**注意
CAUTION**

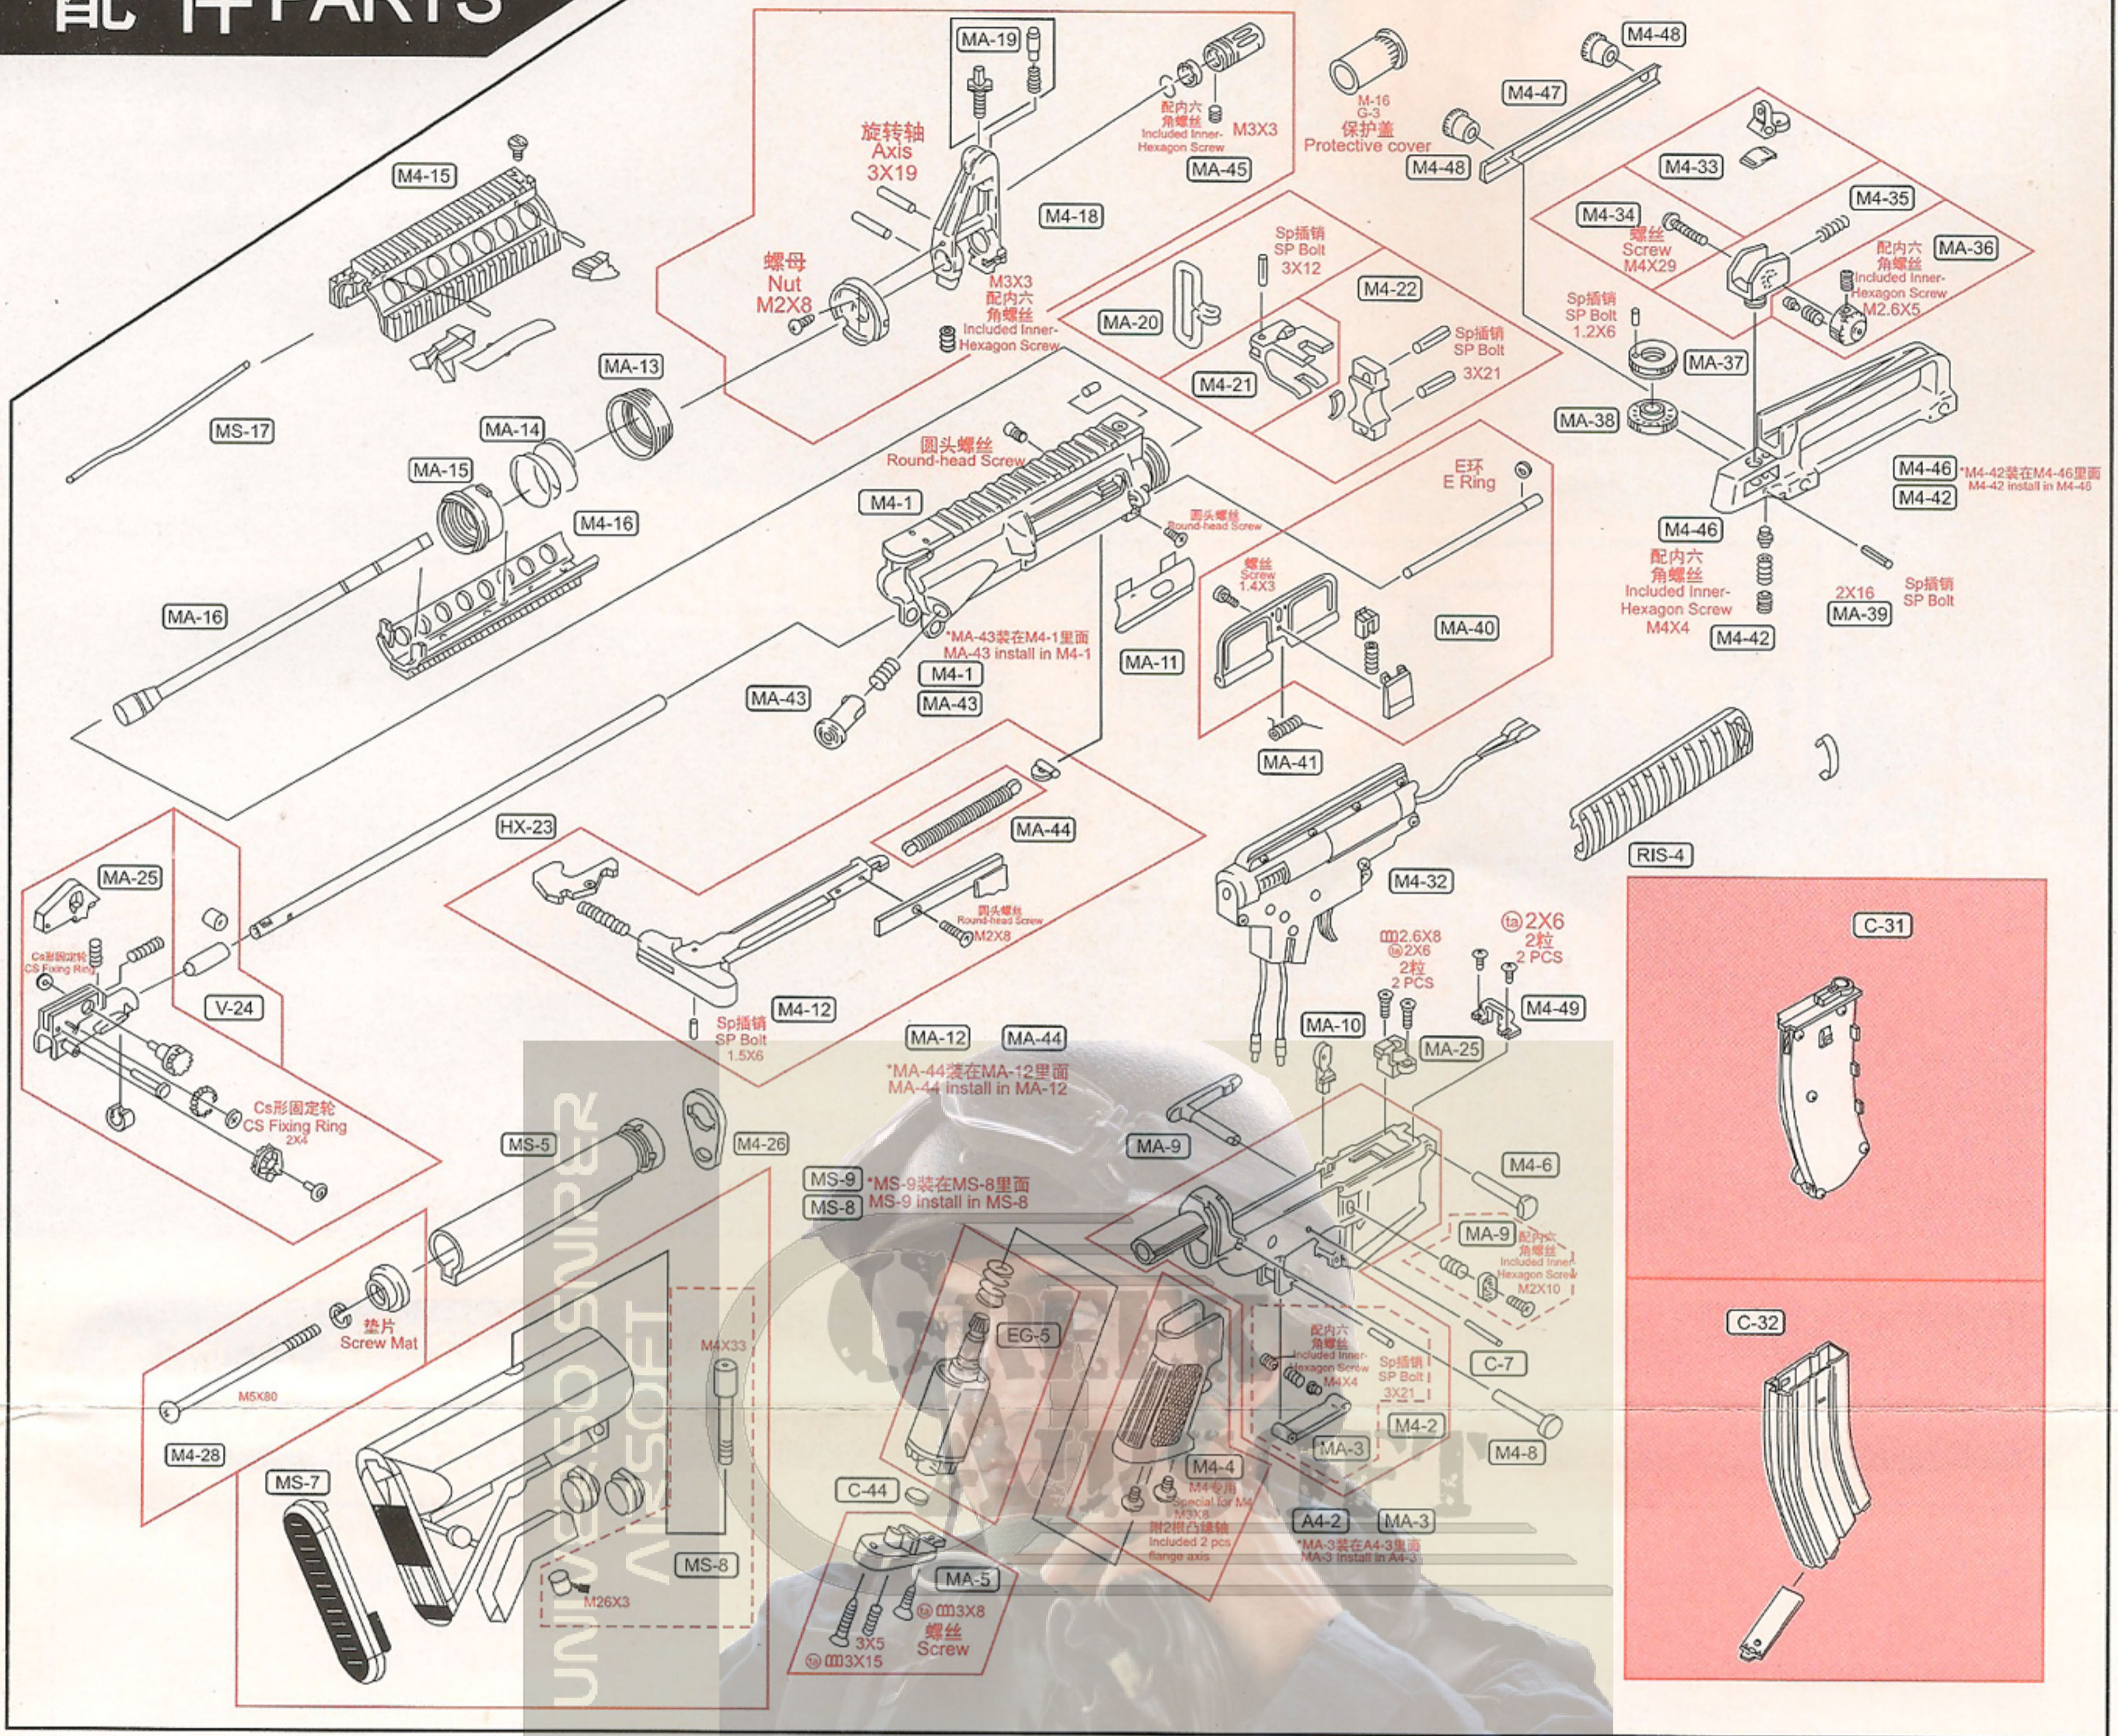

· 请不要丢失调节器工具!
Be sure not to lose the adjustment tool!

**注意
CAUTION**

· 电动枪的后瞄准器设计同实枪几乎一模一样。最大的不同在于范围的大小,请仔细阅读说明书可变"HOP UP"之说明。(实枪使用重的弹丸,利用弧线形的弹道瞄向远距离。而此电动枪却因安装HOP UP装置,即使是射向远距离,BB弹也固有水平飞行的特性。调整电动枪的瞄准器,享受正确射击的乐趣。)

The rear sight of B/O gun is designed as close to the real thing as possible. But, of course, the ranging will differ from the actual, please read "variable hop up system" for direction, (The real gun use the solid bullet, shoot the long-distance target by it's arc ballistic trajectory, but, for this gun fix with HOP UP system, the bb bullet could keep level to shoot to the long-distance target, please adjust the sight.)
