Loading the Cartridge

Firing the Cartridge

870 Shell GEN II Refillable Cartridge

Re-designed cartridge shell so user can refill gas fast and easy. The valve works like other gas filled Airsoft product.

APS provides either standard paintball cylinder adapter or 88g adapter for recharging.

Connect the adapter with gas source, place the shell on a flat surface

Push the charger downward by force to charge. Charge for 3 – 5 sec to fill up the cartridge shell

(Ensure the needle and shells are 100% vertically connected)

Caution!

Avoid spending too much force when charging the shell, the charging needle may get bent or damage, handle with extreme care.
