You should be fully familiar with the proper and safe handling of your airsoft gun. The basic principles of gun safety require you to always apply the following rules when handling an airsoft gun.

- Always handle any gun as if it were loaded.
- Always put the safety of the gun "ON SAFE" when loading it so that there can be no risk of an unintentional discharge.
- Always keep your finger off the trigger and out of the trigger guard until ready to shoot.
- Only use the kind of projectiles specified for your gun.
- Always keep the muzzle pointed in a safe direction.
- Never transport a loaded gun. Only load your gun when you intend to fire it.
- Avoid ricochets. Never fire at smooth, hard surfaces or water.
- Before you discharge your gun, make sure that the target and surrounding area are safe.
- Make sure that you always have full control over the muzzle of your gun, even if you stumble or fall down.
- Safety shooting glasses should always be worn when firing any gun. Shooting glasses must be worn over normal reading glasses.
- Always store your gun in a safe place and in unloaded condition. Unauthorized persons (persons not familiar with the use of guns, children and minors) must not have access to it, ammunition is to be kept in a separate place.
- The gun together with its operating instructions may only be handed over to persons who have reached the age of 18 (or older) and who are fully familiar with the handling of it.
- Modifications or repairs of guns should only be performed by an authorized Umarex USA gunsmith.
- Never leave a loaded gun unattended.
- Only unloaded guns are to be handed over to another person.
- Make sure the gun is unloaded when getting it from storage or from another person.

FIRE

SAFE

⚠ DANGER: FIRE AND EXPLOSION HAZARD

CONTAINS FLAMMABLE GAS UNDER PRESSURE. WILL BE EASILY IGNITED BY HEAT, SPARKS OR FLAMES. BURNING GAS CAN MAKE CARBON MONOXIDE (CO). CO (CARBON MONOXIDE) IS INVISIBLE, HAS NO SMELL, AND IS LETHAL. GAS CAN MAY EXPLODE WHEN HEATED. RUPTURED GAS CAN MAY ROCKET.

⚠ IMPORTANT:

To reduce chance of fire or explosion:

- Always check gas can and charging adapter valve seal. Do not use if gas can has any unusual dent or rust and/or seal is loose.
- Attach charging adapter outdoors, away from flames or sparks or any other source that could ignite gas.
- Check for leaks in one or more of these ways: Apply soapy water to all connections. LOOK for bubbles, LISTEN for hiss of escaping gas, FEEL for extreme cold, and SMELL for rotten egg odor. If leaking is found, do not use.

⚠ IMPORTANT:

TO USE GREEN GAS:

- Invert gas can and make sure charging adapter is perpendicular to the valve stem of airsoft gun gas reservoir.
- Push can firmly for two or three seconds, pause, repeat. Reservoir is full when you see a little bit of liquid exit the valve.
- For best performance, after charging, allow airsoft gun gas reservoir to reach room temperature before use.

NOTE: Valve misalignment will cause excessive gas leak when charging gas and may result in an inadequate charge.

GREEN GAS HANDLING & STORAGE:

- Keep out of reach of children.
- Do not expose to heat, sparks, or flame.
- Do not leave in direct sunlight.
- Do not store at temperatures above 120°F or below 32°F.
- Never store in living spaces.
- Never refill a green gas canister. Refilling may cause explosion.
- Never put into luggage or take on trains or aircraft.
- Never put in fire or incinerator.
- Do not puncture.
