WARNING

THIS PRODUCT IS NOT INTENDED FOR USE BY UNTRAINED PERSONS (INCLUDING CHILDREN) WITH OR WITHOUT PHYSICAL OR MENTAL HANDICAPS. THESE HANDICAPS INCLUDE REDUCED PHYSICAL, SENSORY OR MENTAL CAPABILITIES, OR LACK OF EXPERIENCE AND KNOWLEDGE OF THE PRODUCT AND SAFETY GUIDELINES. ALL USERS SHOULD HAVE TRAINED SUPERVISION OR INSTRUCTIONS CONCERNING THE USE OF THE APPLIANCE BY A PERSON RESPONSIBLE FOR HIS OR HER SAFETY.

SAFETY RULES

Please read the entire KRYTAC manual before operating the airsoft gun. This manual covers important safety, operational, and maintenance topics. It is important that the user reads and understands the manual in order to safely handle and operate the airsoft gun. Failure to follow the safety guidelines and operational instructions in this manual may result in serious personal injury or damage to the airsoft gun.

Safety Guidelines

EYE PROTECTION

Always wear eye protection while shooting, operating, and maintaining your airsoft guns.

FIREARM SAFETY RULES

Always assume that the airsoft gun is loaded. Never assume the chamber is empty based on memory or from someone else's word. An airsoft gun can still fire with the magazine removed.

KEEP YOUR FINGER OFF THE TRIGGER

Remove your finger from the inside of the trigger guard until your sights are aligned on target and you are ready to fire.

MUZZLE CONTROL

Always keep the muzzle of the airsoft gun pointed in a safe direction. Never point the airsoft gun towards anything you do not intend to shoot.

KNOW YOUR TARGET AND ITS SURROUNDINGS (SAFETY DISTANCE)

Take note of objects in front of and beyond your target. Airsoft guns can shoot up to and beyond 150 feet/45 meter and may travel further than intended without an adequate backstop. Never shoot an airsoft gun directly at targets such as rocks, glass, water, or other hard surfaces that may ricochet BBs in unpredictable directions.

WARNING

SAFETY IS YOUR RESPONSIBILITY

The KRYTAC airsoft gun is designed and manufactured to KRYTAC's high standards. It was carefully inspected before it was packaged and shipped from our factory. It is the sole responsibility of the user for its safe use and handling. This airsoft gun is safe unless handled irresponsibly or misused.

BEWARE OF BARREL OBSTRUCTIONS

Ensure that the barrel of your airsoft gun is free and clear of any obstructions prior to firing the airsoft gun. Failure to do so may cause a malfunction, and in some cases damage the airsoft gun.

KEEP THE SAFETY ON

Keep the fire selector set to safe until your sights are aligned on target and you are ready to fire.

SAFETY RULES

FAILURE TO FIRE

If the airsoft gun fails to fire, misfires, or malfunctions, do not look into/down the barrel of the airsoft gun. BBs can jam in the chamber and can launch suddenly while under pressure causing serious injury.

FUSE

DO NOT REMOVE OR BYPASS THE FUSE. It is an integral part of the system, alterations to the fuse will void warranty and may result in operational failure and critical damage to internal components.

MAINTAIN YOUR AIRSOFT GUN PROPERLY

Maintaining your airsoft gun as outlined in the manual ensures that your airsoft gun will be safe to shoot and perform to its designed specifications. Alterations, modifications, or adjustments may damage your airsoft gun, making it unsafe to shoot and/or voiding all warranty claims.

STORAGE AND TRANSPORT

Keep the fire selector on the airsoft gun set to safe, with the magazine and battery removed when storing your airsoft gun. Always store your airsoft gun in a safe place and out of the reach of children. When transporting your airsoft gun make sure that it is in a designated airsoft gun case. Never brandish your airsoft gun in public.

WARNING

IT IS YOUR RESPONSIBILITY TO SAFELY STORE AND TRANSPORT YOUR AIRSOFT GUN.

ORANGE TIP

Any alteration of the coloration or markings required by state and/or federal law may be deemed illegal in the court of law. All risks and responsibility of any alteration to the product will be assumed by the operators, owners and/or user of the product.

WARNING

THE ORANGE TIP DOES NOT DISTINGUISH YOUR AIRSOFT GUN AS A TOY, ALWAYS TREAT YOUR AIRSOFT GUN AS IF IT IS A REAL FIREARM.

HAZARDS OF BEING MISTAKEN FOR A REAL FIREARM

Due to the nature and design of some airsoft guns, they may be mistaken as a real firearm. It is strongly advised to operate an airsoft gun in the safety and privacy of your own home, or at a legally sanctioned location or game field. Police, Peace Officers, and Law Enforcement Officers are trained to treat objects that resemble a firearm as one. In the event that you are approached by a Law Enforcement Official, completely comply with their instructions. Never point an airsoft gun at a Law Enforcement Official. Confrontation with a Law Enforcement Official may result in serious injury or death.

ALCOHOL, MEDICATIONS AND DRUGS

Do not handle or operate your airsoft gun while under the influence of alcohol, medication, or drugs that may impair judgment.

SPECIFICATIONS

ALPHA SDP

Overall Length	480 mm (19") - 565 mm (22.25")
Overall Height	180 mm (7")
Weight	2.4 kg (5.3 lbs)
Outer Barrel Length	140 mm (5.5")
Inner Barrel Length	143 mm
Inner Barrel Diameter	6.05 mm

CALIBER
6 MM

MECHBOX

Krytac Trident Mechbox
with 8 mm Bearing

RATE OF FIRE
18+ RPS

PERFORMANCE DETAILS ARE BASED ON U.S. SPECIFICATIONS AND CAN BE MODIFIED TO MEET THE LAWS AND REGULATIONS OF YOUR LOCAL REGION.

PRODUCT FEATURES

KRYTAC metal alloy receivers

KRYTAC aluminum hand guard

Two-position compact carbine stock

MIL-STD 1913 Picatinny top rail

Ambidextrous fire selector

Locking bolt and bolt release

Sling attachment loop

Integrated FET system

Easy maintenance spring guide

Padded cylinder head

Relief-cut cylinder window

Anti-corrosion mechbox coating

Adjustable rotary Hop-Up

Temperature and wear resistant hop-up bucking

KRYTAC 20K motor

METER PER SECOND (MPS) DIAGRAM

Please check the chart below to see what the maximum velocity is for your region. If your region requires you to adjust your airsoft gun's velocity, please see Main Spring Access section for instruction.

PACKAGE CONTENTS

[1] ALPHA SDP airsoft gun
[1] Magazine

[1] User's manual
[1] Cleaning rod

LOADING THE MAGAZINE

High-Cap

1. Place the hi-cap magazine with the trap door (A) facing upward. Open the trap door and dispense BBs into the BB well.
2. When full, close the trap door and turn the winding wheel (B) forward until the 'clicking' changes tone.

WARNING

DO NOT OVER LOAD THE MAGAZINE

Mid-Cap

1. Using a speed loader or other magazine loader, insert the nozzle into the opening of the magazine.
2. Press down on the loader plunger to load BBs into the magazine.
3. Stop once the magazine is full, do not force more into the magazine.

FIRE SELECTOR SWITCH

SAFE MODE

When in safe mode, the trigger will not engage and the airsoft gun will not fire.

SEMI-AUTO MODE

While in semi-auto mode, the airsoft gun will only fire one shot for each time the trigger is engaged.

FULL-AUTO MODE

In full-auto mode, the gun will continuously fire as long as the trigger remains engaged.

SAFETY TIP

It is advised when you are not ready to fire, keep the fire selector switch on the airsoft gun in the safe position.

WARNING

DO NOT ENGAGE THE TRIGGER WHILE SWITCHING BETWEEN MODES ON THE FIRE SELECTOR.

BATTERY INSTALLATION

WARNING

ENSURE THAT THE STOCK IS IN THE FULLY EXTENDED POSITION BEFORE OPENING THE STOCK COVER. DO NOT REMOVE THE STOCK COMPLETELY FROM THE GUN.

1. Extend the retractable stock (A) and remove the allen screw (B) from the stock cap (C) using a 2.5mm allen key (D).
2. Remove the stock cap (C).
3. Connect a small battery (E) to the connector.
4. Curl the connection wires against the side of the battery and insert together into the stock.
5. Replace the stock cap and secure with the allen screw using the 2.5mm allen key.

HOP-UP SYSTEM

The advanced KRYTAC rotary Hop-Up unit is a standard feature in the Trident series AEGs. Proper adjustment of the Hop-Up will allow the AEGs to fire in a variety of shooting environments to obtain optimal BB trajectory.

Hop-Up Adjustment

1. Pull the charging handle (A) rearward locking the bolt plate (B). This will provide access to the Hop-Up adjustment dial (C).
2. Turn the dial up or down, an audible click will confirm each adjustment.
3. Increasing the number on the dial will increase the amount of Hop-Up on the BB. Decreasing the number will lower the amount of Hop-Up on the BB.
4. Once the Hop-Up has been set, depress the bolt catch release (D) to return the bolt plate back to its fully seated position.

HOP-UP SYSTEM

Excessive Hop-Up

Airsoft BB travels in an extreme upward trajectory. Decrease the Hop-Up.

Ideal Hop-Up

Airsoft BB travels in a long, horizontal flight path.

Insufficient Hop-Up

Airsoft BB travels a short distance in a downward trajectory. Increase the Hop-Up.

CLEARING JAMMED BBS

1. Disassemble the airsoft gun and remove the inner barrel assembly (A). (see pg.11 for disassembly instruction).
2. Lift the Hop-up lever (B) from the inner barrel assembly (refer to step 3 of pg.16).
3. Take the cleaning rod (C) and insert the unjamming side from the front of the barrel through to the rear to clear out the jammed BB.
4. Look through the barrel to ensure that it is cleared.
5. Reassemble the airsoft gun. (see pg.12 for assembly instruction).

NOTE

Use only new, quality airsoft BBs. Never use recycled or low quality airsoft BBs, doing so may cause excessive jamming. In most cases, it can severely damage the internal gearbox and/or Hop-Up and inner barrel.

DISASSEMBLY

NOTE

Before opening up the receiver, remove the magazine and fire the airsoft gun in a safe direction to ensure that the Hop-Up chamber is clear of any BBs.

1. Set the fire select switch to safe mode.
2. Disconnect and remove the battery (see Battery section for instruction).
3. Pull the charging handle rearward to lock the bolt plate back.
4. Remove **ONLY** the front pin **(A)** from the receiver.
5. Slide the upper receiver forward and away from the lower receiver.

NOTE

The bolt catch lever **(B)** may fall off of the lower receiver when separating the receivers. Avoid turning or jostling the lower receiver to help prevent loss of the bolt catch lever.

DISASSEMBLY

6. Slide the Hop-Up and inner barrel assembly **C** out of the upper receiver.

ASSEMBLY

1. Insert the Hop-Up and inner barrel assembly into the upper receiver.
2. Ensure that the bolt catch lever is in place, then slide the upper receiver back onto the lower receiver.
3. Reinstall and secure the front body pin.

MAIN SPRING ACCESS

WARNING

PLEASE REVIEW THE WARRANTY CARD INFORMATION BEFORE OPENING AND/OR MODIFYING THE KRYTAC AIRSOFT GUN.

1. Disassemble the airsoft gun. (see pg.11 for disassembly instructions).
2. Remove the bolt release button **A**.

3. Use a 2.5 mm hex key to remove the 2 screws **B** at the bottom of the compact carbine stock **C**.
4. Remove the compact carbine stock **C**.
5. Use a Phillip (P3) screw driver to remove screw **D** from inside the buffer tube **E**.
6. Remove the buffer tube **E**.
7. Remove the sling plate **F**.

MAIN SPRING ACCESS

8. Remove the screw **G** from the magazine release button **H** using a Phillip screw driver, then remove the magazine release button **H**.
9. Use a Phillips screw driver to remove 2 screws **I** on the bottom of the motor plate **J** then remove the motor plate.
10. Disconnect the motor wires **K** and remove the motor **L**.
11. Remove 2 Phillips screws **M** at the top of the motor grip interior, then remove the motor grip **N**.

NOTE

Take note of the wire and motor orientation before disconnecting.

12. Remove the right side selector switch **O** using a 1.5 mm hex key.

MAIN SPRING ACCESS

13. Use a 2.5 mm hex key to remove the rear receiver pin screw (P) then press the rear receiver pin (Q) in and remove it from the other side of the airsoft gun.

14. Use a 2.5 mm punch (R) and press the body pin (S) in and remove it from the other side of the airsoft gun.

15. Move the selector switch (T) half way between safe mode and semi-automatic mode then slide the gearbox (U) out of the lower receiver.

16. Use a 8 mm hex key (V), push the spring guide (W) into the gearbox, turn 90° counter clockwise then pull the spring guide and spring (X) out.

NOTE

Spring guide is under extreme pressure. Remove with caution.

17. Re-insert spring guide with desired spring into gear box. Follow steps in reverse order to reassemble the airsoft gun.

CLEANING AND MAINTENANCE

NOTE

WHILE POINTING THE AIRSOFT GUN IN A SAFE DIRECTION, REMOVE THE MAGAZINE AND CYCLE THE GEARBOX UNTIL NO BBS EXIT THE INNER BARREL. PLACE THE AIRSOFT GUN IN SAFE MODE AND DISCONNECT THE BATTERY PRIOR TO ANY CLEANING PROCEDURES.

1. Wipe down the external parts of the gun and remove any dirt and debris.
2. Disassemble the airsoft gun as described in the Disassembly section and pull out the barrel and Hop-Up assembly (A).
3. Pull back on the Hop-Up adjustment wheel (B) and lift the Hop-Up adjustment lever (C) up.
4. Take a lint-free cleaning patch (D) and place it through the looped end of the cleaning rod (E).

WARNING

DO NOT ADD OIL TO THE HOP-UP BUCKING. EXCESSIVE OIL ON THE HOP-UP BUCKING MAY NEGATE THE HOP-UP, DECREASING RANGE AND ACCURACY.

CLEANING AND MAINTENANCE

5. Run the cleaning rod through the barrel from back to front (in the same direction that BBs travel).

WARNING

KEEP TRACK OF THE BARREL SPRING (F), IT CAN SEPARATE FROM THE BARREL ASSEMBLY.

6. Pull back on the Hop-Up adjustment wheel and lower the Hop-Up adjustment lever back into position.

7. Reinsert the Hop-Up barrel assembly into the receiver and reassemble as described in the Assembly section.

OPERATING UNDER HARSH CONDITIONS

When operating under harsh conditions, special maintenance may be required to match the climate conditions of a specific operational area.

Dust and sand

In harsh dusty or sandy environments, excessive debris can cause malfunctions and/or excessive wear on parts. Keep the gun covered and protected while not in use. When performing maintenance, use lubrication sparingly as it tends to attract dirt and other particles. After use in a dusty or sandy area, always field strip the gun, as outlined in the Disassembly section, cleaning all the areas that can be reached with a soft, clean, lint-free cloth.

Heavy rain

Never submerge or expose your gun to extremely wet environments. Exposure to such conditions may cause electrical failure and fluid to build-up inside the gearbox. Dry completely with a clean, lint-free cloth and clean inner barrel when necessary.

TROUBLE SHOOTING GUIDE

WARNING

WHEN TROUBLESHOOTING, FOLLOW THE SAFETY MEASURES DESCRIBED IN THIS MANUAL.

SYMPTOMS	CAUSE	SOLUTIONS
Not firing/No sound	Safety is engaged	Change selector to Semi Auto or Full Automatic Mode
	Low power or dead battery	Charge and replace battery
	Blown out fuse	Replace with new fuse
	Loose connection	Contact customer service for professional care
Motor is running but not firing	Inspect magazine	Check if magazine is properly loaded into the gun Ensure magazine is loaded with ammunition Ensure the hi-cap magazine is properly wound
Motor or battery is hot after short use	Damaged battery	Inspect and/or replace battery
	Loose connection terminal	Contact customer service for professional care
Semi-Auto feature not functioning properly	Battery voltage or discharge is too high	Condition or replace battery
Semi-Auto feature not working at all	Disconnecter is not engaged properly	Reset the disconnecter by setting the selector to safe, then to automatic, then to semi
Firing cycle slowing down	Battery is low on power	Charge or replace battery
High pitch or grinding noise	Motor level is not adjusted properly	Contact customer service for professional care
BB travels upward	Hop-Up adjusted too high	Dial down the Hop-Up adjustment
BB travels downward	Hop-Up adjusted too low	Dial up the Hop-Up adjustment
BB double feeding or rolling out of the barrel	Excessive grease or oil in the hopup chamber	Fire at least 200 rounds to eliminate excessive grease from the chamber Clean Hop-Up unit with supplied cleaning rod
	Hop-Up unit is turned off	Turn Hop-Up unit on
Hop-Up unit can't be adjusted	Hop-Up adjustment arm is not set properly	Reset Hop-Up adjustment arm (See page 17, step. 6 for reassembly)
Inner barrel is jammed or jamming	Use of recycled or low quality BBs	Use only KRYTAC branded or other high quality BBs
	Inner Barrel is contaminated with BBs or debris	Clear and/or clean inner barrel with supplied cleaning rod (See page 10 for clearing jam section and page 16 for cleaning and maintenance section)
Hi-Cap magazine not feeding	Magazine has not been wound	Wind wheel underneath magazine
	BBs are lodged inside the magazine	Shake or tap magazine to clear the jam
	Internal obstruction	Contact customer service for professional care
