SINCE 2004

HISTORY OF VFC

Vega Force Company was founded in 2004 by three dreamers who had a shared obsession; they believed that guns are true **"Works of Art"**

And from that seed planted 16 years ago, VFC has continued to build a reputation of producing high performance airsoft replicas; known worldwide for their precision internal mechanics and realistic external design features.

Harnessing OEM experience that spans more than a decade; VFC has built a professional team that specializes in designing and developing quality licensed airsoft products for some of the biggest names in the industry. Because of this, VFC has diligently earned the trust not only from the users, but also from distributors and license holders worldwide.

"To meet the collector's desire and accommodate the operator's need" is the philosophy of VFC's products; and no other product embodies this philosophy than the Avalon series. Renowned worldwide for its reliability and refined surface finishing, the Avalon series merges the latest in airsoft technology and precise quality control standards into a single package.

Over the past year since its release, the Avalon series has garnered high acclaim from end users across the globe. And because of this it has quickly become the industry gold standard for premium airsoft replicas.

That tradition also continues with VFC's move into redefining the Gas Blowback (GBB) airsoft operating system; Using the same

core philosophies that are implemented in the Avalon development, VFC set their sights on a highly realistic internal GBB system, while focusing on utilizing materials as close to the rifles' real world counterparts as possible... All with the hope that the end user will gain a whole new experience of realism with VFC's new products.

If you're looking for the pinnacle in airsoft manufacturing and technology, there's once choice that stands out above the rest... VFC.

PREMIUM AEG SERIES

PERFECT

The AVALON Series includes VFC's Quick Response System (QRS) accessories allowing you to adjust the rifle to fit your shooting style; and comes with Crusader Tech tactical accessories which are friendly for both left and right hand users with rapid application.

AMAZING

The AVALON internals include the new ECS gearbox and a new strong magnetic motor to power the AEG, as well as a *Digital Firing Control System* inside for faster trigger response.

EXQUISITE

The AVALON series rifles include a match grade hop rubber, precision inner barrel and CNC machined air nozzle; all which give the AVALON AEG enhanced shooting accuracy at every engagement distance.

STARTING FROM THE SOUL OF SAMURAI

Samurai, the one of the most powerful warriors in the history of the world. And their weapon, the Katana, has long been known as a powerful tool when wielded in their expertly trained hands. VFC is very proud to launch a newly designed AEG with that same spirit in mind - The Avalon Samurai Edge.

The Samurai Edge was designed from the AR type weapon system, but incorporating lightweight & tactical elements to enhance the platform. Internally, the built-in new DIGITAL FIRING CONTROL SYSTEM allows you to have a more unique shooting experience than ever before. It is the modern realization of one of the most famous weapons in all of history.

This is not just an airsoft weapon... it contains the soul of a warrior of honor.

ECS 2.1 GEAR BOX

The internal components of Virgo include a powerful combination of the new ECS 2.1 quick change gearbox and strong magnetic electric motor; all to give you strength and reliability as the foundation for your custom build.

PRECISION PERFORMANCE

Rounding out the internal components are a combo of a precision grade hop rubber and hop-up system for more accurate shooting.

DIGITAL FIRING CONTROL SYSTEM

The included new DIGITAL FIRING CONTROL SYSTEM has been added to ensure sharp trigger response and also to allow for programming modes of semi, burst and full auto; giving you flexibility for whatever task you plan to undertake.

Q.R.S. TACTICAL ACCESSORIES

The Virgo includes the latest VFC QRS pistol grip, Crusader Tech tactical accessories (which are left-hand-shooter friendly), and a modular barrel which can change in length from a 10 inch CQB rifle to a 14 inch standard carbine length in mere seconds.

UNIVERSO SNIPER
AIRSOFT

**CHANGEABLE OUTER BARREL**

With the Virgo changeable outer barrel, you can choose between a 10 inch or 14 inch length to fit your rifle. And if you change your mind the barrel will change with you... all in one complete package.

SERVICE OF VFC

TOY GUN AND ACCESSORIES

It is said that detail makes perfect. VFC sincerely follows it and makes every detail count, also delicate ourselves to achieve an extraordinary products with all the detail composing. Thus, it's not only a BB shower machine, but also the duplication of gunsmith's craftsmanship.

From a screw to an assembly complete, VFC concentrates on every parts, make them in reasonably price and can keep the high quality craftsmanship, the most important of all, it's also provides a decent mechanical performance with any appropriate Airsoft power source, firing pellets is a necessarily issue on Airsoft, as a company composed by many senior players with professional engineers, it's simply one of the VFC's motto triangle, performance, craftsmanship, and experience.

CUSTOM SERVICE

VFC welcomes all kind of custom service. Distributors can build whatever you like with VFC's creed, the motto triangle, performance, craftsmanship, and experience. There also are outstanding engineer teams to consult you the solution of mechanism and material, sales team would help you to build entire sales network; PM personnel will provide marketing assistance, and experience consulting.

The entire VFC team can serve you from manufacturing to handing your products to your end users. This service runs for years, we are also learning and remaking process better and better, will team VFC would have the opportunity to serve you.

UNIVERSO AIRSOFT

A GUN FIGHTER TRAINING PLATFORM FIREARMS IMULATOR

UNIVERSO SNIPER
AIRSOFT

Introduce to an alternative training solution with low cost but high simulation. It may not be proposed only once, training with Airsoft in recent years. It's due to the facts that it costs much lower than any other power source training platforms, and it also provides the most important factor in training, SAFETY. VFC is earned a worldwide reputation in Airsoft Industry, due to our product's the durability of performance and highly realistic exterior design. These factors make the advantages of been a training weapon for the professional personnel and skilled enthusiasts, especially in quick response and weapon pointing course.

This training system is based on VFC's products and upgraded by training environment and weapon tactics. It would not easily harm the entrants but also can identify hit and be hit easily in any simulation. They are also strong enough for any harsh operating. Easy maintenance and low cost on consumables are also a advantage for it.

OEM / ODM SERVICE

The good quality, reasonably price are well-reputed by worldwide airsoft enthusiasts, license holders and major distributors. VFC is also a reliable partner for you to achieve business success. What VFC relies is the crews of profession with passion, and the ability of quick response and well communication, which feeds every demands with the best solutions.

Well communication, professional knowledge, and excellent service are the three features of VFC ODM service. That's why people say

"Professional leads to perfection"

**SAVE TIME
CONVENIENT
AND
FAST**

ANYTIME, ANYWHERE, QUICKLY and EASILY

VFC's past GBBR products have problems with inconvenient HOP-UP adjustment. That's why we developed a global exclusive Utility Patent - the "GuideHOP".

The "GuideHOP" HOP-UP adjust system effectively solve the problem of HOP-UP adjusting that you don't need to disassemble to your GBBR or Gas Pistol.

All you need is a 2.5mm hex wrench to adjust HOP-UP at gas block for GBBR, and directly adjust HOP-UP by recoil spring guide for your gas pistol.

This Utility Patent allows you can adjust HOP-UP in anytime, anywhere, quickly and easily, without any disassembly. We will put this design into new products or renew our past products.

Please stay tuned with our "GuideHOP".

The advertisement features a dark, atmospheric background with a close-up of a VR16 GBBR Series airsoft rifle on the left. The rifle is black with silver accents and has 'VR16' and 'VEGA' visible on its side. The background also shows a textured, possibly metallic surface with some red and white markings. In the center, the text 'VR16 GBBR SERIES' is prominently displayed in a large, white, sans-serif font. Below this, a smaller white text block contains a bold statement and two paragraphs of descriptive text. At the bottom, there is a photograph of a person wearing a black tactical helmet and a blue jacket, looking off to the side. The person's hand is near their chin. The overall aesthetic is professional and geared towards airsoft enthusiasts.

VR16 GBBR SERIES

Regardless of which power source you use, the VR16 series is definitely the best choice for Wargamers.

VR16 series is the first VFC own brand. It is distributed around the world, earned a good reputation and market response. It is combined with high-end technology and excellent quality to achieve and reach the high quality Airsoft GBB range.

You could find Fine Finishing on every parts. The Craftsmanship is excellent. If you are looking for a GBB with good price & quality, VR16 will be your best choice!

KAC M110
Long-Range Watchmen of US Army

The M-110 SASS GBBR's inherent accuracy, quick-change 20-round magazine, ambidextrous controls, abundant MIL-STD-1913 rail mounting capabilities, and highly effective sound suppressor system all contribute to the system's combat success. Like the Mk11, the heart of the M-110 system is a 20" Chromoly 5R Cut rifled barrel. To meet US Army requirements for service in the current theater of operation, a durable flat dark earth colored coating is applied over standard protective finishes.

SERIES FORGING

WITNESS THE BIRTH OF VFC'S SUPREME MASTERPIECE!

In real steel world, most rifles have undergone the forging process to allow them to become stronger and more durable under extreme use.

In VFC we took the same approach: to utilize the most stringent manufacturing technology in combination with carefully selected materials and precise manufacturing processes (including the "forging" process) to create the highest quality GBBR product VFC has made yet.

Our goal: to ensure that every Forging Series product is a "Work of Art" and worthy of the collector's eye.

And it is not only just a collectible, it's also a premium Airsoft gun with high-end performance resulting in a superior shooting experience.

But actions speak louder than words: and when you have FORGING Series product in your hand, you will understand the passion we put into this Work of Art.

STF/12

The FABARM S.P.A. Company is one of Italy's main manufacturers of tactical, defensive and Police shotguns. In fact, FABARM shotguns have been used and well-appreciated by civilian gun owners and professional operators (military, law enforcement, and private security personnel) all around the globe. Based in this success, in 2014 the company launched the "FABARM Professional" line – a specialized lineup of 12-gauge pump-action shotguns conceived mainly for military and law enforcement customers – Starting with their flagship product: the STF/12 series.

The STF/12 is the first tactical shotgun system to have been completely conceived as a modular design and to have been entirely engineered and manufactured in Italy.

It is offered in six different factory variants, all based on the same hard-anodized black ERGAL 55 lightweight aircraft-grade aluminum alloy frame, to which all other components are installed and from which they're easily removed, either without instruments or with basic tools. This means that, given access to the right components, each variant of the STF/12 line can be converted to any other in a matter of minutes.

In recent years, more and more parts and accessories are being installed on weapons used by Military and Law Enforcement personnel. With that in mind, the modular design of STF/12 will be the new solution for multiples missions... no matter what the needs of the Operator are.

1911 PISTOL SERIES

The M1911 is a single-action, semi-automatic, magazine-fed, recoil-operated pistol chambered for the .45 ACP. It served as the standard-issue sidearm for the United States Armed Forces from 1911 until the mid 1980's.

With the 1911's 75 years of continued service, and 3 decades more of civilian use, it's no wonder that there are more derivatives of this pistol than any other today.

VFC is excited to launch our take on the classic 1911 this year, a premium-grade airsoft replica 1911 with performance to match.
