This sport gun is developed for enjoying sport shooting only. As the Airsoft Gun has the potential risk of serious injury such as blindness and damage to the property, please read the Handling & Instruction manual before use.

- This Airsoft Gun is capable of shooting a 6mm diameter BB, Operate the Airsoft Gun with caution and pay attention to safety.
- During a game, always put your goggles or facemask on. Failure to wear eye protective gear in the worst case will cause blindness.
- Pay attention to and take care to not hit bystanders within the estimated dangerous firing zone.
- Never shoot any items that subject to breakage. (glass, lamp, car, gas bomb...etc)
- Never insert items other than an airsoft BB into the magazine or gun barrel.
- The gun must not be operated after drinking alcohol to avoid possible danger.
- Always store at place out of the reach of children
- Having a positive playing demeanor is essential.
- Select a safe place for operating the Airsoft Gun. Avoid places where people and cars pass across or third persons are around.
- Always put the gun in a case or bag when you are carrying it. Avoid giving rise to public panic.
- BB bullets maybe fire out even the magazine is removed. Direct the muzzle towards a safe area. Pull the trigger to confirm no bullets remain in the gun. Then attach the protective plug to the muzzle when unused.
- Remove the magazine and Co2 from the gun when unused.

12 Replace the nozzle (Continue)

After the C Clip is removed, you should be able to take the nozzle out from the bolt

Reverse all the step for assembling

6 Firing Operation

Safe

Semi Auto

Full Auto

To Fire the pellet

- 1) Switch the selector switch to Semi or Full Auto
- 2) Pull the trigger

Caution

- Confirm your firing area is safe before firing.
- There are possibilities that no BB comes out after pulling the trigger. This may happen when new magazine is inserted. Switch to Full Auto and fire 5 – 10 shots will solve this problem.
- Charge the battery if the firing cycle become slow.
- Give the Airsoft Gun a rest of 5 – 10 minutes after firing 220 rounds in order to ensure long service lives of the motor and battery.
- If bullets are clogged, stop firing and remove the clogged bullets immediately.
- Service the Airsoft Gun with silicon oil as daily maintenance.
- Hop up may be unstable for first 200-300 rounds after silicon oil is used, this is normal operation of the gun.

7 Basic Layout Structure

- Upper Receiver
- GBox Bolt Assemble
- Lower Receiver

8 Hop Up Adjustment (Suitable for GBox Guns)

X Too Much Hop Up (Return lever towards NORMAL)

Best Position

X Not Enough Hop Up (Move lever towards HOP)

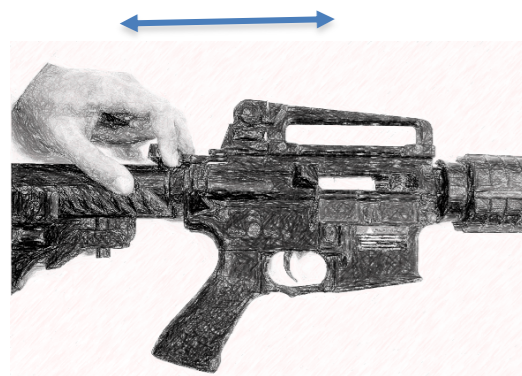

Variable Hop Up System

By producing backspin on the BB bullets, this system allows BB to fly straighter and longer

Variable Hop Up System

Adjust the hop up by using the hop tool provided in the packaging. Place the tool inside the ejection port perfectly before adjusting.

Pull the charging handle backward, lock the bolt plate up with pressing down the bolt lock catch on the other side

Caution

- The best position is where the bullets fly horizontally and the longest flying distance is obtained.
- Turning excessively adversely affects the trajectory. Therefore stop turning the dial when bullets fly horizontally.
- Moving the lever too much towards HOP will cause bullets to clog. Firing the gun with clogged bullets will damage the nozzle.
- If the hop up is adjusted excessively and causing clogging of bullets, stop operating the gun immediately. Return the lever to NORMAL and remove the clogged bullet.
- APS Ltd will not be held responsible for any damages or accidents causing by wrongful operation, disassembly and modification of the Airsoft Gun.

9 Flip Up Sight (Front) (Optional)

Flipped Front Sight

10 Disassembling the gun

Move the upper receiver forward

Separate the upper and lower receiver

Remove the front and rear frame lock pin by punching it out or using an allen key
