

NEW Z-TACTICAL[®] ZSORDIN HEADSET

⚠ WARNING

The output of the level-dependent circuit of this hearing protection may exceed the external sound level. The output of the electrical audio circuit of this hearing protector may exceed the daily limit sound level.

IMPORTANT!

For the best protection, brush aside hair around the ears so the ear cushions fit snugly against the head. Spectacle frames should be as thin as possible and fit close to the head.

Peaksounds

Digital electronic sound reproduction for excellent sound reproduction. Excellent sound quality with perfect location hearing, up to 4 times amplification, it can be used as a bug to hear the whispers of the enemy [indoor], just like a spy.

Noise prevent

Special material of foam cushions in each earcup provides excellent reproduction of ambient sounds. You can clearly hear radio communication even in extreme conditions.

Communication

Noise reduction rating of 18 dB, you can clearly communicate with your colleagues even when others are shooting. Excellent compatible with Ztac's PTT series.

Active hearing protector

We all know that a shooter has to protect his ears to prevent long-term hearing damage. To solve this issue, it's Ztac's duty. Our electronics component will instantaneously suppress harmful impact noises to 82dB inside the earcups.

OPERATION MANUAL

1. Open the headband.

2. Slide out the cups.

3. Adjust the height of the cups while pressing the headband up or down.

Battery installation

The first battery negative is put into the headset, then the second positive is put into the headset. You can tighten the battery cover.
