Bullet with burry 表面有溢料(毛邊)的

Reuse of dirty bullet 太髒的

Q & A

Q : What is the **Hop Up** System ?

A : The **Hop Up** System is a new design that gives backspins to the flying BB bullet, propelling it forward with greater stability horizontally for 50% longer distance than the conventional BB guns and resulting in much higher shooting accuracy.

Q : How do I tell the effect of the **Hop Up** System ?

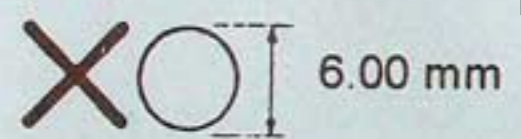

A : A bullet shot from a BB gun with the **Hop Up** System should hit the target straight on horizontally. The bullet will not stray upward, downward or sideways right before losing its speed.

Q : Why are UHC 0.12g / 0.2g BB bullets recommended for use with the **Hop Up** System by the UHC ?

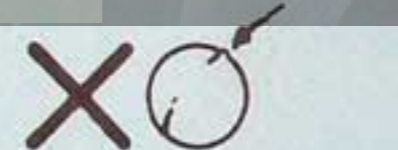

A : The design and construction of **Hop Up** System relies on BB bullets of exact and accurate dimensions in order to produce optimal results. UHC **Hop Up** System is specifically spec-ed to use UHC 0.12g / 0.2g BB bullets. BB bullets of any other brand will not achieve the same level of effects.

** Following BB bullets are not allowed to use :

Bullet dia. Size larger over 6mm.

Bullet center is not coincide.

Bullet with burs.

Reuse of dirty bullet.

****Please use correct BB bullets by referring user's manual****
