future innovation

G&G always brings you the most innovative product. We do not only make replicas of real steels, but also push our R&D to develop more features and ergonomic designs to meet a variety of demands from end users.

Finest quality

G&G offers industry leading manufacturer warranty coverage of up to 90 days from the date of purchase. We stand behind our product quality and test every single rifle before shipping.

Fast service

We have dedicated professional employees working on end user e-mails and dealer inquiries. We have personnel and professionals working daily to ensure all inquiries are responded to in a timely manner. Most warranty claims are dealt with within 24 hours by our customer support department.

Free items

G&G offers the most variety of free items for our customers, and we continue to release new giveaways frequently. We always offer a variety of promotional materials for events and sponsorship to help and support the Airsoft community.

Fair price

Customer satisfaction is the main motive for G&G. Our products offer the best value to our customers, and we never cut corners to build our products.

JOIN US TO WIN A FREE TRIP TO TAIWAN

Every G&G Airsoft gun comes with an official G&G gun tag. On the back of the tag, you will find two sets of numbers, a serial number and an authentication code covered up by silver paint. Scratch off the silver paint and register both numbers to enter and win a free trip to Taiwan!

Grip for CNC GBB Airsoft Guns
Manufactured as real fire arm for military or law enforcement training program

CNC Gas Blow Back Airsoft Gun

G&G GAR 15 Carbine follows the same manufacturing procedure as its real counterpart. The material of the receiver is CNC machined 6061 alloy with hard anodize Mil-A8025E Type-III after finish. The dimensions of this rifle are carefully manufactured so RIS can fit on real AR without problems. The larger bolt in this rifle creates a stronger recoil than other GBB rifles in the market, making this replica the best choice in both handling and operating for military or law enforcement training programs.

GM1891

The Mosin-Nagant (Russian: Винтовка Мосина) is a bolt-action, internal magazine-fed, military rifle, developed by the Imperial Russian Army in 1882-1891, and used by the armed forces of the Russian Empire, the Soviet Union and various other nations. The 3-line rifle, Model 1891, its original official designation, was adopted by the Russian Military in 1891. There have been several variations from the original rifle, the most common being the M1891/30, which was a modernized design introduced in 1930. Some details were borrowed from Nagant's design. One such detail is the attachment of the magazine spring to the magazine base plate. In Mosin's original design the spring was not attached to the base plate and, according to the Commission, could be lost during cleaning. Another detail is the form of the clip that could hold five cartridges to be loaded simultaneously into the magazine. Model 1891/30 (винтовка образца 1891/30-го года, винтовка Мосина): The most prolific version of the Mosin-Nagant. It was produced for standard issue to all Soviet infantry from 1930 to 1945. Most Dragoon rifles were also converted to the M1891/30 standard. It was commonly used as a sniper rifle in World War II.

M.E.T. Unit Ver.2

- M.E.T can be linked up to **25 targets** and operated grouped targets from the master target without the console device. However, if Player links the M.E.T with **G&G console device**, it will display and store the shooting records. Also feature additional playing modes.
- M.E.T is powered by a **power bank** or **power cable with USB adapter**.
- There is **no angle limit** (horizontal / vertical) when you use the M.E.T
- M.E.T has **4 Built-in LEDs** with **duo-colors** for better indication.

ISO 9001 is an international standard for companies that meet quality controls standards for management and manufacture.

G&G Armament is the ONLY Airsoft manufacturer to hold this certificate.

ISO 9001 means:

- The quality policy is a formal statement from management, closely linked to the business and marketing plan and to customer needs.
- The quality policy is understood and followed at all levels and by all employees. Each employee works towards measurable objectives.
- The business makes decisions about the quality system based on recorded data.
- The quality system is regularly audited and evaluated for conformance and effectiveness.
- Records show how and where raw materials and products were processed to allow products and problems to be traced to the source.
- The business determines customer requirements.
- The business has created systems for communicating with customers about product information, inquiries, contracts, orders, feedback, and complaints.
- When developing new products, the business plans the stages of development, with appropriate testing at each stage. It tests and documents whether the product meets design requirements, regulatory requirements, and user needs.
- The business regularly reviews performance through internal audits and meetings. The business determines whether the quality system is working and what improvements can be made. It has a documented procedure for internal audits.
- The business deals with past problems and potential problems. It keeps records of these activities and the resulting decisions, and monitors their effectiveness.
- The business has documented procedures for addressing actual and potential nonconformance (problems involving suppliers, customers, or internal problems).
- The business:
 1. Makes sure no one uses a bad product.
 2. Determines what to do with a bad product.
 3. Deals with the root cause of problems, and
 4. Keeps records to use as a tool to improve the system.

G&G ARMAMENT

Established in 1986, G&G has accumulated over two decades of experience in the manufacture and design of airsoft guns, action figures, and military/ law enforcement equipment for airsoft players and military enthusiasts all over the world.

G&G has rearranged its new line up starting in the year 2011.

The two major subsidiaries under our tag are: GT and GC; the other ones are Mustang Outdoor and Tactical Gear.

OUR SERVICE

In addition to the design and manufacture of high quality airsoft guns, G&G also offers O EM and O DM services for airsoft and firearms manufacturers. We supply a wide variety of replacement components to our distributors as well as dealers.

G&G is committed to the best service support for our customers. We have a dedicated service for order repair parts. We also provide a step-by-step instructional video on our official website (www.Guay2.com) for our customers to facilitate the service of our products.

OUR COMMITMENT

G&G is constantly researching new ways to innovate designs and materials to ensure the best quality of our products. All G&G products are designed and built with computer assisted design tools, such as the Computer Numerical Control (CNC) turning operation to ensure high precision and quality.

G&G values the customers feedback, as we incorporate improvements and upgrades to our future products. All G&G products are proudly made in Taiwan.

It is G&G's vision that our customers can enjoy the best experience while using our product, and we strive in delivering the best quality products, as we believe it is the key to success.

For more inquiries or information on our products and services, as well as any questions or comments, please refer to our website.

TAIWAN

Dear Valued Customer,
Thank you for purchasing G&G Armament product. We strive to provide the ultimate airsoft experience.

We are always looking for new ways to improve quality and satisfaction and we welcome any feedback from our customers.

Purchase a G&G replica rifle from any authorized G&G retail store and register the numbers on the back of the gun tag to G&G website. One "lucky draw" winner will win a G&G product each month.

Moreover, there will be another random draw from the submissions received for special prize!

Thank you for choosing G&G.

FREE TRIP TO TAIWAN

Every G&G Airsoft gun comes with an official G&G gun tag. On the back of the tag, you will find two sets of numbers, a serial number and an authentication code covered up by silver paint. Scratch off the silver paint and register both numbers to enter and win a free trip to Taiwan!

Visit www.Guay2.com/3t and enter following information.

- Product Name
- Invoice Number
- Purchased Date
- Purchased Location
- Purchased Store
- Store Website
- Tag Serial Number
- Authentication Code

WARNING

- All products employ a high precision 6.04mm barrel. It is highly recommended to use the 5.95mm precision BB pellets.
- Damage to the product due by faulty BB pellets voids the warranty. Use with caution.
- The buyer and the user of this product shall adhere to all local laws regulating the usage and the ownership of airsoft guns.
- Misuse or careless handling of this product may cause injury.
- Always wear safety goggles when using this product.
- This product is intended for users 18 years or older.
- Read all instructions before using this product.
- May be hazardous up to 50 meters.
- Adult supervision required.

Image Supplier :
| Blow Yourself 2012 "Selected Price"
Mamedis Roman / Liberate

Never direct the muzzle towards a person, animal, or in any direction that may cause harm or damage to a third party.

When you carry the air gun, attach the safety cap, set the selector lever to the safety position, and always put the air gun in a case or bag.

Disassembling or modifying the gun may adversely affect the performance and make it dangerous. It may be against the Law.

Always attach the safety cap to the muzzle, remove the battery, and store the air gun in a case or bag and at a place that is out of reach of children.

When shooting the air guns for target practice or in a game situation, you and all participants must wear safety goggles or other eye protective gear. Also, pay attention to ricochets and third parties other than the participants.

Make sure to put the barrel and safety cap on the muzzle except when you are shooting. Do this to prevent accidental discharge of BB's and also for dust protection purposes. Never pull the trigger while the barrel and safety cap are attached.

Activating the trigger carelessly is extremely dangerous, regardless. Never put your finger on the trigger unless the safety cap is removed and you are ready to shoot a target.

Looking into the muzzle is extremely dangerous, regardless. If BB's have been loaded or not. If you get hit in the eye by a BB pellet, worst case scenario, you may lose your eye sight.

You may be liable for damaging public or personal property or for injuring a person or an animal. Always observe good manners and enjoy fun sport shooting.

Safety procedures :
1. Attach the safety cap to the muzzle.
2. Set the selector lever to the safety position.
3. Remove the magazine.
4. Remove the battery.

AEG Blow Back System

In order to simulate the bolt action of a real firearm, G&G is proud to present its new Pneumatic Blow Back system to its line of airsoft guns.

Conventional airsoft blow back utilizes tow hook springs that connect to the piston head and bolt plate to simulate bolt action, which often lead to excess wear and tear and poor reliability in the gear box. To alleviate the problem of conventional systems, G&G has independently developed the Pneumatic Blow Back system for a better solution on simulating bolt actions.

This new technology utilizes compressed air to move the bolt, which enables the action without adding extra stress to the gear box.

This class leading system represents a significant milestone in the airsoft industry.

Patent No. : 614422.4

0.5 Joule Airsoft gun

Current 0.5 joules airsoft guns made by G&G ARMAMENT fire at the rate of 16-18RPS (The result may vary due to different batteries.) To satisfy players' requests, G&G now works on the development of 0.5 joules airsoft gun with the rate of fire as high as 29RPS.

G&G ARMAMENT apologizes to any of our supporters who have received a misrepresentation message.

METAL ONE PIECE HOP-UP

Built for stronger and higher performance. One piece metal Hop-Up chamber pre-installed in G&G's selected GT series for best durability and air seal.

STRONG MOTOR

Built for speed and torque. Designed specifically for G&G's selected GT series. This new motor performs at 25,000 RPM, and can withstand 10,000 continuous firing within the span of 8 minutes without breaking a sweat.

6.03mm INNER BARREL

Not all 6.03mm inner barrels are made the same. G&G's 6.03mm inner barrel has a super smooth inner surface finish for increased accuracy. Pre-installed 6.03mm inner barrel in G&G's selected GT series for the best out-of-box performance.

WIRE SET 16AWG

Built for faster trigger response with less power consumption.

16 AWG wire set features chemical, cold, and heat resistance of up to 200°C. Low impedance to improve motor performance and durability.

DEAN PLUG

Dean's plug is the most popular upgrade for Airsoft Professionals, and now comes standard on selected GT series. It provides low resistance connections between the battery and the wire set which increases the battery life and firing rate. A Dean to Tamiya adaptor is included for players without Dean batteries (using an adaptor will reduce the benefit).

GAS Blow Back System

The new gas blow back system is designed to be reliable and easy to use, so Airsofters can enjoy our new technology right away and for a long time.

This new gas system features a unique compatibility with the well known Version II gearbox shape in our receivers so the platform can be switched back and forth between electric and gas. G&G has designed the gas blow back system to be simple and practical and featuring a smooth recoil and light weight combination. G&G research and development tested and experimented with many materials before choosing one that will be durable to the recoil force of the gas blow back system. This industry leading system and design represents another significant milestone in the history of G&G.

United States military designation for the AR-15 rifle. The M16 entered United States Army service and was deployed for jungle warfare operations in South Vietnam in 1963, becoming the standard U.S. rifle of the Vietnam War by 1969, replacing the M14 rifle.

The M16 rifle family has been the primary infantry rifle of the U.S. military with its variants (M16A1, M16A2, M16A3, and M16A4).

The M16 is being phased out in the United States Army and replaced by the M4 carbine series as of 2010.

M.E.T. unit

MULTIFUNCTIONAL ELECTRONIC TARGET

SEVERAL PLAYING MODES

Product Features

Dimension / H 80.3 x Ø 79 mm

Weight / 325g (Including battery)

Battery / 4pcs AAA batteries

A) Visual & sound effects

Blue light – Stand-by mode.

Red light – Hit detected.

Flashing Red light – Battery is low.

Four different sound effects to choose from (Built-in speakers and phone jack).

Reboot is required after changing the sound type.

B) 0.2 ~ 2J Sensitivity.

C) 360° Targeting surface.

D) Links up to 25 targets with 15 meter maximum wiring distance between targets.

E) Switching between different playing modes will only be functional when linked up with other targets.

F) Four different playing modes when linked. **THE FIRST TARGET BEING INITIATED WILL BE THE MASTER TARGET.**

1) Competition Mode (default setting)

In this mode, all targets are in standby mode with Blue lights on. When the first target is hit, it will turn Red and all targets' light will be shut off. This mode will determine the first shooter. Press the select button once to repeat competition mode.

2) Versus Mode

In this mode, only the master target is in standby mode with Blue lights on. After the master target has been hit, it will flash blue and count down for 5 seconds. Once the countdown is done, all targets will turn a solid Blue. The first target hit will turn Red for 5 seconds and gameplay will be auto reset.

3) Random Mode

In this mode, the Master target will display a Blue light with the other linked targets in standby mode. As soon as the Blue light is hit, the next target will be activated randomly. Once all the targets are shot, the last target will turn a solid Red for 5 seconds, signaling the end of the round and the unit will be auto reset.

4) Practice Mode

In this mode, all targets will display a Blue light. Target will turn Red when hit and the last target hit will blink Red for five seconds signaling the end of the round and unit will be auto reset.

Multifunctional electronic target has a built-in pneumatic sensor to trigger light and sound when a projectile hits the rubber spherical target.

GK74 Series

The AKS-74 ("S" – Russian: skladnoy; Skladnoy, or "folding"), is a variant of the AK-74 equipped with a side-folding metal shoulder stock, designed primarily for use with air assault infantry and developed alongside the basic AK-74. Unlike the AKMS's somewhat fragile side-folding stock (modeled after the MP 40 submachine gun stock), the AKS-74 stock is fabricated from stamped sheet metal strips, machine-pressed into a "U" shape, and assembled by press-fit and welding. In 1979, a short-barreled carbine variant of the AKS-74 was adopted into service with the Soviet Army: the AKS-74U ("U" – Russian: ukorochennyy; Ukorochennyy, or "shortened"), which in terms of tactical deployment bridges the gap between a submachine gun and an assault rifle. It was intended for use mainly with special forces, airborne infantry, rear-echelon support units, and armored vehicle crews.

The Rk 95 Tp (shown commercially as the M95) is a 7.62mm Finnish assault rifle adopted by the Finnish Defence Forces in the 1990s in relatively small numbers. The rifle was developed in the late 1980s in response to a requirement to replace the 7.62mm Rk 62 service rifle. The Rk 95 Tp is a select-fire, gas-operated firearm using the Kalashnikov-pattern operating system with a long stroke gas piston rod coupled to the bolt carrier as in the AK rifle. The rotating bolt locks into the barrel via two locking lugs.

The AK-103 is a modern, Russian-designed version of the famous AKM assault rifle, chambered for the 7.62x39mm M43 round. It combines the AKM design with developments from the AK-74 and AK-74M, with the use of plastics to replace metal or wooden components wherever possible to reduce overall weight. The AK-103 can be fitted with a variety of sights including laser, night vision, telescopic sights, suppressor, and the GP-30 grenade launcher.

RK Beta

The G&G Full Metal RK Beta has arrived just in time. The G&G RK Beta is a good solid gun. The full metal body acts as a foundation for the polymer stock and front hand guards, resulting in an extremely solid and realistic AEG. The front hand guard has one rail on the bottom side for vertical grips, two rails each on the left and right side for lights/lasers and one rail on top for optics. These rail sections solve the Achilles Heel associated with most AK models, the lack of potential for accessories. This is a solid gun, inside and out, and you wouldn't expect anything less than amazing from G&G.

G960 Series

The Model 700 series of firearms are bolt-action rifles manufactured by Remington Arms since 1962. All are based on the same centerfire bolt action. They often come with a 3, 4 or 5-round internal magazine depending on caliber, which sometimes includes a floor-plate for quick-unloading, and sometimes is "blind," meaning it has no floor-plate. The rifle also can be ordered with a detachable box magazine. The Model 700 is available in a number of different stocks, barrels, and caliber configurations. It is a development of the Remington 721 and 722 series of rifles, which had been introduced in 1948.

LR300

The LR 300 is an assault rifle and conversion kit designed and manufactured by Z-M Weapons. It is based on the AR-15 platform and is broadly similar to the United States service rifle, the M16. The weapon is touted as an 'excellent entry weapon system' indicating a suitability for military use in close quarters battle which often involves aggressive and rapid building entries requiring a compact yet powerful selective fire weapon.

L85 series

The L85 rifle, variant of the SA80 family has been the standard issue service rifle of the British Armed Forces since 1987, replacing the L1A1 variant of the FN FAL. The improved L85 A2 remains in service today. The remainder of the family comprises the L86 Light Support Weapon, the short-barrelled L22 carbine, and the L98 Cadet rifle.

SIG Series

The SG 550 is an assault rifle manufactured by Swiss Arms AG (formerly Schweizerische Industrie Gesellschaft) of Neuhausen, Switzerland (SG is an abbreviation for Sturmgewehr, or "assault rifle"). The rifle is based on the earlier 5.56mm SG 540 and is also known as the Fass 90 (Fusil d'assaut 90 / Fucile d'assalto 90) in French / Italian or Stgw 90 in German (Sturmgewehr 90).

The compact SG 552 Commando carbine was revealed in 1998. It has a shorter 228 mm (8.9 in) barrel (with an open, 3-prong flash suppressor), gas tube, ventilated handguards, and a redesigned bolt carrier group that was integrated with the piston rod to form a single moving assembly.

The SG 553 is an improved version of the SG 552 and has been released in 2009. Even though it mostly resembles the SG 552, the SG 553 has one key advantage. The recoil spring is now wrapped around the piston rod like in the SG 550/551 models, which address several reliability issues encountered in the SG 552, and also allows the usage of the standard SG 550/551 charging handle.

GR25 Series

The SR-25 (Stoner Rifle-25) is a semi-automatic sniper rifle designed by Eugene Stoner and manufactured by Knight's Armament Company. The SR-25 uses a rotating bolt and a direct impingement gas system. It is loosely based on Stoner's AR-10, rebuilt in its original 7.62x51mm NATO caliber. Up to 60% of the SR-25 parts are interchangeable with the AR-15 and M16.

M.I.T. UNIT

Military Intelligence Tracer Unit

Each time you press the looping button, it will cycle between RPS (rounds per second), shots (BB counting), m/s (velocity in meters), and FPS (velocity in feet).

- Powered by Li-Po batteries.
- Built-in rechargeable Li-Po batteries.
- Features inrush limiting, over-charge/over-discharge protection. (Battery built-in PCM).
- Display modes: standby, charging, fully charged.

Through the tracer unit, the tracer BBs will trigger the built-in infrared ray and activate instant light from the flash tube for tracer BBs to absorb and glow.

- Features power-saving mode and Built-in vibration sensor. Power-saving mode will be activated after 10 minutes on standby.
- Laser module features both simulation laser bullet and aiming device.
- BBs will trigger built-in infrared and activate the laser module simultaneously for a simulation laser bullet.
- Features BB velocity chrono function.
- Features counting (BB) measurement function.
- Features memory function for previous user settings.

Laser usage

- Please do not look into the laser during use. Wear appropriate goggles for eye protection.
- Do not look into the laser by using any optical instruments such as a telescope.

GR14 Series

The M14 rifle, formally the United States Rifle. M14 is an American selective fire automatic rifle firing 7.62x51mm NATO (.308 Winchester) ammunition. It was the standard issue U.S. rifle from 1959 to 1970. The M14 was used for U.S. Army and Marine Corps basic and advanced individual training, and was the standard issue infantry rifle in Europe, and South Korea, until replaced by the M16 rifle in 1970.

E.B.R.

The United States Navy Mark 14 Enhanced Battle Rifle (EBR) is an American selective fire military rifle chambered for the 7.62x51mm NATO cartridge. It is a variant of the M14 battle rifle and was originally built for use with units of the United States Naval Special Warfare Command, such as the United States Navy SEALs. The EBRs are made with the intention of carrying out both designated marksman and CQB roles in combat.

One Rifle TWO Systems G980

From now on, G980 can be powered by CO2 and Green Gas. Both CO2 and Green Gas magazines are interchangeable and can be used on the same rifle.

To switch from CO2 to Green Gas, simply change the magazine. G980 was derived from an earlier rifle (The Karabiner 98 Kurz). The Karabiner 98 Kurz (often abbreviated Kar98k, K98, or K98k) is a bolt action rifle chambered for the 8x57mm IS/7.92x57mm IS cartridge that was adopted as the standard service rifle in 1935 by the German Wehrmacht. It was one of the final developments in the long line of Mauser military rifles. Although supplemented by semi and fully automatic rifles during World War II, it remained the primary German service rifle until the end of World War II in 1945.

M1 Garand

The M1 Garand (officially designated as United States Rifle, Caliber .30, M1 and later simply Rifle, Caliber .30, M1, and also abbreviated as US Rifle), was the first semi-automatic rifle to be generally issued to the infantry of any nation. The M1 was used extensively by U.S. forces in World War II, the Korean War and to a limited extent, the Vietnam War. Most M1 rifles were issued to Army and Marine troops, though many thousands were also lent or provided as foreign aid to America's allies. The Garand is still used by drill teams and military honor guards. It is also widely sought by the civilian population as a hunting rifle, target rifle, and military collectible.

GM1903 A3 One Rifle TWO Systems

From now on, GM1903 A3 can be powered by CO2 and Green Gas. Both CO2 and Green Gas magazines are interchangeable and can be used on the same rifle. To switch from CO2 to Green Gas, simply change the magazine. The M1903 Springfield, formally the United States Rifle, Caliber .30-06, Model 1903. It was officially adopted as a United States military bolt-action rifle on June 19, 1903, and saw service in World War I. It was officially replaced as the standard infantry rifle by the faster-firing, semi-automatic 8 round M1 Garand, starting in 1937. However, the M1903 Springfield remained in service as a standard issue infantry rifle during World War II, since the U.S. entered the war without sufficient M1 rifles to arm all troops. It also remained in service as a sniper rifle during World War II, the Korean War, and even in the early stages of the Vietnam War. It remains popular as a civilian firearm, historical collector's piece, and as a military drill rifle.

GK5C Series

The Ak 5C is the modernized version of the original Ak 5, following the trend of modular weapons. Therefore, one of the most significant improvements is the MIL-STD-1913 rail system on to which a variety of different optics, lights and sights can be mounted, such as telescopic sights and image intensifiers.

We're proud to announce the release of the GK-5C! It is a new and unique line of AEG's made only by G&G Armament and based off of the newest version of the Swedish infantry rifle, originally known as the AK5C.

This gun features a Version 2 gearbox with Picatinny Rails, a Folding and Retractable Stock, an Ambidextrous Selector, and compatible with the M4 Magazine.

GF85 Series

The AK5 is the Swedish version of the FN FNC assault rifle with certain modifications, mostly to adapt the weapon to the Swedish climate. The AK5 is the service rifle of the Swedish Armed Forces.

AK5 is an abbreviation of automatkarbin 5 (literal translation "automatic carbine 5", "automatic carbine" is the Swedish term for assault rifle). The AK5 replaced the AK4 (licensed G3 copy) in Swedish service.

A modified version of the Colt M203 grenade launcher can also be attached to the AK5. This setup is simply designated AK5 med granattillsats.

GF76 Series

The FNC (Fabrique Nationale Carabine) is a 5.56mm assault rifle developed by the Belgian arms manufacturer Fabrique Nationale (FN) of Herstal and introduced in the late 1970s. The rifle was developed between 1975–1977 for NATO standardization trials. The rifle's design is based on the FNC 78 prototype, which itself originated from the commercially unsuccessful FN CAL rifle. This prototype was soon withdrawn from the NATO competition after performing poorly due to its rushed development. Later trials for the Swedish Armed Forces held between 1981–1982 using updated prototypes proved the utility and efficiency of the design, impressing both the Swedish military and Belgian army staff back at home.

GK16 Series

On October 15th 2003, the US Special Operations Command (US SOCOM) issued a SOF Combat Assault Rifles (SCAR) project. The key idea of SCAR project is that it will open a new kind of combat rifle to provide SOF with a wide variety of options. Many well-known companies join this case, FN - Robinson Arms - COBB - Knights - Colt - HK. Late in 2004, US SOCOM announced, that the winner for the initial SCAR contracts is FN USA. The most important character of the FN SCAR system is to offer a variety of options for different combat situations. The SCAR has two kinds, SCAR-Light and SCAR-Heavy. Both SCAR's are available in three versions, Standard, Close Quarter Combat, and Sniper Variant (different versions fit different QD barrels).

PDW99 Series

The FN P90 is a selective fire personal defense weapon (PDW) designed and manufactured by FN Herstal in Belgium. The P90's name is taken from 1990, the year it was introduced. The P90 was created in response to NATO requests for a replacement for 9x19mm Parabellum firearms; it was designed as a compact but powerful firearm for vehicle crews, operators of crew-served weapons, support personnel, special forces, and counter-terrorist groups.

Show 2012 Yourself Photo Contest

G&G ARMAMENT

Dear G&G's valuable customers, the G&G photo contest "Show Yourself" is held regularly every year, so why don't you bring your camera and shoot for your favorite G&G product. The chosen winners of the contest will win exciting prizes and a chance to be showcased on G&G's product catalogue, and any airsoft events!

SURVEY

Many thanks to all G&G's customers for submitting such amazing photographs. Let's go through these surveys to share the winners' opinions about the experience of taking photographs and using G&G products.

Show 2012 Yourself Photo Contest

G&G www.Guay2.com
ARMAMENT

Gold Prize Team Geronimo / Russia

G&G : Could you please share your experience during this contest?

Team Geronimo : Without a good photographer is not good pictures. Well, you need to choose a suitable area for gear and camouflag.

G&G : Which G&G's airsoft gun do you like the most, and why?

Team Geronimo : TR16 R4. In fact she is not a modern rifle, but it looks modern. But she is brutal. Many modern guns, real combat gun looks like a toy, TR16 R4 looks like a real gun, not toy.

G&G : Your expectation to G&G.

Team Geronimo : More different and quality AEG/GAS guns.

G&G : Your opinion or suggestion about this contest.

Team Geronimo : Keep up the good work.

Silver Prize 19SFG (ODA911) / Russia

G&G : What is your motivation to participate in this contest?

19SFG (ODA911) : Poster in Airsoft shop in my city (www.mopnex.ru).

G&G : Which G&G's airsoft gun do you like the most and why?

19SFG (ODA911) : M14, very good production AEG!!!

G&G : Your expectation to G&G.

19SFG (ODA911) : Very wait production new AEGs and Gas blowback pistols.

G&G : Your opinion or suggestion about this contest.

19SFG (ODA911) : when you make a choice more to be guided by surroundings.

G&G : Could you please share your experience during this contest?

19SFG (ODA911) : All was OK, look forward.

Bronze Prize Klesch Anton / Russia

G&G : What is your motivation to participate in this contest?

Klesch Anton : My motivation was that I should have noticed, not only at home but also in Taiwan)))))) Maybe I'll come work for you))))).

G&G : Could you please share your experience during this contest?

Klesch Anton : Of course, I'll share any experiences that you have had a great photo))))).

G&G : Your opinion or suggestion about this contest.

Klesch Anton : Everything was fine, but you need to be a little bit more objective.

G&G : Which G&G's airsoft gun do you like the most, and why?

Klesch Anton : I would like umg or TGM Q6. this is my favorite weapon models.

G&G : Your expectation to G&G.

Klesch Anton : I expect from G & G more new competitions, in which you can participate and compete with others.

SURVEY

Congratulations to the winners of the 2012 Your Greatest Glory Video Contest! Many thanks to all those who participated. Our winners have kindly shared their opinions and experiences about the video contest and what it's like to work with G&G products. Let's take a look!

G&G Your Greatest Glory 2012 VIDEO CONTEST
G&G ARMAMENT

Best G&G Commercial Award
Eric Raunio / Finland

G&G : What is your motivation to participate in this contest?
 Eric Raunio : We love making action videos and airsoft flicks offer a perfect opportunity to combine the themes of intensity, emotions and the support of a community; or particularly a team. The G&G Competition was well advertised and easy to notice and the great prizes really got our attention. In the end the motivation was still a chance to challenge ourselves and see if we could take it home again this year.

G&G : Could you please share your experience during this contest?
 Eric Raunio : Our team went working with the film from early on, as we learnt last year that we shouldn't leave it until next minute. Our first thoughts were to make a bit bigger video than last year and to try and include different environments and seasons in the making as those are very visible in the Finnish nature. As we finished the script we begun to film the scenes in five different themes; autumn's suspense, summer's conditions, urban teamwork and the winter's rush. The last piece to tie the airsoft themes into the G&G's marketing feature "The Top Five" was the actual "Greatest Glory with G&G" as a promise for great quality and experiences. It still went really close to the deadline with editing and effects but we made it in time and succeeded to include all the aspects we wanted.

G&G : What is your motivation to participate in this contest?
 Stanislaw & Marcin : To make a video of the game I love.

G&G : Could you please share your experience during this contest?

Stanislaw & Marcin : It was a month filled with having great fun with friends and working hard in cold weather. Then the hard decision of leaving original idea of 5 minutes movie due to incoming deadline, and making a short commercial instead. The montage took about a week of sleeping like 3 hours per day, but it was still a lot of fun! Then the excitement when we took 2nd place, overall, it was GREAT!

G&G : Your feedback about this contest.

Stanislaw & Marcin : I've got no remarks – everything is as it should be!

G&G : Which G&G's airsoft gun you like the most? Why?

Stanislaw & Marcin : GK5C – looks and feels so different than any airsoft gun. Pure sex.

G&G : Your expectation to G&G.

Stanislaw & Marcin : Keep up the good work!

Best Video Award/ Nominated Masterpiece Award

Stanislaw Gwara & Marcin Maternik / Poland

Best Creative Video Award
Mathias Lönnström / Finland

G&G : What is your motivation to participate in this contest?
 Mathias Lönnström : I am an airsoft enthusiast since many years and also a cinematographer and filmmaker. I noticed this contest and was inspired by last year's videos. We are making a Batman fan film at the moment and need money to make it. This was a way to earn a budget for it.

G&G : Could you please share your experience during this contest?
 Mathias Lönnström : We were a small group of four who made this video and had lots of fun making it. We had several ideas, but didn't have time to make them all. Maybe if the contest is arranged again we can participate with those ideas.

Making this video also meant we found a new great location which I'm sure we will use again sometime.

G&G : Your feedback about this contest.

Mathias Lönnström : I think it's a good thing that the most part of the points come from professional judges and not just from Youtube likes as the contest is open for several months and therefore teams who add their video in the beginning have more time to "collect" likes than those who for example need to film during several seasons and can finish their video much later.

I think it's sad that so many contestants have blood in their videos and images of people getting shot through their safety goggles. In my opinion that is not airsoft and not something G&G should be involved with.

Configuration to order

Metal Forging

Metal forging creates metal parts by pressing a block of material into a mold die at high pressure. Metal forging is the mechanical deformation of metal when heated to a plastic state. However, more recently, metal forging includes similar operations done in the cold or room temperature state as well.

1005-00-017-9646

Metal Stamping

Stamping includes a variety of sheet-metal forming manufacturing processes, such as punching using a machine press or stamping press, blanking, embossing, bending, flanging, and coining.

The stamping process produces sheet metal parts by the quick downward stroke of a ram, die that is in the desired shape. The machine is called punch press. The punch press can "punch" holes in different sizes and shapes, cut metal, or form a variety of shapes.

Metal stamping is employed in manufacturing metal parts with a specific design. A metal alloy sheet is used as the stock. This stock is either stamped on a press using dies and punches or drawn into shapes on hydraulic deep drawing machines.

G&G
SINCE 1985
ARMAMENT
WWW.GUAYZ.COM

CNC Machining

CNC starts with a piece of metal, or so-called "billet." The metal piece might have been cast, forged, or rolled (squeezed between rollers, like a limited forging, which can only make flat materials with straight grain). It is put into a fairly standard machine tool, that has had position sensor and motors on the control knobs installed. The basic idea of this mechanism is using a rotate cutting tool to shape the metal into your design. 3D metal etch-a-sketch with computer interpolating, which makes the circles look extremely smooth.

1005-00-017-9537

1005-00-992-7288

Plastic Injection Molding

Plastic injection molding is a manufacturing process for producing parts from plastic. Plastic material is fed into a heated barrel, mixed, and forced into a mold cavity where it cools and hardens to the configuration of the cavity. Injection molding is widely used for manufacturing a variety of parts, from the smallest component to entire body panels of cars.

Investment Casting

Investment casting is an industrial process based on and also called lost-wax casting, one of the oldest known metal-forming techniques. The process is generally used for small castings. It can produce complicated shapes that would be difficult or impossible with die casting.

1005-00-992-6666

Configuration to order

OEM / ODM

Powder Metallurgy

Powder metallurgy is the process of blending fine powdered materials, pressing them into a desired shape or form (compacting), and then heating the compressed material in a controlled atmosphere to bond the material (sintering).

Two main techniques used to form and consolidate the powder are sintering and metal injection molding. Recent developments have made it possible to use rapid manufacturing techniques which use the metal powder for the products.
