- ▲ With all products that employ high precision 6.03 mm inner barrel use precision 5.95mm BB pellets. Damage to the product due by faulty BB pellets voids the warranty.
- ▲ The buyer and the user of this product shall adhere to all local laws regulating the usage and the ownership of airsoft guns.

- ▲ This product is intended for users 18 years or older.
- ▲ Read all instructions before using this product.
- ▲ Adult supervision required.
- ▲ Always wear safety goggles when using this product.
- ▲ Misuse or careless handling of this product may cause injury.
- ▲ May be hazardous up to 50 meters.

- Orange tip disclaimer :**
- ▲ All G&G Airsoft products come with a permanent fixed orange tip required by law, which grants Airsoft legal usage in the United States and complied with the United States laws.
 - ▲ If you alter, remove, modify, or abuse the orange tip, all warranty will be void.

Warning

For more product information please visit our website www.guay2.com

You may be liable for damaging public or personal property or for injuring a person or an animal. Always observe good manners and enjoy fun sport shooting.

Never direct the muzzle towards a person, animal or in any direction that may cause harm or damage to the third party.

When you carry the air gun, attach the safety cap, set the selector lever to the safety position, and always put the air gun in a case or bag.

Activating the trigger carelessly is extremely dangerous. Never put your finger on the trigger unless the safety cap is removed and you are ready to shoot a target.

Select a safe place for operating the air gun, Avoid places where people and cars are around.

Make sure to put the safety cap on the muzzle, except when you are shooting. Do this to prevent accident, discharge of BB's, and for dust protection purposes. Never pull the trigger while the safety cap are attached.

When shooting the air guns for target practice or in a game situation, you and all participants must wear safety goggles or other eye protective gear. Also, pay attention to ricochets. It is very important to pay attention to third parties other than the participants.

There may be cases where some BBs remain in the gun after the magazine has been removed. After removal of the magazine, direct the muzzle towards a safe direction and pull the trigger to confirm that there are no BBs remain in the gun, then attach the safety cap.

Safety procedures:
 1. Attach the safety cap to the muzzle.
 2. Set the selector lever to the safety position.
 3. Remove the magazine.
 4. Remove the battery.

Looking into the muzzle is extremely dangerous, regardless if BB's are loaded or not. If you get hit in the eye by a BB pellet, worst case scenario may result in permanent damage to your eye sight.

Always attach the safety cap to the muzzle, remove the battery, and store the air gun in a case or bag and at a place that is out of reach of children.

Disassembling or modifying the gun may adversely affect the performance and make it dangerous. It may be against the Law."

COMPONENTS

SELECTOR & SAFETY SETTING

Safety On

When the gun is not in use or in storage, make sure the selector switch is set to the 'S' position and attach the protective cap onto the muzzle.

Semi Auto

Set the selector switch to the 'P' position. The gun will fire once per trigger pull.

Full Auto

Set the selector to the 'A' position. The gun will continuously fire while the trigger remains being pulled.

CAUTION | Never operate the selector lever while pulling the trigger. Pulling the trigger with the selector being set at safe mode may damage the air gun.

CAUTION | Set the selector in the correct position; otherwise, a malfunction may occur.

BATTERY SETTING for GK5D

Pull the handguard locking pin out.

Take off the handguard.

Assembly the battery with the rings.

CAUTION

Before install the battery:
1. Turn the selector to the Safety position.
2. Remove the magazine.

Connect battery plug with the connector and insert the battery into the handguard.

Reassembly the handguard.

RECOMMENDED BATTERY TYPE

G-11-082
G-Power LI-PO 7.4V 1100 mAh
(Two-piece)

FOLDING FRONT SIGHT

UP

DOWN

HOW TO INSTALL RAIL COVER

Installing the Rail Cover

Slide in rail cover as shown in the picture.

Removing the Rail Cover

Pull the center piece as shown in the picture. Slide the cover out.

HOW TO INSTALL | REMOVE HANDGUARD

Removing the handguard

1. Push the lever as shown in the picture.
2. Remove the handguard

Installing the Handguard

3. Install the handguard as shown in the picture.
4. Push the lever to secure the handguard.

Installing the battery

Connect the battery plug with the connector, then insert the battery into the handguard.

HOW TO OPERATE BOLT | CHARGING HANDLE

Bolt Catch

Pull the charging handle toward the butt stock to catch the bolt.

Bolt Release

Press the bolt release button to release the bolt.

Loading the BBs

Slide open the loading chamber and pour in the BBs to load the magazine up.

Installing the Magazine

Push the mag in until you hear a "click" sound.

Loading the BBs

After the BB pellets have been loaded, close the cover and wind the gear on the bottom of the magazine until you spot a BB in the feeding chamber.

Installing the Magazine

Insert the magazine into the mag well.

Removing the Magazine

Push the magazine release button to release the magazine.

Adjusting the Rear Sight

To zero windage:
 Turn clockwise or counter clockwise

HOW TO ADJUST BUTT STOCK

Adjusting the Butt Stock

Press the nub as shown in the picture to unlock the lever. Extend or collapse after unlocking.

Pull back the locking lever to secure the desired position.

Folding the butt Stock

Press the butt stock down as shown in the picture to release folding stock catch.

Fold to the side of the receiver when stock catch is free.

BATTLE SIGHT [FLIP MANUALLY]

For standard.

For Precision.

Do not jam the cleaning rod into the barrel by force. Should the BBs remains inside the barrel after following the instructions from above, with the protection cap over the barrel, point the gun to a safe direction and discharge any loosened BBs in semi-automatic mode.

MAINTENANCE

Maintenance When Bullet Speed Becomes Low

1. Place a few drops of silicone oil or teflon oil from the pellet entrance. Insert BB pellets into the magazine and fire around 1 to 2 magazines.
2. To complete the cleaning, use the cleaning rod (with cotton), to remove excess oil.

Removing Clogged Bullets

1. Return the hop-up dial to the zero position and insert the cleaning rod from the lead edge of the barrel.
2. To remove clogged BB's, carefully insert the cleaning rod inside the barrel with the flat tip facing down as shown below.

HOP-UP ADJUSTMENT

Pull the cocking handle backwards. Turning the hop-up dial can help you achieve your ideal flight pattern of the BB pellet.

The hop-up dial can only be turned a certain amount. Turning too much will damage the unit.

Too much Hop-Up.
 (Return the lever toward NORMAL)

Best position. ○

Not enough Hop-Up. (Move the lever toward HOP)

CAUTION

Never hold the gun sideways as the BB pellets will curve right or left. This is due to the Hop-Up system.

After Operation

After removing the magazine, direct the muzzle towards a safe direction and fire the gun a few times in semi-auto. Set the selector to the safe position.

Always disconnect the battery and attach the protective cap whenever you do not operate the air gun.

Motor and Battery Precautions

Charge the battery if the firing cycle becomes slow. Give the air gun a rest of 5-10 minutes after firing around 500 rounds in order to ensure a longer life span of the motor and battery.

When Bullets Are Clogged

If bullets are clogged remove the clogged bullets and apply a few drops of G&G silicone oil into the chamber from the magazine entrance. Apply the G&G silicone oil for 0.5 to 1 sec, to obtain smooth continuous firing.

CAUTION

Make sure no dirt gets into the chamber to avoid clogging of bullets. The hopping up operation may be unstable for 200 to 300 rounds after using silicone oil, this is the normal operation to the gun.

! Never use CRC-556, WD40 or other corrosive lubricants.

TROUBLESHOOTING

SYMPTOM	POTENTIAL	CORRECTIVE
No operation at all	Selector lever is set to safety.	Set the selector lever to Semi or Full Auto.
	Battery is not charged.	Charge the battery.
	Battery connector is disconnected.	Connect the connector.
Although motor is revolving, no pellet can be fired	The + and - of battery connector is reversed.	Reverse the battery connector to the correct spots.
	Expired motor life (50,000 to 60,000 rounds) or poor electrical connection.	Replace the dead motor (can be purchased from local dealer or directly from G&G). Check and repair the contacts.
Impossible full-auto operation(automatic firing)	Pellets are clogged inside the magazine.	Insert the charging rod into the magazine and move up and down a few times to remove clogged pellets.
	Pellets are clogged in the chamber.	Remove clogged pellets using the cleaning rod.
Shooting distance becomes shorter	Faulty gear.	Purchase the replacement gear from your dealer or G&G and repair.
	Insufficient battery power.	Charge the battery.
Too loud operating noise	Faulty pellet feed of magazine.	Repair clogging of the magazine.
	Poor electrical connection.	Consult your local dealer or G&G for overhaul maintenance repair.
Pellets being fallen out from barrel end	Damaged or worn chamber set.	Replace the replacement parts(Purchase from your local dealer or G&G)
	Damaged or worn piston set (O-ring,piston spring)	Use the cleaning rod and clean the inner barrel.
If gun gets wet	Something is jammed in the inner barrel	Use genuine G&G Pellets.
	Faulty BB pellets (too small or heavy)	Place a few drops of silicone oil from upper the chamber.
Pellets being fallen out from barrel end	Shortage of silicone oil	Consult your local dealer or G&G for overhaul maintenance, part replacement (gear,etc.) or repair.
	Gear problem caused by too many blank firing	Turn the hop adjustment lever toward Hop.
If gun gets wet	Worn or damaged gear	Consult your local dealer or G&G for the correct BB pellet size
	Gear problem caused by too many blank firing	
Pellets being fallen out from barrel end	Damaged or worn chamber set.	
	No hop setting.	
If gun gets wet	Faulty BB Pellets (too small or heavy)	

DISCLAIMER

- Accessories shown in the pictures are not always included with the product.
- Adult supervision required for users under 18 years of age.
- The purchaser and user should conform to all laws governing the ownership of airsoft guns.
- All products in this manual are imitation firearms and are not intended nor represented to be comparable in design, appearance, or function to any actual firearm offered by other manufacturers.
- Product names are trademarks of G&G, which has no affiliation to, and is not associated, or sponsored by any manufacturer of actual or imitation firearms. Products may vary from the pictures.

CAUTION When a problem occurs, please check the steps above. If any other problems occur, please contact your local dealer or G&G.
