : Electric power
- Battery type : 1600mAh 9.6V mini type
- Fire mode : Safe / Single / Full-auto

AEG is equipped with Authentic Magpul parts and accessories.

Vxxxx Series

All the Vxxxx series AEG has full laser markings on the metal receiver and handguard. The receiver is marked with unique serial number and equipped with an integrated bolt lock/ release system. Short length outer barrel with flash suppressor are used on certain styles to reduce the rifle length. For example the CASV-M CQB AEG, its handguard provides multiple rail mounting points and numerous QD sling swivel sockets, and user can install either a short length rail or a flip-up front sight on the front of the top rail. The fore-grip and stock each has a storage compartment which is capable to store 1pcs and 2pcs of CR123A battery respectively. This rifle comes with a 6" accessory rail x two 4" accessory rails; two 2" accessory rails; a flip-up front sight and replacement short length rail, a fore-grip, a rear folding battle sight and a sling swivel.

 FIRE MODE : Safe / Single / Full-auto

Galil Series

All King Arms Galils are official licensed products. We build the Galil AEG as close as the real steel, the appearance and markings are flawless. The specs are identical to the real firearm so most of the accessories for the Galil are compatible with our AEG (e.g. handguard, stock and scope mount). 7mm bearing gearbox were used to assure the reliability of the AEG.

There are four basic frames of the Galil available from King Arms:

- Standard rifle-length AR (Assault Rifle)
- Carbine variant known as the SAR (Short Assault Rifle)
- Compact MAR (Micro Assault Rifle)
- Light machine gun ARM (Assault Rifle and Machine gun)

In order to create more realistic shooting experience, the special designed bolt carrier operating mechanism was installed to simulate the real firearm blowback action. One of the best features of this AEG is the Betalight Ready Tritium night sight set. And a dummy selector is installed on left side of AEG to stick with the original design. Even it is an AEG, it is still a very robust piece because it is build with Nylon Fiber handguard, 6065 Aluminum receiver, and steel top cover and parts.

GALIL SAR

CODE : KA-AG-15
 WEIGHT w/o MAGAZINE : 3.00 kg
 LENGTH (Stock folded) : 62 cm
 LENGTH (Stock unfolded) : 86 cm
 MAIN MATERIAL : Aluminum; Steel; Nylon fiber
 COLOR : Black
 CALIBER : 6 mm BBs
 MAGAZINE CAPACITY : 130 rounds
 METHOD OF OPERATION : Electric power
 BATTERY TYPE : AK stick type battery
 FIRE MODE : Safe / Single / Full-auto

GALIL SAR Wood Ver.

CODE : KA-AG-15-WO
 WEIGHT w/o MAGAZINE : 3.15 kg
 LENGTH (Stock folded) : 62 cm
 LENGTH (Stock unfolded) : 86 cm
 MAIN MATERIAL : Aluminum; Steel; Nylon fiber; Real wood
 COLOR : Wood
 CALIBER : 6 mm BBs
 MAGAZINE CAPACITY : 130 rounds
 METHOD OF OPERATION : Electric power
 BATTERY TYPE : AK stick type battery
 FIRE MODE : Safe / Single / Full-auto

GALIL AR

CODE : KA-AG-16
 WEIGHT w/o MAGAZINE : 3.12 kg
 LENGTH (Stock folded) : 74 cm
 LENGTH (Stock unfolded) : 98 cm
 MAIN MATERIAL : Aluminum; Steel; Nylon fiber
 COLOR : Black
 CALIBER : 6 mm BBs
 MAGAZINE CAPACITY : 130 rounds
 METHOD OF OPERATION : Electric power
 BATTERY TYPE : AK stick type battery
 FIRE MODE : Safe / Single / Full-auto

GALIL AR Wood Ver.

CODE : KA-AG-16-WO
 WEIGHT w/o MAGAZINE : 3.25 kg
 LENGTH (Stock folded) : 74 cm
 LENGTH (Stock unfolded) : 98 cm
 MAIN MATERIAL : Aluminum; Steel; Nylon fiber; Real Wood
 COLOR : Wood
 CALIBER : 6 mm BBs
 MAGAZINE CAPACITY : 130 rounds
 METHOD OF OPERATION : Electric power
 BATTERY TYPE : AK stick type battery
 FIRE MODE : Safe / Single / Full-auto

GALIL MAR

CODE : KA-AG-17
 WEIGHT w/o MAGAZINE : 2.66 kg
 LENGTH (Stock folded) : 48 cm
 LENGTH (Stock unfolded) : 72 cm
 MAIN MATERIAL : Aluminum; Steel; Nylon fiber
 COLOR : Black
 CALIBER : 6 mm BBs
 MAGAZINE CAPACITY : 130 rounds
 METHOD OF OPERATION : Electric power
 BATTERY TYPE : AK stick type battery
 FIRE MODE : Safe / Single / Full-auto

GALIL ARM

CODE : KA-AG-18
 WEIGHT w/o MAGAZINE : 3.64 kg
 LENGTH (Stock folded) : 74 cm
 LENGTH (Stock unfolded) : 98 cm
 MAIN MATERIAL : Aluminum; Steel; Nylon fiber
 COLOR : Black
 CALIBER : 6 mm BBs
 MAGAZINE CAPACITY : 130 rounds
 METHOD OF OPERATION : Electric power
 BATTERY TYPE : AK stick type battery
 FIRE MODE : Safe / Single / Full-auto

FAL Series

King Arms FAL and L1A1 are both full metal AEG. Reinforced gear box were used and furnished with detailed imitation gas tube and gas block. For the L1A1, special designed bolt carrier operating mechanism has been installed on this AEG to simulate the real firearm blowback action. Steel parts like selector, slings and knobs were used to provide better look and texture. A 12V battery can sit in the buttstock nice and firm so shooting power and time can be maximized. Moreover, each AEG carry a unique in serial number so every piece is one of a kind.

The FAL AEGs with fixed stock can store a 3000mAh 8.4V large type battery. With a little modification, a 3000mAh 9.6V large type battery can be fitted. There are handguards in 3 different lengths available to choose. For the FAL AEGs equipped with folding stock, battery can be installed inside the hand-guard instead.

L1A1

CODE : KA-AG-14
WEIGHT w/o MAGAZINE : 3.10 kg
LENGTH : 107 cm
MAIN MATERIAL : Aluminum; Steel; Nylon fiber
COLOR : Black
CALIBER : 6 mm BBs
MAGAZINE CAPACITY : 90 rounds
METHOD OF OPERATION : Electric power
BATTERY TYPE : Large type battery
FIRE MODE : Safe / Single / Full-auto

FAL

CODE : KA-AG-02
WEIGHT w/o MAGAZINE : 3.15 kg
LENGTH : 113 cm
MAIN MATERIAL : Aluminum; Steel; Nylon fiber
COLOR : Black
CALIBER : 6 mm BBs
MAGAZINE CAPACITY : 90 rounds
METHOD OF OPERATION : Electric power
BATTERY TYPE : Large type battery
FIRE MODE : Safe / Single / Full-auto

FAL PARA

CODE : KA-AG-03
WEIGHT w/o MAGAZINE : 3.24 kg
LENGTH (Stock folded) : 89 cm
LENGTH (Stock unfolded) : 115 cm
MAIN MATERIAL : Aluminum; Steel; Nylon fiber
COLOR : Black
CALIBER : 6 mm BBs
MAGAZINE CAPACITY : 90 rounds
METHOD OF OPERATION : Electric power
BATTERY TYPE : 8.4V stick type battery
FIRE MODE : Safe / Single / Full-auto

FAL Carbine

CODE : KA-AG-02-C
WEIGHT w/o MAGAZINE : 3.10 kg
LENGTH : 97 cm
MAIN MATERIAL : Aluminum; Steel; Nylon fiber
COLOR : Black
CALIBER : 6 mm BBs
MAGAZINE CAPACITY : 90 rounds
METHOD OF OPERATION : Electric power
BATTERY TYPE : Large type battery
FIRE MODE : Safe / Single / Full-auto

FAL Carbine Folding Stock

CODE : KA-AG-03-C
WEIGHT w/o MAGAZINE : 3.07 kg
LENGTH (Stock folded) : 73 cm
LENGTH (Stock unfolded) : 90 cm
MAIN MATERIAL : Aluminum; Steel; Nylon fiber
COLOR : Black
CALIBER : 6 mm BBs
MAGAZINE CAPACITY : 90 rounds
METHOD OF OPERATION : Electric power
BATTERY TYPE : 8.4V stick type battery
FIRE MODE : Safe / Single / Full-auto

FAL Tactical Carbine

CODE : KA-AG-02-TC
WEIGHT w/o MAGAZINE : 3.00 kg
LENGTH : 90 cm
MAIN MATERIAL : Aluminum; Steel; Nylon fiber
COLOR : Black
CALIBER : 6 mm BBs
MAGAZINE CAPACITY : 90 rounds
METHOD OF OPERATION : Electric power
BATTERY TYPE : Large type battery
FIRE MODE : Safe / Single / Full-auto

FAL Tactical Carbine Folding Stock

CODE : KA-AG-03-TC
WEIGHT w/o MAGAZINE : 2.93 kg
LENGTH (Stock folded) : 66 cm
LENGTH (Stock unfolded) : 92 cm
MAIN MATERIAL : Aluminum; Steel; Nylon fiber
COLOR : Black
CALIBER : 6 mm BBs
MAGAZINE CAPACITY : 90 rounds
METHOD OF OPERATION : Electric power
BATTERY TYPE : 1100mAh 9.6V twins type battery
FIRE MODE : Safe / Single / Full-auto

King Arms Ni-MH Rechargeable Batteries

• What is the difference between Ni-Cd, Ni-MH and Li-ion battery?

Batteries in portable consumer devices (laptops and notebooks, camcorders, digital camera, etc.) are principally made using either Nickel Cadmium (Ni-Cd), Nickel Metal Hydride (Ni-MH) or Lithium Ion (Li-ion) technologies. Each type of rechargeable battery technology has its own unique characteristics:

Ni-Cd and Ni-MH: the main difference between the two is the fact that Ni-MH batteries (the newer of the two technologies) offer higher energy densities than Ni-Cds. In other words, pound for pound, Ni-MH delivers approximately 100% more capacity than its Ni-Cd counterpart. What this translates into is increased run-time from the battery with no additional bulk to weigh down your portable device. Ni-MH also offers another major advantage: Ni-Cd batteries tend to suffer from what is called the "Memory Effect". Ni-MH batteries are less prone to develop this dreaded affliction and thus require less maintenance and care. Ni-MH batteries are also more environmentally friendly than their Ni-Cd counterparts, since they do not contain heavy metals (which present serious landfill problems).

Li-ion has become the new standard for portable power in consumer devices. Li-ion batteries produce the same energy as Ni-MH battery but weighs approximately 20%-35% less. This is can make a noticeable difference in devices such as cellular phones, camcorders or notebook computers where the battery makes up a significant portion of the total weight. Another reason Li-ion batteries have become so popular is that they do not suffer from the "memory effect" at all. They are also environmentally friendly because they don't contain toxic materials such as Cadmium or Mercury.

Table 1

• Why should I chose King Arms Ni-MH batteries for my airsoft rifle?

Although Li-ion batteries are becoming more commonly use amongst airsoft players, Ni-MH batteries are still the most popular choices for most players in the airsoft world, while the Ni-Cd batteries are eliminating except for some 600mAh batteries. (Table 1)

King Arms Ni-MH batteries are high quality and perform very well under most circumstances, which is complete with other well-known batteries such as Intellect. Some of the KA batteries are special designed and compatible with KA battery stocks, handguard and battery case, and other manufacturer's products. The black and deep red design makes it an eye-catcher and stands out from its rivals.

• Rate of fire

We did some testing for the matters of firing rate by using a King Arms Colt M4A1 Rifle with 3 different brands of battery (King Arms, Intellect, X brand (China Made)). The result is that the KA battery is having same kind of performance with Intellect's battery, no matter for the 8.4V, 9.6V or 10.8V. But the batteries of "X brand" were definitely having a lower rate of fire compare to the others. (Table 2)

• Capacity

The capacity of battery is strongly related to the life cycle of your AEG. Considering on this fact, we also did some testing for these three brands of batteries (Table 3). We were using the same King Arms Colt M4A1 Rifle with those three brands of 1800mAh 9.6V battery. We fired the AEG with 300 round magazine continuously until the batteries were drained. The result showed that the King Arms 1800mAh 9.6V battery can support the firing of 24 magazines, there was about 7200 rounds! For the Intellect battery we got similar result but the "X brand" battery was out after 18 magazines.

• Temperature

The longer you use the battery for your AEG, the higher the temperature the battery will be. Some batteries with bad quality might even explode. As per previous tests, King Arms and Intellect batteries become little hotter than normal after 20 magazines were fired. But the China Made battery went up a lot higher in temperature.

• Wires of battery

The battery wires also play an important role for efficient electric conductivity. We used 10 AWG wire for the KA battery to ensure its conductivity, at the same time to fit and store inside the AEG easily.

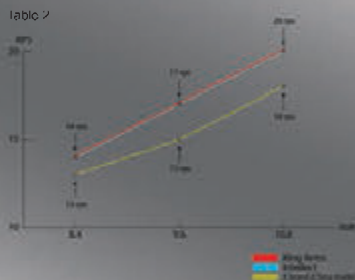

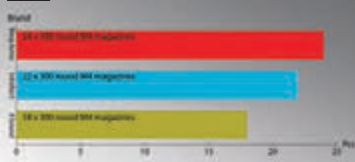

Table 3

• What is the "Memory Effect"?

Ni-Cd batteries, and to a lesser extent Ni-MH batteries, suffer from what's called the "Memory Effect". What this means is that if a battery is continuously only partially discharged before re-charging, the battery "forgets" that it has the capacity to further discharge all the way down.

To illustrate: if you, on a regular basis, fully charge your battery and then use only 50% of its capacity before the next recharge, eventually the battery will become unaware of its extra 50% capacity which has remained unused. Your battery will remain functional, but only at 50% of its original capacity. The way to avoid the dreaded "Memory Effect" is to fully cycle (fully charge and then fully discharge) your battery at least once every two to three weeks. Batteries can be discharged by unplugging the device's AC adaptor and letting the device run on the battery until it ceases to function. This will insure your battery remains healthy.

• Battery types

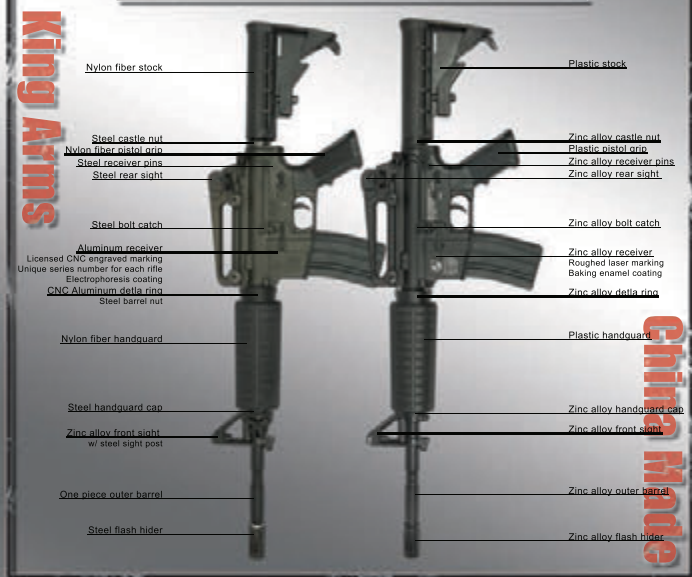

We have various types of battery to suit different airsoft guns such as AEG, M4 crane stock and tactical stock, PEG, 15 battery box, etc. We will be launching more batteries in different styles later on. Please check the battery page on the KA catalog or our website for more details.

King Arms AEG

China Made AEG

Main Materials

When you first see the KA AEG, you will see our eye catching KA AEG box. Once you open the package and then you will find the rifle you have been looking forward to is nicely sitting in the foam padding which great amount of cushioning and protection were provided. When you take the AEG out from the box, the first impression you will get is that, you will be amazed how good looking the rifle is.

The KA AEG is built from different materials such as Aluminum, Steel, Zinc Alloy and Nylon Fiber. For example, our M4 receiver was aluminum alloy constructed and went through electrophoresis treatment, which is like putting a layer of coating on top to make it stronger and more wear resistant. The markings on the receiver are either laser-engraved or CNC engraved and each AEG will have a unique serial number which makes it one of a kind. For some models the handguard and stock are built by Nylon Fiber, which is a lot stronger than normal ABS plastic. Parts such as the RAS handguard or delta ring are CNC machined out from 6065 aluminum, which makes the precise fitment and perfect surface finishing we need. Steel parts including flash hider, bolt catch, barrel nut, sight post, etc. will be found on the KA AEG too.

For the inner parts, we use reinforced Zinc Alloy for the KA gearbox to ensure it is robust and sturdy. 7mm bearing bushing are used to help reduce the friction between gears and lead to the BB being able to shoot faster and further.

All the KA AEG are made in Hong Kong. Our technicians and assembly line workers are well trained, skilled and experienced and we are performing quality checks on all levels to ensure the KA AEG will meet our best quality standards in all aspects before we pack them. And the users can enjoy their really-to-shoot, trouble-free rifle once they receive the AEG.

Look no further, KA AEG is what you want and need. Visit our website for more product information.

In any sports, the most important aspect to win the game is to be well prepared. Talking about survival game, to be well prepared means that you have to be well equipped. KA can't really help you to be mentally and physically well prepared, but we can provide the best AEG and gears for you so that you can just focus on the game itself.

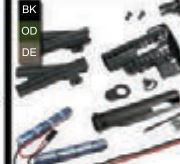

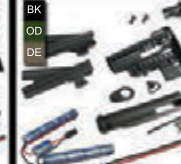

King Arms has been producing realistic and high quality products with affordable prices to serve the airsoft market since day one. Not only working 120% on our own, we also listen to all you airsoft players out there and that is the reason why we came up with better products from time to time. What is the difference between KA and other manufacturers' AEG, and what is so special and nice about the KA ones, you may wonder. Let us tell you why you should choose KA AEG at all times.
