MAGAZINE

Fill the loading pipe with the appropriate 6 mm plastic BBs. Works best with Cybergun's BBs 0.20 g (item# 71100). Also compatible with Cybergun BBs 0.12 g (item# 71102).

Fit the end of the loading pipe to the top of the magazine. It should adjust tightly. Using the rod provided, gently push all the BBs into the magazine.

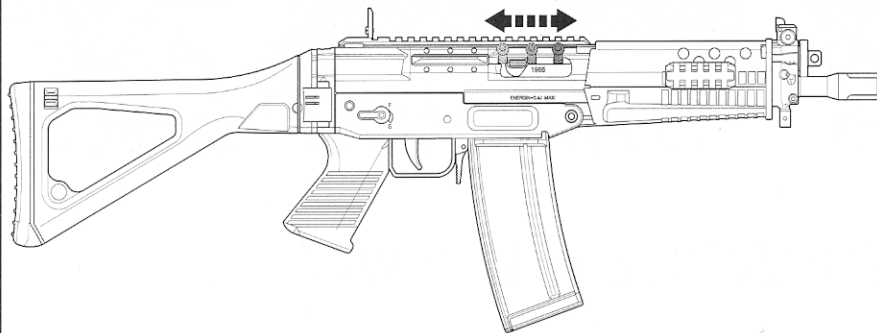

To slide the magazine in the receptacle : first, introduce the front part of the magazine (1) and then introduce the back part of the magazine (2) until it is locked. A distinct click is heard when the magazine is fully entered

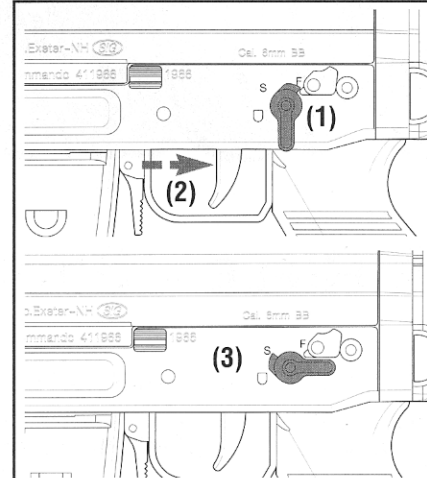

To release the magazine, push on the lock located behind the magazine (1) and slide the magazine out of the rifle (2). Make sure the rifle is stored empty of any ammunition, magazine removed, and safety on.

HOW TO USE

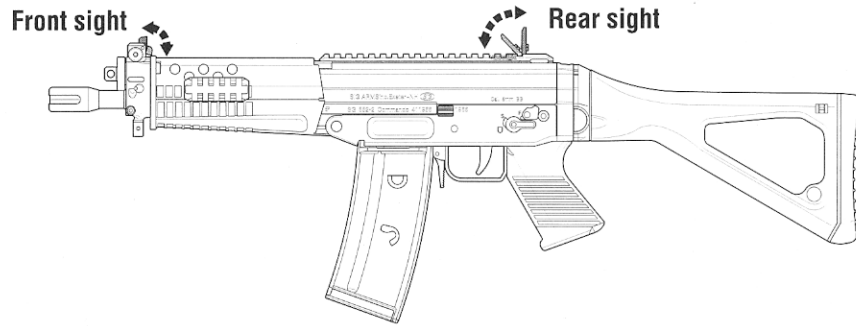

In order to load the chamber, pull firmly the loading handle back until a click is heard, then release. At this stage, your softair rifle is loaded. All safety rules must apply among which: do not aim at a person or a hard surface.

SAFETY DEVICE

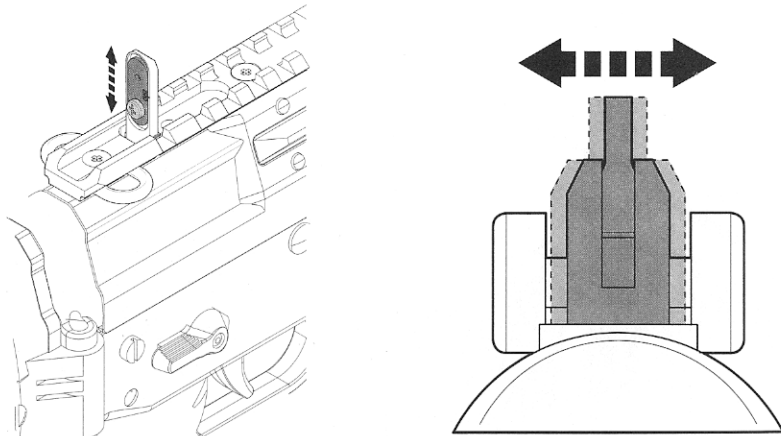

To start shooting, aim at a target, put the safety on the "F" position (1) (this rifle is a single shot action and requires loading after each shot). Pull the trigger (2). Once finished shooting, put the shooting selector back on the "S" safe position (3).

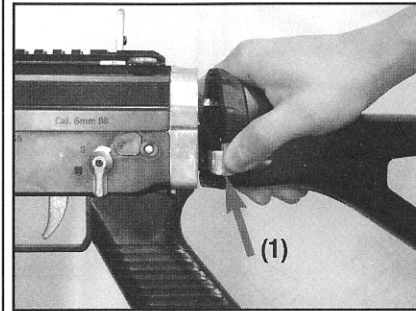

AIMING

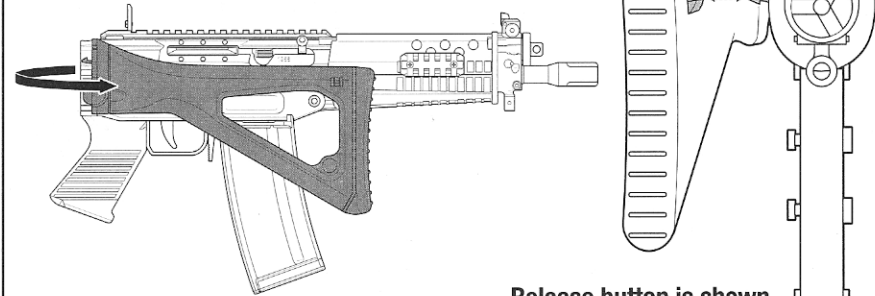

Adjust rear sight on front sight with the proposed set-up.

FOLDABLE STOCK

The stock is foldable. Press on the button (1) and revolve the stock as shown on the picture.

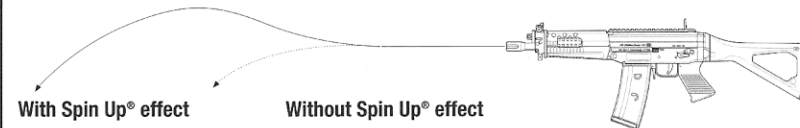

SIG 552 with the folded stock.

Release button is shown on the above drawing.

SPIN UP® SYSTEM

This is a way to extend a range of air gun and when a BB pellet goes through the knob on upper part of chamber, it gives the BB pellet a upward spin to extend its flying range. This Spin Up® effect depends on the structure and materiel of chamber and CYBERGUN have the one made of special soft rubber for much better effect.

Spin Up® chamber
