

UNIVERSO SNIPER
AIRSOFT

SINCE 2004

HISTORY OF VFC

Vega Force Company was founded in 2004 by three dreamers who had a shared obsession; they believed that guns are true **"Works of Art"**

And from that seed planted 14 years ago, VFC has continued to build a reputation of producing high performance airsoft replicas; known worldwide for their precision internal mechanics and realistic external design features.

Harnessing OEM experience that spans more than a decade; VFC has built a professional team that specializes in designing and developing quality licensed airsoft products for some of the biggest names in the industry. Because of this, VFC has diligently earned the trust not only from the users, but also from distributors and license holders worldwide.

"To meet the collector's desire and accommodate the operator's need" is the philosophy of VFC's products; and no other product embodies this philosophy than the Avalon series. Renowned worldwide for its reliability and refined surface finishing, the Avalon series merges the latest in airsoft technology and precise quality control standards into a single package.

Over the past year since its release, the Avalon series has garnered high acclaim from end users across the globe. And because of this it has quickly become the industry gold standard for premium airsoft replicas.

That tradition also continues with VFC's move into redefining the Gas Blowback (GBB) airsoft operating system; Using the same

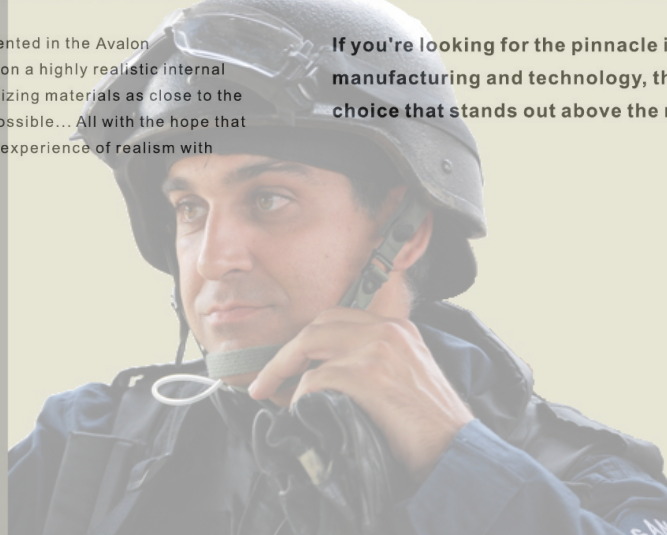

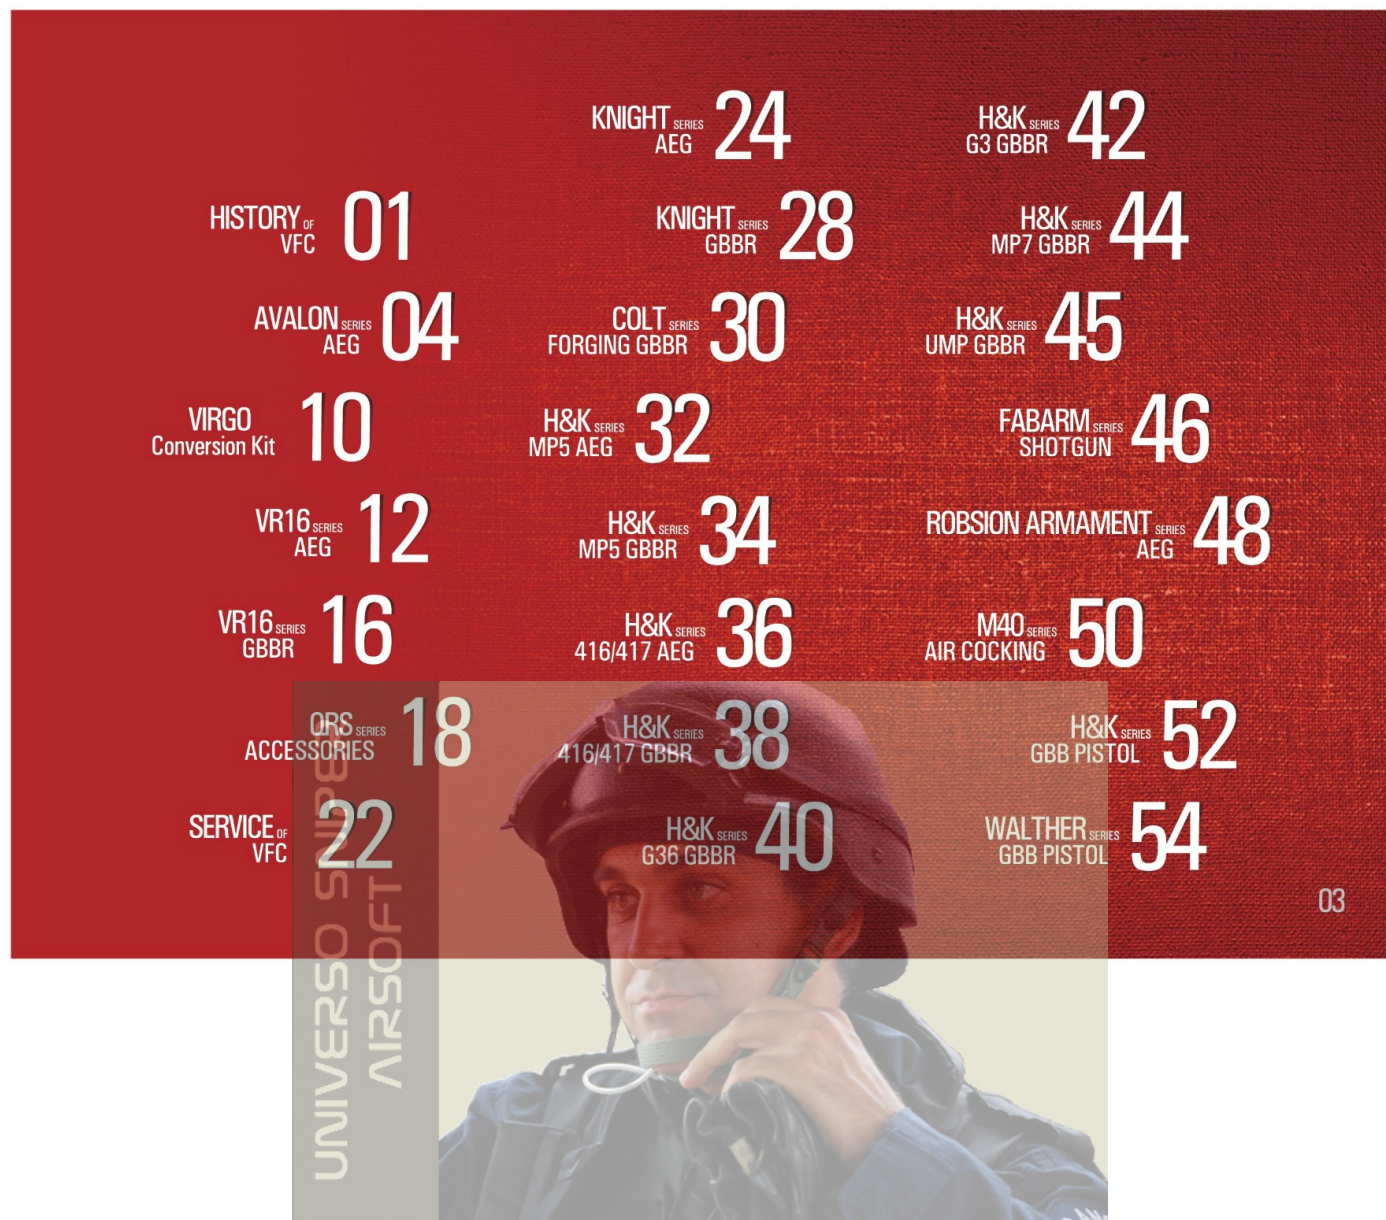

core philosophies that are implemented in the Avalon development, VFC set their sights on a highly realistic internal GBB system, while focusing on utilizing materials as close to the rifles' real world counterparts as possible... All with the hope that the end user will gain a whole new experience of realism with VFC's new products.

If you're looking for the pinnacle in airsoft manufacturing and technology, there's once choice that stands out above the rest... VFC.

AVALON PREMIUM SERIES

Perfect

The AVALON Series includes VFC's Quick Response System (QRS) accessories allowing you to adjust the rifle to fit your shooting style; and comes with Crusader Tech tactical accessories which are friendly for both left and right hand users with rapid application.

Amazing

The AVALON internals include the new ECS gearbox and a new strong magnetic motor to power the AEG, as well as a MOSFET electronic control unit inside for faster trigger response.

Exquisite

The AVALON series rifles include a match grade hop rubber, precision inner barrel and CNC machined air nozzle; all which give the AVALON AEG enhanced shooting accuracy at every engagement distance.

1911 PISTOL SERIES

The M1911 is a single-action, semi-automatic, magazine-fed, recoil-operated pistol chambered for the .45 ACP. It served as the standard-issue sidearm for the United States Armed Forces from 1911 until the mid 1980's.

With the 1911's 75 years of continued service, and 3 decades more of civilian use, it's no wonder that there are more derivatives of this pistol than any other today.

VFC is excited to launch our take on the classic 1911 this year, a premium-grade airsoft replica 1911 with performance to match.

CAUTION:

VR16 SERIES

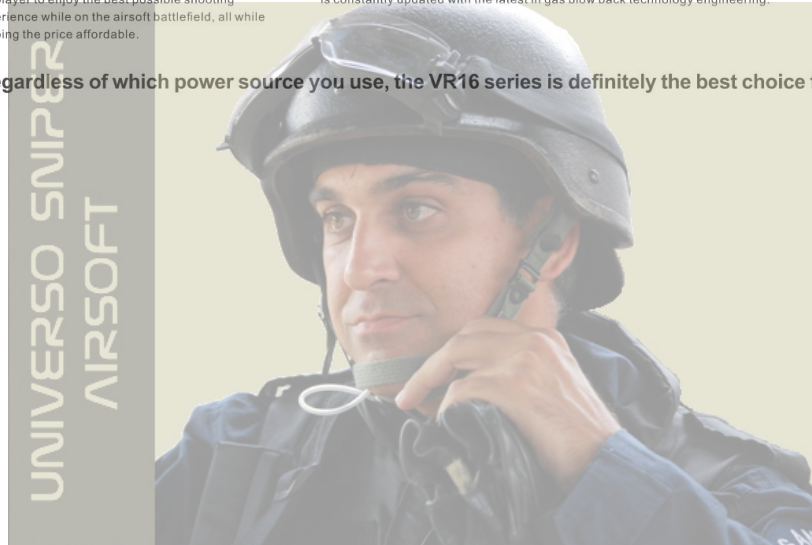

Easy to start

As VFC's first brand for Airsoft players. We put many innovative designs into the VR16 series, and every VR16 is designed with the mindset to assist the player to enjoy the best possible shooting experience while on the airsoft battlefield, all while keeping the price affordable.

Excellent internals

Containing our strong VFC metal V2 gearbox, V2 HOP-UP system, 8mm ultra high speed ball bearing, heat-resistant switch mount and custom high speed gear, the internals punch well above their weight class. And for the Gas users; VR16 GBBR system not only utilizes steel parts but also is constantly updated with the latest in gas blow back technology engineering.

Regardless of which power source you use, the VR16 series is definitely the best choice for Wargamers.

ECS 2.1 GEAR BOX

The internal components of Virgo include a powerful combination of the new ECS 2.1 quick change gearbox and strong magnetic electric motor; all to give you strength and reliability as the foundation for your custom build.

**PRECISION PERFORMANCE**

Rounding out the internal components are a combo of a precision grade hop rubber and hop-up system for more accurate shooting.

DIGITAL FIRING CONTROL SYSTEM

The included new DIGITAL FIRING CONTROL SYSTEM has been added to ensure sharp trigger response and also to allow for programming modes of semi, burst and full auto; giving you flexibility for whatever task you plan to undertake.

Q.R.S. TACTICAL ACCESSORIES

The Virgo includes the latest VFC QRS pistol grip, Crusader Tech tactical accessories (which are left-hand-shooter friendly), and a modular barrel which can change in length from a 10 inch CQB rifle to a 14 inch standard carbine length in mere seconds.

CHANGEABLE OUTER BARREL

With the Virgo changeable outer barrel, you can choose between a 10 inch or 14 inch length to fit your rifle. And if you change your mind the barrel will change with you... all in one complete package.

VIRGO

STD VERSION ▶ VF9-MB-VIRGO-BK01

DX VERSION ▶ VF9-MB-VIRGO-BK81

M4 Conversion Kit

Conceived for the advanced VFC user.

With VFC's new Virgo series, you are in control! Whatever style it is; military, tactical, speedsoft or your own custom idea; the external parts are selected by you.

But leave the internals to us... with our premium components powering your custom AEG, you can be comfortable knowing that the shooting experience will be second to none!

Combined, these superior parts are the base platform for your next premium custom rifle build.

AIRSOFT

A GUN FIGHTER TRAINING PLATFORM FIREARMS IMULATOR

UNIVERSO SNIPER
AIRSOFT

Introduce to an alternative training solution with low cost but high simulation. It may not be proposed only once, training with Airsoft in recent years. It's due to the facts that it costs much lower than any other power source training platforms, and it also provides the most important factor in training, SAFETY. VFC is earned a worldwide reputation in Airsoft Industry, due to our product's the durability of performance and highly realistic exterior design. These factors make the advantages of been a training weapon for the professional personnel and skilled enthusiasts, especially in quick response and weapon pointing course.

This training system is based on VFC's products and upgraded by training environment and weapon tactics. It would not easily harm the entrants but also can identify hit and be hit easily in any simulation. They are also strong enough for any harsh operating. Easy maintenance and low cost on consumables are also a advantage for it.

OEM / ODM SERVICE

The good quality, reasonably price are well-reputed by worldwide airsoft enthusiasts, license holders and major distributors. VFC is also a reliable partner for you to achieve business success. What VFC relies is the crews of profession with passion, and the ability of quick response and well communication, which feeds every demands with the best solutions.

Well communication, professional knowledge, and excellent service are the three features of VFC ODM service. That's why people say

"Professional leads to perfection"

STF/12

The FABARM S.P.A. Company is one of Italy's main manufacturers of tactical, defensive and Police shotguns. In fact, FABARM shotguns have been used and well-appreciated by civilian gun owners and professional operators (military, law enforcement, and private security personnel) all around the globe. Based in this success, in 2014 the company launched the "FABARM Professional" line – a specialized lineup of 12-gauge pump-action shotguns conceived mainly for military and law enforcement customers – Starting with their flagship product, the STF/12 series.

The STF/12 is the first tactical shotgun system to have been completely conceived as a modular design and to have been entirely engineered and manufactured in Italy.

It is offered in six different factory variants, all based on the same hard-anodized black ERGAL 55 lightweight aircraft-grade aluminum alloy frame, to which all other components are installed and from which they're easily removed, either without instruments or with basic tools. This means that, given access to the right components, each variant of the STF/12 line can be converted to any other in a matter of minutes.

In recent years, more and more parts and accessories are being installed on weapons used by Military and Law Enforcement personnel. With that in mind, the modular design of STF/12 will be the new solution for multiples missions... no matter what the needs of the Operator are.

鍛 SERIES FORGING

WITNESS THE BIRTH OF VFC'S SUPREME MASTERPIECE!

In real steel world, most rifles have undergone the forging process to allow them to become stronger and more durable under extreme use.

In VFC we took the same approach; to utilize the most stringent manufacturing technology in combination with carefully selected materials and precise manufacturing processes (including the "forging" process) to create the highest quality GBBR product VFC has made yet.

Our goal: to ensure that every Forging Series product is a "Work of Art" and worthy of the collector's eye.

And it is not only just a collectible, it's also a premium Airsoft gun with high-end performance resulting in a superior shooting experience.

But actions speak louder than words; and when you have FORGING Series product in your hand, you will understand the passion we put into this Work of Art.

SOPMOD SERIES

The Answer of Special Operation Rifle.

In the year of 1990s, United States Special Operations Command (USSOCOM) start a new program—Special Operations Peculiar Modification (or "SOPMOD"), to find a solution for extra requirements of special force infantry weapon, and to assemble all additional combat gears or parts, which allows Special Operator to configure their weapons to individual preferences and mission requirements.

In conclusion, the "SOPMOD M4" were finished. Although SOPMOD M4 was successful, in 2001, next program—"SOPMOD II" was ready to improved those weapon once again, which is an innovative upgrade to the M4 platforms, an uninterrupted Upper Rail Platform with quad Mil-Spec 1913 Picatinny Rails, Free-Floating design and a sightless gas block, made by aircraft grade 6061-T6 aluminum, full precision CNC machined and military specification type II hard coat anodized with flat dark earth color. Also a new type of Hardened Steel Barrel Nut for the stability of installation.

All these new rail system (or a combination upper-receiver kit) were sent to the troops on 2005, and used by many Tier-1 units and the U.S. special force. In recent years, these tactical weapon system has been seen on all main battlefield and still an irreplaceable weapon.
