**WARNING**

- All products employ a high precision barrel. It is highly recommended to use G&G high precision BB's.
- Damage to the product due to faulty BB's voids the warranty. Use with caution.
- The buyer and the user of this product shall adhere to all local laws regulating the usage and the ownership of airsoft guns.
- Misuse or careless handling of this product may cause injury.
- Always wear safety goggles when using this product.
- This product is intended for users 18 years or older.
- Read all instructions before using this product.
- May be hazardous up to 50 meters.
- Adult supervision required.

Image Supplier - [ Show Yourself 2014 "Selected Prize" ] White Horse Cavalry / Russia

Never direct the muzzle towards a person, animal, or in any direction that may cause harm or damage to a third party.

When you carry the air gun, attach the safety cap, set the selector lever to the safety position, and always put the air gun in a case or bag.

Disassembling or modifying the gun may adversely affect the performance and make it dangerous. It may be against the Law.

Always attach the safety cap to the muzzle, remove the Battery, and store the air gun in a case or bag and at a place that is out of reach of children.

When shooting the air guns for target practice or in a game situation, you and all participants must wear safety goggles or other eye protective gear. Also, pay attention to ricochets and third parties other than the participants.

Make sure to put the barrel and safety cap on the muzzle except when you are shooting. Do this to prevent accidental discharge of BB's and also for dust protection purposes. Never put the trigger while the barrel and safety cap are attached.

Activating the trigger carelessly is extremely dangerous, regardless if BB's have been loaded or not. If you get hit in the eye by a BB pellet, worst case scenario, you may lose your eye sight.

Looking into the muzzle is extremely dangerous, regardless if BB's have been loaded or not. If you get hit in the eye by a BB pellet, worst case scenario, you may lose your eye sight.

You may be liable for damaging public or personal property or for injuring a person or an animal. Always observe good manners and enjoy fun sport shooting.

Safety procedures:  
1. Attach the safety cap to the muzzle.  
2. Set the selector lever to the safety position.  
3. Remove the magazine.  
4. Remove the battery.

## Letter from the CEO of G&G

### Constant Innovation at G&G Armament

"G&G Armament", now approaching its 30th year, specializes in the design of highly realistic airsoft guns and accessories. All G&G parts are manufactured in Taiwan and the brand is held in high regard by Western markets with over a hundred distributors in 68 different countries. It is currently the largest airsoft equipment maker in Taiwan.

### The Surprise-Filled Trendsetter

G&G's market leadership comes from our willingness to listen to the consumer. The TOP5 concept we pioneered represents our core philosophy of emphasizing R&D, Quality, Service, Marketing and Price. From product development to after-sales service, we always put ourselves in the consumer's shoes to create products that put function first.

In 2014, we developed a weighted bolt system that slams home with a satisfying click just like real steel when you release the bolt. The system will be progressively introduced to different models in the future. The realistic magazines means it feels like a real magazine when you load. You can not only load and eject false rounds but also see the rounds move up and down through the viewing port. The level of realism is simply staggering.

The highly anticipated MARS and GEC systems incorporate many interesting innovations such as receivers that can be quickly opened and closed just like real steel, quick-change springs, quick-change motors as well as an easy to install and use electrical core system so you can quickly change the power of the gearbox. The simplicity and robustness of the system makes them the best choice for beginners.

The improved M.I.T. tracer unit not only can be used as a chronograph, round counter and tracer unit; but when matched to a laser designator battery box, it can also serve as a laser sight and laser beam with G&G's multi-purpose flashing helmet and vest. It even extends the range of conventional airsoft BB guns from 50 to 100 meters making it very suitable for paramilitary training use.

Apart from the above, a number of new models have been released. The GEC36 [G36] includes a weighted receiver system for more realism and specialty market niches. The range of M4 and 416 derived models fitted with the latest tactical rails give you more variety in your gun's appearance. Expansions are also designed to easily installed and remove, making it both aesthetically pleasing and practical. The G980 SE [98K] is a gas-powered bolt-action model that can even eject empty casings for 100% realism. The compact version of the Swedish military's standard GK5D [AK5D] will also be released this year. The GK5D is definitely a model to look forward to for collectors and players alike.

G&G is not only known for its products but also for attention to detail in the packaging and promotional materials. People often ask me if the many elements that make up the G&G logo mean anything special or have a story of their own or whether there is a reason why G&G uses certain colors from its website to its packaging. In the next section, we will do our best to satisfy your curiosity and let you know more about G&G. Of course, if you have any other questions you would like to ask G&G, please send an e-mail to sales@guay2.com and we will do our best to answer.

**JAMES LIAO**  
Chief Executive Officer  
of G&G Armament

## The New Choice for Burning Calories and Getting Toned

To provide players with an all-new shooting experience, G&G plans to host the industry's first "G&G Armament CQB+OUTDOOR" event in 2015. As the lead-up to this groundbreaking event, G&G hosted a number of tournaments in Taiwan, Japan and Hong Kong in 2014. In November 2014, skilled players from these countries flew to Taiwan to take part in the Taiwan-Japan-Hong Kong invitational championship hosted by G&G. Such an intense and high standard of competition attracted extensive media coverage and gasps of awe from the audience. The success of the event can be considered the opening shot for the 2015 world cup.

We prepared a number of great giveaways for each match that were given to selected guests. The match was interspaced with the world-class Ten Drum band, enthusiastic cheerleaders and popular bands. Beautiful showgirls also circulated among the crowds to interact with the public, play games and take photos together. Every session brought new surprises and great giveaways.

We had two reasons for hosting the first international shooting competition in Taiwan. First, we hoped that a formal competition would show the public that given the right channels, airsoft could be very "safe", classy and even offer the sense of pride from telling your friends and relatives that "I am the world champion!" The proliferation of online and mobile phone games has led to a sharp increase in lifestyle diseases. We are now sounding the call to invite everyone who has not taken part in or experienced this activity before to join in getting sweaty and enjoying a great activity that improves fitness, lowers body weight and tones the body. As long as you play in a safe and legal venue, you will definitely enjoy the benefits of burning calories in a healthy way.

Second, G&G has always believed in giving back to Taiwan. Apart from introducing the high-quality products made in Taiwan to players around the world, we also hope that the hosting of the world tournament will show the beauty of Taiwan to the world. This is why G&G organized the "Free Taiwan Tour" consumer reward event and invited international players to a holiday in Taiwan. As a business, we have our social responsibility. As we continue to grow and prosper, we will also give back to the land that nurtured us when appropriate and help market Taiwan. We hope that one day G&G can be the pride of Taiwan as well.

**Q: there are many Airsoft manufacturers in the world, why G&G Armament is the ideal choice for Airsoft products?**  
**A:** competitive products require high standard quality control. In order to provide trustworthy and high quality products to users, G&G Armament never stops correcting, adjusting and testing our products before release. G&G Armament is also the only manufacturer with ISO 9001 quality control standard certificate. ISO 9001 is the international quality control standard, adapted in many other industries and organizations.

**A:** ISO 9001 is not the only approval internationally, an online survey conducted by UK magazine **Airsoft International** also shows G&G Armament is **the best Airsoft manufacturer**, this honor was given by the users and we are proud to share with all Airsofters.

**A:** First U.S. military school to adopt G&G products as their **cadet-training rifle**.  
**G&G** was adopted by the U.S. military due to its high quality and reliability.

**Q: It's all about service nowadays. What service comes with purchasing G&G products? If there is product problem or damage, where to go for repairs? Will it become an orphan product?**

**A:** The G&G TOP5 corporate philosophy is defined by R&D, Quality, Service, Marketing and Price.

#### Future innovation

G&G always brings you the most innovative product. Not only do we make replicas of real steels; but also push our R&D to develop more features and ergonomic designs to meet a variety of demands from end users.

#### Finest quality

G&G offers industry leading manufacturer warranty coverage. We stand behind our product quality and test every single rifle before shipping.

#### Fast service

G&G has recruited the most dedicated support team. Dedicated staff handle every letter from our consumers and distributors.

For the three main types of gun driving systems (electric, spring and air) as well as all parts and accessories, we provide Q&A customer support in 6 languages (Chinese, English, Spanish, French, Russian, Japanese); customer support answers all warranty questions within 24 hours and parts are guaranteed to ship within 36 hours of payment. This is the 36-24-36 high-efficiency customer service system at G&G.

#### Free items

G&G offers a variety of free items to its customers and will continue to release new giveaways more frequently. We always offer a variety of promotional materials for events and sponsorship to help and support the Airsoft community.

#### Fair price

Customer satisfaction motivates G&G. Our products offer the best value to our customers, and we never cut corners to build our products.

**TAIWAN CHANGHUA**  
 G&G headquarter is located in Changhua county, central part of Taiwan. Due to the location, Changhua is well known for its Agriculture and fruitful soil, also center of many manufacturers. Google data center of Asia is also located in Changhua.

G&G  
 Headquarter

- 2001** By targeting the overseas market and combining our experience in part manufacture and design, we were able to attract enormous attention from all over the world with our quality products.
- 2004** The first G&G Armament completely self-made replica arrived on the market, generating much excitement.
- 2007** G&G invented the unique pneumatic blowback system, a design that we have registered for patent in multiple countries.
- 2008** To better satisfy the needs of worldwide Airsofters, G&G established its second factory in Changhua, Taiwan.
- 2013** G&G became the only Airsoft manufacturer passing the ISO 9001 - which further proves G&G as a company that has quality management and production system.
- 2004-2015** G&G Armament has already developed and distributed more than 100 different replicas throughout the world.

## LOGO Design

The logo represents our company's corporate brand spirit to the world. Our high self-expectations, service philosophy and industry are incorporated into the logo in the hopes that it will stick in consumers' minds. The meaning of the logo is detailed below.

**Pole arm :** Weapon used for a assault and stabbing enemies in ancient warfare.

**Shield :** Protection from enemy attacks.

Pole arms and shields were both used in Western and Eastern battlefields, nowadays, modern warfare has evolved into higher accurate and longer range assault rifles and armor.

As one of the leading manufacturer of Airsoft guns, G&G Armament strives to bring quality and innovative products to our customers.

Front and center is our core value of G&G Armament representing quality. We always challenge ourselves to develop the best technology and bring the highest quality to be a leading manufacturer in the airsoft industry. The flame represents the passion and dedication we have in every product we make.

Each star represents a family member that has laid the foundation of what G&G Armament stands for today. The strong family bond is what makes G&G Armament a friendly and approachable company to our customers. We treat every customer as they were our own family member and build a long lasting relationship. The five family members create a five star symbol which signifies a five star general. Similar to a general, G&G Armament leads the airsoft industry with the help of our customer's feedback and suggestions.

We have G&G Armament written on the bottom to signify the origins from where we started from and the top lettering to represent how we became a top airsoft manufacture.

Stars are one of the most common grades to evaluate performance worldwide. We double check our quality control to ensure it exceeds the industry standard.

In addition, G&G Armament offers multilingual customer service. Our 36/24/36 service is our highest principle in customer service, which includes providing services for 3 different Airsoft operating systems in 6 different languages, we respond within 24 hours from email inquiries and ship products in 36 hours after payment has been completed. Our mission is to provide every customer with highest level of service.

## Corporate Color

Consumers have a very direct impression of product colors. That's why G&G's choice of corporate colors took into account people's visual perception and psychology of colors. Association by experience and by biology was then incorporated to come up with the four following colors as our corporate colors.

**Red** Pantone: 186C  
CMYK : 0,100,100,10

Red is a passionate, aggressive and powerful color. The G&G Armament red ring symbolizes the ongoing passion and strong commitment we have in our products and customers. G&G Armament always interact with our customers and offer the most competitive products and challenging shooting events.

**Black** Pantone: Black C  
CMYK : 0,0,0,100

A black belt in martial arts signifies the level of competence. The inner black ring symbolizes the quality and reliability our products have. Over time we have mastered our products to be the most reliable airsoft guns in the industry. By listening to our customer's feedback, we have perfected reliable and reputable guns.

**Blue** Pantone: 285C  
CMYK : 100,45,0,0

The color signifies royalty, trustworthy, intelligence, confidence and innovation. We use blue to display our newest technology on products that enhances our customer's experience. In addition, being a frontrunner in the airsoft industry, G&G Armament continues to bring our customers reliable products that will last them for years to come.

**White** Pantone: White C  
CMYK : 0,0,0,0

White signifies pure, sacred, simplified and fashion. G&G Armament's simply approach to having the highest quality control possible has distinguished us among our competition. We're view in high regards by the airsoft community on being a dependable airsoft manufacture. We take white into our logo design to feature the essence of the color.

# G.E.C. System

## G-Generation Electronic Control System

- Modularized Gear Box
- Plug and Play design
- Simple and fast operation

### CERAMIC BEARINGS

Ceramic is a glass like surface it has an extremely low coefficient of friction and is ideal for applications seeking to reduce friction. Ceramic bearings require less lubricant and have a greater hardness than steel bearings which will increase bearing life. Ceramic generate less heat at high speed rotation than steel bearings.

### MICRO CONTROL UNIT

Programmable burst feature from single to 3 round burst up to 10 round burst.

### SPLIT GEARBOX

Push out the pin to open receiver.

Magnetic sensor toggle power switch corresponding the position of the dummy bolt. This is to simulate the operation of a real firearm how bolt is being pulled and released after a fresh magazine is inserted.

Build-in magnetic sensor to trigger power cut when magazine is removed or empty.

### G&G REALISTIC MAGAZINE

G&G realistic magazine can be loaded up 5 dummy rounds. Dummy shells inside the magazine will be pushed down when loading the dummy rounds from the top. Window from both side of the magazine allow users to see the action when loading dummy rounds.

### MODULAR PISTOL GRIP

Located under the gearbox is the modular pistol grip with motor. Behind the motor pinion gear is motor type indicator in red, black or orange based on the characteristics of the motor. No wiring between the pistol grip and gearbox to make motor changes very simple.

UNIVERSO SNIPER AIRSOFT

**[ HEAVY BOLT ]**

G&G's proprietary and patented heavy bolt creates a crisp, metallic click when the bolt is released just like a real weapon.

**[ G&G REALISTIC TRIGGER ]**

Built with hammer and sensors to simulate the action and reaction of pulling trigger of a real firearm.

**[ MULTIFUNCTION BOLT HANDLE ]**

Corresponding with micro control unit to switch from single round burst to 3-round or 10-rounds burst. Pulling the charging handle before firing the first round from a fresh magazine.

**FUSE**

**[ Q.D. BATTERY ]**

11.1v Li-Mn 1100mAh battery

**G.E.C. System**

## Need for Speed G&G 0.5J Airsoft Full-auto rifle! The World's Fastest Airsoft Gun

1sec. 29shots

Q : Why produce 0.5 joule replicas?

A : In Germany, 0.5 joule airsoft guns can be imported without any license or pentagon F engraving on it. Moreover, 0.5 joule replicas are allowed to fire in full-auto mode on field!

Q : What is the difference between G&G's 0.5 joule and others in the market?

A : The impression of 0.5 joule is always connected with not only low velocity, but also low quality and low performance. However, G&G decided to develop new technology to feature high-end replicas to meet the velocity regulation without changing the quality of materials and even increase the rate of fire to compensate the lost of velocity.

Q : How does G&G manufacture 0.5 joule replica?

A : To fulfill the goal of keeping quality and efficiency on 0.5 joule models, G&G change the design based on the original inner parts. A small change which actually requires precise production to guarantee the mechanism works fairly properly.

Q : How fast can G&G's 0.5 joule fire?

A : G&G has developed something more than expectation – the high rate of fire! Using dual sector gear and the strong motor, 0.5 joule replicas of G&G offer the capability of 29 r/s! Equipped with reinforced gear shafts, ceramic bushings, full steel teeth piston, and high speed motor, the replica fires more stably and is more durable to resist the stronger wear and tear caused by high ROF.

Q : Why choose G&G?

A : G&G not only manufacture functional 0.5 joule replicas, but leave you no worries of the follow-up usage. Enjoy each airsoft game with the delight of full-auto, high ROF and well-balanced behavior presented by G&G quality 0.5 joule gun models!

COMBAT  
MACHINE  
AIRSOFT GUNS

### All New Combat Machine

#### Electronic trigger module/ MOSFET

Gearbox of the G&G's combat machine in 2015 also pre-installed with electronic trigger module and MOSFET from the factory to solve the problem from rapid fire under semi-auto.

#### Electronic trigger module

All new Combat Machine will be installed with G&G ETU (Electronic Trigger Unit) for faster reaction on trigger response.

Billet style  
polymer receiver with  
stamped logo

The new CM receiver is designed with ambidextrous magazine release button and charging handle for left-hand users or in certain situation when users need to be use left-hand shooting.

## Modular Assault Rifle System

M.A.R.S. has obtained patents in multiple countries

WORLD PATENT

One of the most innovative Airsoft replicas in the industry. The modular pistol grip design makes swapping motors as simple as "slicing a hot knife through butter."

G&G has developed not only the new gearbox system, but also new material for the receivers. The nylon fiber receivers on the G&G Combat Machine have always been very well known as the most durable and valuable plastic receivers in the Airsoft industry. G&G's nylon fiber receivers are strong enough to handle the strong recoil from the gas blow back system, a fact that pushed G&G to be the first Airsoft manufacturer to release a GBB rifle with a nylon fiber receiver. G&G never stops searching for perfection, and this time, we have finally found an alternative material that is even stronger than the original nylon fiber material.

G&G always strives to create better technology and quality in developing products. Our mission is to offer users new technology and long lasting replicas so users can enjoy the fun of Airsoft.

G&G always strives to create better technology and quality in developing products. Our mission is to offer users new technology and long lasting replicas so users can enjoy the fun of Airsoft.

Located under the gearbox is the modular pistol grip with internal motor. The back of the motor pinion gear is colored red, black and orange based on power and characteristics. There are no other external wiring connections making motor changes very simple.

Swapping different motors with the grip can be achieved by pushing the pin on the front side of the trigger guard.

The M.A.R.S gearbox also features a quick swapping spring guide for users to change different specification springs for different power.

The MOSFET is fixed on the mount at the back of the gearbox near the motor. With the MOSFET, G&G electric Airsoft replicas are now true Li-Po ready and free from trigger burns.

The M.A.R.S is designed and manufactured based on the version-two gearbox. So the gear set, bearings, trigger switches, etc are still compatible with most factory or upgrade parts in the market.

Not only does M.A.R.S include MOSFET inside the gearbox, but even the gearbox shell is enforced. By extending the length of the front part of the the gearbox shell up against the wall of the upper receiver, the stress on the front part of the gearbox is now also supported with the upper receiver. [Picture5]

Due to the new cylinder head design, no tappet plate is required on M.A.R.S, allowing more room for more features. M.A.R.S is also able to achieve a high rate of fire (1800 r/m) without incurring problems on the tappet plate. [Picture6]

An additional feature of M.A.R.S is the cutting off of the power when the magazine is not inside the magazine wall or when there are no BBs inside the magazine by sensor. This feature simulates a real firearm being unable to fire when there are no bullets inside the chamber or no magazine inside the magazine wall. [Picture7]

**TR4 MOD 0**

The G&G TR4 MOD0 airsoft electric gun is a large model M4 meant for MilSim and field play. It features a full metal [quality aluminum] receiver – both upper and lower, as well as a 120-round, mid-cap magazine. One of the most impressive features of this AEG is its pneumatic blowback system which generates a slight amount of vibration/feedback when fired. In addition, this blowback system also makes the AEG a bit louder than usual – especially when laying down a lot of fire. G&G created a perfect balance between comfort and performance with this ergonomic and fast shooting AEG!

**TR16**  
United States military designation for the AR-15 rifle. The M16 entered United States Army service and was deployed for jungle warfare operations in South Vietnam in 1963, becoming the standard U.S. rifle of the Vietnam War by 1969, replacing the M14 rifle. The M16 rifle family has been the primary infantry rifle of the U.S. military with it's variants [M16A1, M16A2, M16A3, and M16A4]. The M16 is being phased out in the United States Army and replaced by the M4 carbine series as of 2010.

UNIVERSO SNIPER  
AIRSOFT**TR16 CRW**

TR16 CRW at a tiny 44cm is the perfect weapon in CQB situations or as a sniper's backup. With a good rate of fire and a great FPS, this little thing is a beast. Full metal body gives it a nice weight and feel, and the RIS, 14mm - thread and top rail mean you can attach anything you please onto it - foregrip, flashlight, laser, optics, silencers, flash hiders, tracer units... there is much more to this gun that there seems to be. Another brilliant attention to detail - the battery sits inside a spare dummy mag placed next to the one being used, so you can fit pretty much any sized battery in there and rely on it all day long if you need to! The dummy mag, like the bb mag, is metal, and has a nice feel.

**TR16 A3**

A great M16 replica, this AEG has the shorter, traditional handguard for those who love the M4 look, whilst also having a removable carry handle for those who wish to add their own optics. A threaded barrel underneath it's flash hider for your own flash hider or silencer. It has a nice blowback, and it has a forward release which also release the spring when not in use. A wonderful addition to any M4 lovers collection.

## FROM A PELLETT TO THE GLOBE

"From the smallest details, quality and professionalism can be found." When James Liao decided to use moldings with fewer cavities, he also decided to control the initial plastic pellets to be as close to 6mm as possible. G&G BBs, therefore do not require rough polishing to reduce the size, but we finally polish our BBs four times to ensure that they are perfectly sphered.

G&G BBs are now distributed worldwide. At G&G, we believe in quality over margins; in service over bargains.

BB pellets manufactured by G&G Armament are high precision products, unlike other manufacturers in the market accepting tolerance of size and sphere within 0.01mm, G&G Armament control the tolerance within 0.005mm, which is the most precise BB pellets in the market. Perfect surface and precise size for incredible air-seal and feeding. Bio BBs from G&G Armament are true bio degradable, well received by world market and environmental friendly sites. G&G Armament's BB pellets are well known for the best choice for high precision barrels and jam free BB pellets. Made in Taiwan and G&G Armament represents high quality BB pellets.

## G&G Armament BB Global Marketing

Our stores and outlets deal directly with consumers and provide the most direct feedback from users. The testimonials and support of players around the world are why G&G's high-quality BBs are sold worldwide.

### Airsoft Defense / Chile

[www.adeffence.cl](http://www.adeffence.cl)

We are consistent with the brand we sell, G&G. For that reason we must sell bbs. From the same brand. The quality and performance are over all others sell brand into the market. The players can pay the cost and they ask for G&G Brand if doesn't matter their replicas brand.

### AirsoftBoden / Norway

[www.airsoftboden.no](http://www.airsoftboden.no)

As for the sales, since I got the deal with G&G, the sales went really well, especially the BB's have helped a lot, as you were the first company who I got.

I am very satisfied with the very high quality of the products and the BB's. The BB's are of course the bestsellers, both the normal BB's and the BIO BB's with the 0.25g as the

### ISAV SILAH POLIGON / Turkey

[www.isavsilah.com](http://www.isavsilah.com)  
Excellent! Good Profit,  
Good Quality.

### Armaq s.a. / Peru

[www.armasperu.com](http://www.armasperu.com)

We are using G&G bbs. 0.20 and 0.25, 1 kg. pack. At the beginning we bought other brands, having constantly problem we our replicas 1) Clogged bbs. into snipers guns and 2) faulty bbs. Inside the package.

With G&G bbs we don't have any problem and the feedbacks are very good. The players are very happy with the product.

### Hristo Airsoft Trgovina

**Croatia**  
[hristo.hr](http://hristo.hr)

Good Price, Good Quality:  
excellent accuracy, no  
feeding problems.

topseller. I have a lot of happy customers who use the BIO BB's and I haven't heard one complaint of jam or misfeed that was caused by the BB. That is same for the Perfect BB's and Tracer BB's.

### Power Gun / France

[www.powergun.fr](http://www.powergun.fr) [www.powergun.fr/terrain/bois](http://www.powergun.fr/terrain/bois)

We sell G&G bbs and we sponsor a team on our field with G&G bbs. We prefer these bbs because they are less expensive and better quality than other brands. And customers using inner barrel Ø6.01 prefer G&G because they never have any clogged bbs.

### AIRSOFTZONE / Austria

[www.airsoftzone.com](http://www.airsoftzone.com)

G&G bbs feature an attractive price / performance ratio and a very high & stable quality level. We started to sell G&G bbs more than 7 years ago because it was difficult to find good quality bbs on market. G&G bbs became very popular very fast and they are still our most demanded bbs in our product line. We get very positive feedbacks. Customers always confirm the high precision and quality standard.

### Oregon Airsoft Arena / U.S.A.

[www.oregon-airsoft.com](http://www.oregon-airsoft.com)

We only use G&G bbs inside our arena because they are manufactured to be extremely reliable and the most accurate on the market. There has never been a jam in any of our guns and they have been the top sellers in our pro shop for many years. They are irreplaceable as our go-to bb. We also support the outdoor player and when it comes to reliability G&G has the best Bio BB's. When players think that their gun is having problems most of the time it's because of lower grade Bio BB's. Once we show the customer the difference between brands, they switch to G&G Bio and the problems are gone. We believe in being the best and selling the best and that is why when it comes to BB's we carry and sell the entire line of G&G BB's.

### GUN & SURPLUS PROSHOP FIRST Japan

[www.first-jp.com](http://www.first-jp.com)

Because G&G's BBs have very few bubbles inside and most of them are near center, they are very consistent. Price and quality of G&G's BBs are very competitive.

### HOBBY PLAZA BIGMAN / Japan

[www.rakuten.co.jp/mokeiyabigman](http://www.rakuten.co.jp/mokeiyabigman)

All G&G products are very reliable, it is a good brand to trust. Especially G&G's BBs are the number one seller in our store.

Because G&G's BBs are very precise, they are very popular in Airsoft competition. We also suggest G&G's BBs to our customers, it is the best seller in our shop.

**G-11-089 Multifunctional Electronic Target Ver. III - 1 PC**

Different from any other electronic target system in the market, the M.E.T. III's dome cover is the signature of this target system. [Picture 1]

The dome cover can receive hits from different angles and is made to endure more than 10,000 hits. The M.E.T. has two built-in pneumatic sensors that react to air pressure differences inside the dome cover. Therefore, energy between 0.2J~2J will trigger the sensor - light and sound effects will be activated when a projectile hits the dome cover. [Picture 2]

G&G Armament engineers design/conceive each M.E.T model differently to offer more flexibility in setting up a game with the G&G target system. Different modes can be activated by linking up more than two targets and changing the selection by pressing the start button. [Picture 3]

The first generation of M.E.T system was developed by G&G Armament in 2012. The size was more compact, there were fewer programs and feed from batteries. [Picture 4]

In 2013, G&G Armament developed the new generation of M.E.T with the size as the targets in I.P.S.C. [Picture 5], with more programs and even more challenge modes for shooters to experience and practice.

### Instant multi-function electronic target for the fairest competition

- **Immediate:** Light and sound for immediate and definite display of results.
- **Fairness:** Electronic timer can be used all types of shooting competitions.
- **Environmentally friendly:** Electronic target is reusable and durable.
- **Innovative:** Multiple targets can be linked together to create new shooting modes.
- **Expandability:** Can be connected to external speakers.
- Shooters can shoot at the electronic target from 360 degrees.
- Sensitive pneumatic sensors inside picks up long distance shots [pneumatic sensor range 0.2 ~ 2J].

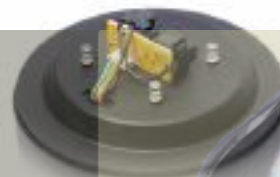

## M.E.T. UNIT

### MULTIFUNCTIONAL ELECTRONIC TARGET

M.E.T. unit is the perfect product for personal, military or law enforcement training. This is not an ordinary electronic target you could find anywhere in the market. The G&G third generation MET has increased sensitivity, 4 LEDs, volume speakers and can be mounted on a wall. An independent power source is not required when linked up to multiple units; linked units will only require one power source. The third generation has 7 game settings (previously 4) waiting to be challenged.

1

2

3

4

5

## 7 Challenge Modes

### 1) Competition Mode (default setting)

Press the start button once to select this mode. In this mode, all targets are in stand-by mode with Blue lights on. When the first target is hit, it will turn Red and all targets' light will be shut off. This mode will determine who hit the target first. Press the start button again to reinitiate competition mode.

### 2) Versus Mode

Press the start button twice to select this mode. In this mode, only the master target is in stand-by mode with blue lights on. After the master target has been hit, it will flash a blue light and count down for five seconds. Once the count-down is done, all targets will turn solid blue. The first target that was hit will turn red for five seconds and game play will be auto reset. The Master target will return to standby mode with the the blue light on and be ready for replay.

### 3) Random Mode

Press the start button three times to select this mode. In this mode, the Master target will display a blue light with the other linked targets in standby mode. As soon as the blue light is hit, the next target will be activated randomly. Once all the targets are shot, the last target will turn solid red for 5 seconds, signaling the end of the round. The unit will auto reset for the next round.

### 4) Practice Mode

Press the start button four times to select this mode. In this mode, all targets will display a blue light. The target will turn red when hit and the last target will blink red for five seconds, signaling the end of the round. The unit will auto reset for the next round.

MET crown for (4cm)  
Precision shooting (8cm)

### 5) Search and Destroy Mode

Press the start button five times to select this mode. In this mode, the shooter will be challenged by locating the target from the sound it makes. The target will display a blue light and constantly make a noise. The noise will stop and the light will turn red once the target has been hit. To set up the game for this mode, targets should be hidden or covered without being seen easily. Shooters in this mode should rely on hearing instead of sight.

### 6) Hostage Rescue Mode

Press the start button six times to select this mode. This mode is the most difficult mode for most shooters. Red light: Hostile/ Blue light: Hostage. Red light will be turn off after hit. Blue light will stay light up after hit. In a situation when last target was hit in red light, then the game will restart itself without pressing any button. However, if any target was hit in blue light during the game, then the game will not restart until the push button is pressed again.

### 7) Time Bomb Mode

Press the start button seven times to select this mode. The initial target will light up in blue. The game starts after the blue initial target has been hit, then targets will begin randomly light up. Each target will only light up for 3 seconds, if the lighted target has not been hit within 3 second time, then this target will turn in red light and game over. Timer will stop as soon as the game is over.

## Search & Destroy

G&G Armament designed the MET system to enhance the individual's shooting experience and simulate real battle situations that require agility, coordination, and fast response time.

### THE RULES FOR THE 2015 WORLD CUP SHOOTING COMPETITION

1. All contestants must be 18 years or older to participate.
2. Airline tickets and hotel accommodations are included by G&G Armament.
3. The 2015 World Cup Shooting Competition will be held in Taiwan, regional and national games will be announced in the near future.
4. All contestants must use G&G Armament's CM16 Raider S provided on site for their competition weapon.
5. Prizes are awarded to the first and second team only, not individual contestant.
6. Prize for the first and second placed teams will be wired to winners' personal bank account.
7. Only two winning teams from regional or national games are eligible to apply for 2015 World Cup Shooting Competition.
8. An entry/administrative fee for regional and/or national games will vary depending on location. All fees are subject to change with prior notice.
9. Contestants applying for the World Cup Shooting Competition must be the winner of a regional or national game.
10. All legal documents for traveling must be valid, including personal identification and passport.
11. Prize for first and second placed team does not include local tax.

[www.Guay2.com/wsc](http://www.Guay2.com/wsc)

Each contestant will carry two magazines and 120 rounds of BBs from G&G Armament, magazines and BBs will not be supplied after game starts.

#### CM16 Raider

#### [ High accuracy - Official competition gun ]

The CM16 Raider is G&G GC series' high accuracy, budget model. The gun body is made from strong and tough precision plastic for high quality and lightweight. It is equipped with RIS tactical rails so can be fitted with sights, fore-grips and lights. Competition rules however do not allow the fitting of privately-owned equipment. The length of the 6-stage extendable battery stock can be adjusted to fit the user making it suitable for close range CQB. The 120-round silent magazine is light and smooth loading. Individual competitors are issued with 2 clips. Good ammunition management is an important part of the judging on tactical performance.

G&G  
ARMAMENT

**5TH STAGE: THE FINAL MILE**

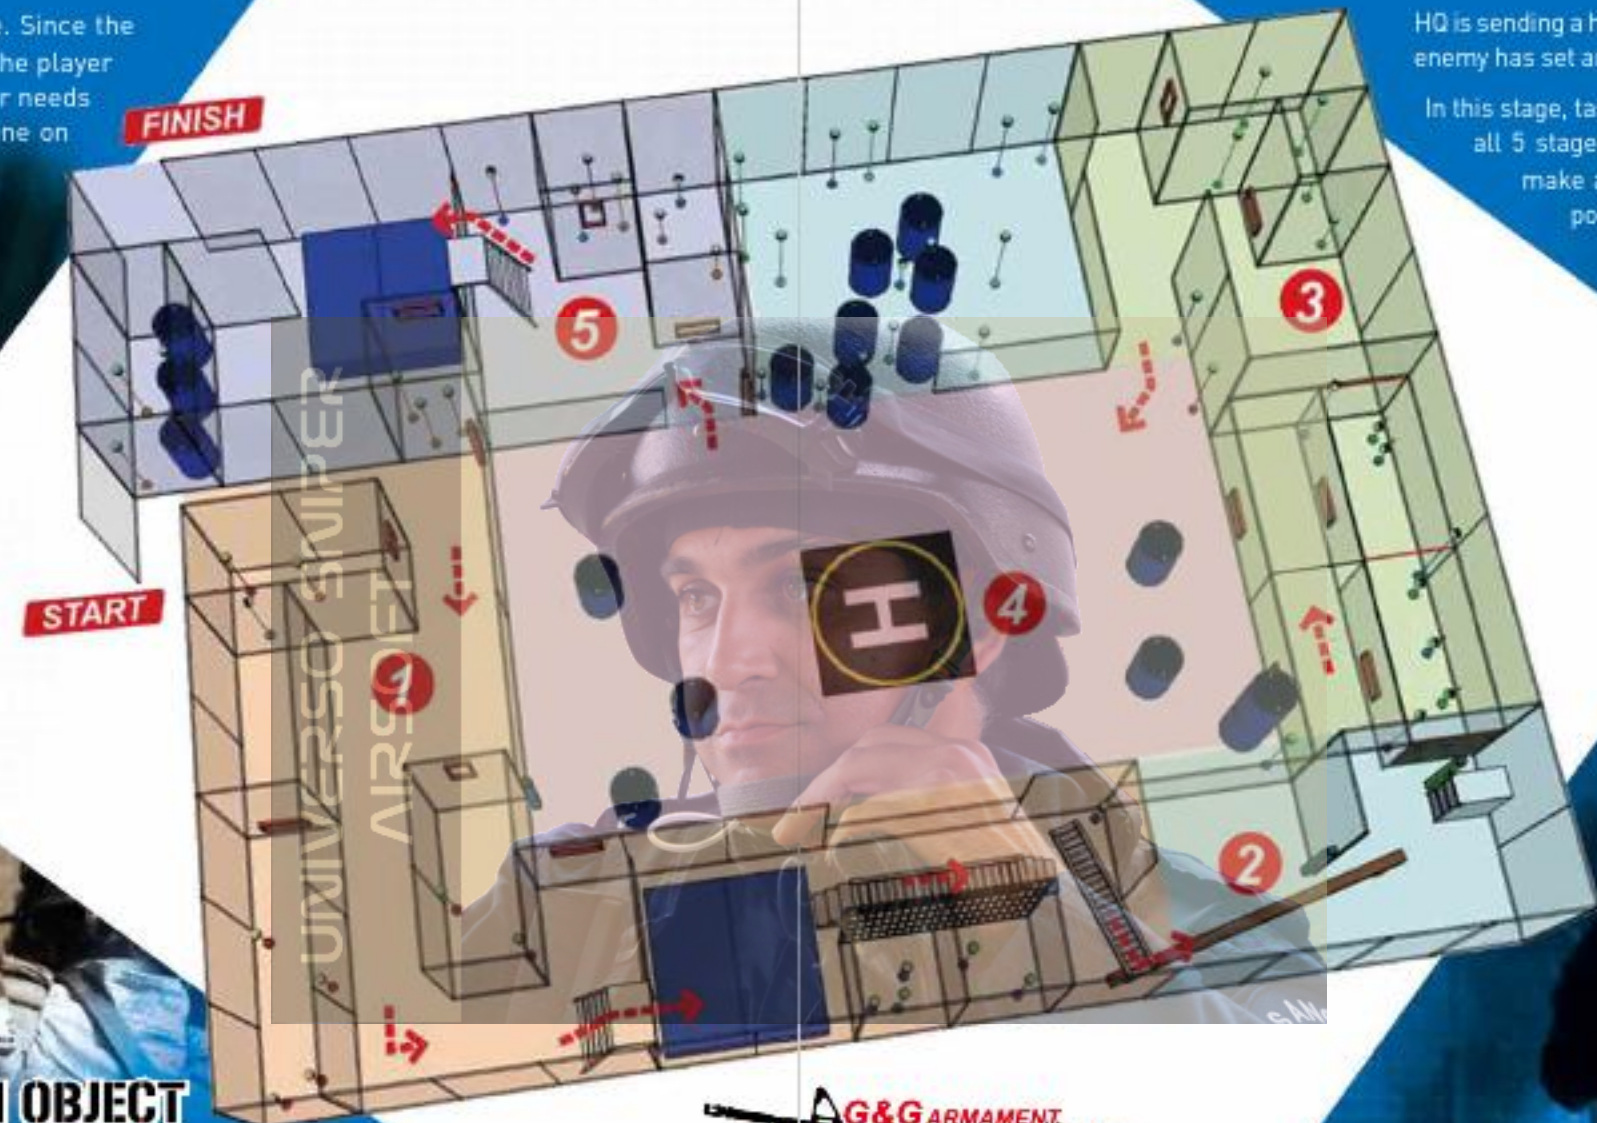

The 5TH stage is the final stage. Since the helicopter has failed to extract the player from the landing zone, the player needs to break through the enemy's line on his/her own.

**2ND STAGE: RETRIEVE MISSION OBJECT**

The Water Dungeon stage is divided into 2 parts. The front part is a normal search and destroy challenge. However, the rear part of the 2ND stage is a "Time Bomb" challenge. The time bomb challenge requires the player to eliminate each target within 1.5 seconds; otherwise,

the player will fail the mission and not be able to go any further to complete the rest of the stages. After stopping the time bomb, the player will find the mission object – a case which contains the classified document. Starting from here, the player needs to carry the case with him/ her while completing the rest of the stages.

HQ is sending a helicopter to pick up the player; however, the enemy has set an ambush at the landing zone.

In this stage, targets are hidden at every possible corner of all 5 stages. While each target lights up, it will also make a sound. The player has to find each target position by using the sound.

**HELICOPTER LANDING ZONE**

**4TH STAGE:**

**3RD STAGE: TUNNEL & INTELLIGENCE ROOM**

While passing through the tunnel, the player will find several shooting windows and each window includes at least one target.

### GKMS

GKMS is authentic enough to attract even the pickiest AK purist. The new G&G GK series are so impressive that you may believe they are real steel! These beauties feature full metal construction, with a high quality build that includes real wood furniture and durable tactical addons.

**RK47**

RK47 with beautiful real wood on the pistol-grip, stock and foregrip and metal for all the other parts of the gun including the magazine. The blowback is a nice feature, noticeable when firing the gun as you can see the charging handle rock back and forth. Great for outdoors, and with a 600rnd high capacity magazine you can bring some heavy covering fire in. A very nice gun to hold and shoot. It also has a nifty little threaded barrel at the front for your silencers and flash hiders as well as a standard AK-type sideplate allowing you to mount a russian-style optic or rail mount to the side!

**RK103 EVO**

The G&G RK103 Evo is an AK made tactical. It features a black Fibre-reinforced Nylon body, along with an abundance of metal parts such as the barrel assembly and the upper and lower receivers, and the charging handle. The blowback feature is also nice, and because all the moving parts are metal it makes a great sound when fired! Along with a large space in the rear stock for easy battery compatibility.

**RK Beta**

The G&G Full Metal RK Beta has arrived just in time. The G&G RK Beta is a good and sound gun. The full metal body acts as a foundation for the polymer stock and front hand guards, resulting in an extremely solid and realistic AEG. The front hand guard has one rail on the bottom side for vertical grips, two rails each on the left and right side for lights/ lasers and one rail on top for optics. These rail sections solve the Achilles Heel associated with most AK models, the lack of potential for accessories. This is a solid gun, inside and out, and you wouldn't expect anything less than amazing from G&G.

**ETU** G&G AK models with ETU is coming soon.

This brand new AEG based on the Russian VSS Vintorez suppressed sniper rifle. Hidden inside its awesome looks, authentic materials and unique design is some of the latest AEG technology. This gun has a quick detach stock, quick change spring, easy access gearbox, a charging handle that simulates realistic loading, a bypass switch for testing or 'dry firing', a light that indicates the power status of your battery and gearbox and can even detect whether or not your magazine is loaded into the mag-well. The pre-installed 6.03mm 430mm long barrel provides sniper-like accuracy for each and every shot of the 250 BB high capacity magazine. The GSS is an excellent choice for players seeking a unique rifle that blends the lines between long range sniper rifle and carbine length and weight.

The L85 A1 replica characterizes itself with perfect make and the faithful replication of the details of the original. Due to the fact of equipping the replica with a 22mm RIS rail it became possible to attach any optical devices to the replica. The reinforces gearbox was equipped with a reinforced main spring lead, a reinforced piston and the piston's head, the reinforced and seals cylinder's head and a sealed nozzle. The metal thread wheels are placed on 8mm metal bearings. Combined with the extended cylinder and piston it is a perfect base for power tune up of the replica.

AIRSOFT**SG552**

SG 552 is not an AEG you commonly see on the skirmish field. The receivers are made from stamped steel and attention to detail has been paid - spot weld marks, unique serial numbers, the Safe, Semi and Auto markings and the OD furniture give this gun a unique and very convincing look.

Like the real one, the trigger guard can be moved away to the left of the right to allow users with very large gloves (or hands!) to use the weapon more to their liking. It has an ambidextrous fire selector, which is important to those left handed airsofters, and the fire selector is very solid and sturdy. The folding stock provides you with great support when you need it and security locks away when you don't.

**GR14**

GR14 puts out at up to 380, making it a perfect woodland gun, but do make sure you check your local site's regulations and restrictions. The fire selector, charging handle and safety, as well as the barrel and other pieces feel great, being

metal, and the charging handle makes a hell of a sound when locked and then released. The sights are all adjustable, and with a 470 round mag you can switch from sniping to support fire as quickly as you can switch the fire selector. It also has the ability to take a silencer or a different flash hider if you wish.

The G&G G980 Full Metal Real Wood Bolt Action Airsoft Rifle is take on a KAR98 replica and is constructed entirely out of metal and real wood. It is a CO2-powered, bolt action rifle, and adding even more to the realism, it comes with two 9-round magazines, much like the round capacity on its real steel counterpart. The metal rear sight is adjustable, allowing the user to make sure that their long range shots are on point, and being that it is gas powered, the bolt is incredibly easy to cycle. A leather sling is also included in the box, serving to top off the overall look of the gun.

The MG 42 (shortened from German: Maschinengewehr 42, or "machine gun 42") was a 7.9mm general purpose machine gun that was developed in Nazi Germany and entered service with the Wehrmacht in 1942. It supplemented, and, in some instances, replaced the MG 34 general-purpose machine gun in all branches of the German Armed Forces, though both weapons were manufactured and used until the end of the war.

## GM1903 A3

The G&G Real Wood GM1903 A3 Gas / CO2 Rifle Airsoft Gun is a solid replica of the famous Springfield 1903 A3. The bolt action is smooth to cycle and the gun fires beautifully. Two front and a single rear sling point allow you to make use of a two point sling system as issued in World War 2. The functional safety, bolt assembly, bolt, barrel, sling points, and iron sights are all made of metal. The bolt is removable for easy cleaning the firing pin is extremely realistic. A hidden hop up adjustment knob allows you to adjust the BB's flight trajectory. One of the most interesting standout features of this gun is the dual purpose Co2 / Green gas Magazine. The 9 round magazine that comes with the gun is capable of using Green Gas or a single 8 gram Co2 cartridge.

## M1 Garand

The M1 Garand (officially designated as United States Rifle, Caliber .30, M1 and later simply Rifle, Caliber .30, M1, and also abbreviated as US Rifle), was the first semi-automatic rifle to be generally issued to the infantry of any nation. The M1 was used extensively by U.S. forces in World War II, the Korean War and to a limited extent, the Vietnam War. Most M1 rifles were

issued to Army and Marine troops, though many thousands were also lent or provided as foreign aid to America's allies. The Garand is still used by drill teams and military honor guards. It is also widely sought by the civilian population as a hunting rifle, target rifle, and military collectible.

**GK5C**

The GK5C features a clever mechanism at the hand guard, whereby the balck lever is pushed released the side of the plate. It fits a crane stock Lipo battery with no problem, and changing the battery is a snap!

The front end also features plenty of rails, some hidden, to attach any flashlights, lasers, PEQ units or anything else you can think of to the front end!

Moving backwards, the foldable and adjustable stock makes this gun very comfortable, and unlike other guns, the stock is perfectly solid.

UNIVERSO SNIPER  
AIRSOFT

**GF85**

GF85 is G&G's version of the Swedish version of the FN FNC. It takes 450 round M4 magazines, this gun is certainly something practical that isn't also bog standard. It has a folding stock, for versatility, it has metal upper and lower receivers and a plethora of other metal parts including the barrel assembly and charging handle, and is generally finished very nicely.

The foregrip is easy to take apart, held in place by a clip at the front. It will accommodate anything up to a mini Ni-MH, but it won't quite take a large Ni-MH. It definitely will fit almost all Lipos though, leaving you with an increasingly versatile gun.

## G&G M.I.T. Unit Now!!

### G&G Military Intelligence Tracer Unit

G&G Military Intelligence Tracer Unit, short M.I.T Unit, was developed to fulfill the needs of military or law enforcement training programs in using Airsoft replicas as they are cleaner, cheaper and easier to maintain. However, the shooting range of the Airsoft replica is limited due to its nature. Most Airsoft replicas can only hit the target within 50 meters. By installing the M.I.T Unit to an Airsoft replica, the fire range can be increased up to 150 meters.

M.I.T accommodates multiple functions, like a tracer unit, a visible laser | laser function has to be used with G&G Battery Box w/ Laser Pointer), a BB counter and a chronometer to calculate the muzzle velocity. It is designed as a silencer so the M.I.T. Unit can be fitted to any airsoft replica that comes equipped with a threaded barrel.

The most interesting feature copies the concept of the MILES (Multiple Integrated Laser Engagement System), which is used by the US military for training. The MILES is basically a laser tag system, where the laser is activated by blanks being fired from the rifle. The M.I.T Unit functions very similarly. A sensor within the unit detects when a BB is fired and activates a short laser pulse, which would then activate sensors worn by other players when hit.

50  
M

150  
M

G-01-039 (Black)  
G-01-039-1 (Desert Tan)  
**M.I.T. Unit**

G-12-027 (Black)  
G-12-027-1 (Desert Tan)  
**G&G Battery Box w/ Laser Pointer**

The target sensor could then signal the hit with sound and/or light. In other words, M.I.T Unit will not transform an airsoft gun into a laser gun because if a player runs out of BBs, the M.I.T Unit would not be activated. Therefore, players need to manage the consumption of their ammo. It's more realistic. In sum, the basic idea of M.I.T Unit is to combine laser tag with airsoft, so that the advantages of both worlds can be utilized. At close distances the game would be the same as usual but beyond the maximal effective range of the BB pellets of roughly 50 m, encounters would still be possible up to around 150m.

## G&G M.I.T. Helmet, Sensor Vest Now!!

On top of the sensor helmet is a quick-release laser receiver. The receiver has sensors on four sides that allow the player to shoot from the top, front, left and right. The grid pattern on the front and back of the sensor vest can detect coded laser pulses to determine a hit. The signal is then transmitted to the helmet receiver to trigger flashing lights and noise. The hit player is then declared "dead", eliminating any disputes.

Other styles of the sensor vest are available for players to choose from.

6 GR16 BB SERIES

## GR4 G26

The GR4 G26 Electric Blow Back Airsoft Gun has a tried and true full polymer body, just like G&G's famous Combat Machine series, and G&G has really stepped up the ergonomics of this gun to make it more comfortable for the user. The gun features a hand guard that is made of High Quality Polymer with a wide grip and a large, easy to access battery compartment that can easily store your battery, a front that folds easily back into the rail system, as well as a retractable stock with an extremely comfortable cheek pad along with an easy-to-open tubular compartment that is perfect for storing extra optics/ flashlight batteries as well as tools. G&G even offers a red laser sight and bright LED light.

**GR4 100Y Folding PBB**

GR4 100Y folding has a nice folding stock. The folding stocks makes this gun perfect as a backup and when slung. Lifting it, folding out the stock and aiming can all be done in one fluid motion. When the stock is folding it stays out of the way and sits just below the RIS, at a nice angle, and renders the gun a mere 52cm long!

**GR15 Raider**

The GR-15 Raider is perfect for COB - with the 6 position crane stock fully retracted it's only 67cm - and is also great for those with longer arms when fully extended. It features a full metal RIS with a heap load of real estate for lights, lasers and fore grips. It also has a 14mm negative thread for a myriad of silencers and flash-hiders.

Here's a rather interesting take on the G26, all black with purple mixed in! This G&G version of the enormously popular M4 is the perfect entry level AEG for those who are braver than most. The body is made of a lovely fibre reinforced nylon, which means that it is very light, meaning you can carry it around all day and show everyone your fabulous new pink gun.

**Chione 16**

The most striking feature of this gun is that it has white furniture - a real eye catcher, and not something you see often on the field even on snowy days! [Chione is from the Greek "Xion" meaning "Winter"]. The body is made of fibre reinforced nylon and various metal parts, including the barrel, rear sight, charging handle, trigger, sling hooks and other pieces, and it is also very sturdy to hold.

## Double The Speed, Double The Fun!

Introducing 2015 Firehawk HC05 from G&G Armament.

In 2014, G&G Armament released Firehawk, a perfect CQB rifle with an aggressive look and intimidating sound from the muzzle. In 2015, G&G Armament bring you Fire Hawk HC05, not only loud and aggressive, but deadly. With a rate of fire of 29 rounds per second, no prey will escape from the Firehawk HC05.

**Firehawk**

With an extremely short ris combined with a 6 position G05-V2 stock you really can manoeuvre the Firehawk easily around corners. It also comes with the G&G sound amplifier. The two notable new features are the inclusion of a working charging handle that will allow an easier access to your hop unit as well as a beautiful gun metal grey bolt cover that really does add a bit of extra charm to your rifle.

**CM16 SR Series**

CM16 SRS/ L / XL comes with 7" / 9"/12" CNC machined rail system with hard-anodizing finishing to improve the durability and quality. Back-up iron-sights can be fold/unfold, remove or change position when necessary. Design of the receivers are inspired by "Billet" type design, but made of high strength plastics to offer users a light weight and tough replica. The new CM receiver is designed with ambidextrous magazine release button and charging handle for left-hand users or in certain situation when users need to be use left-hand shooting. Gearbox of the G&G's combat machine in 2015 also pre-installed with electronic trigger module and MOSFET from the factory to solve the problem from rapid fire under semi-auto. Those exciting features will be included in new combat machine family.

**CM16 R8**

The CM16 R8 is based off the many mid length carbines which are fast becoming very popular in real steel shooting. The R8 is very light and easy to manipulate thanks to it's fibre reinforced nylon body. There is more than enough rail space on this rifle to accommodate whatever accessories you need. Included in the package is one of G&G's sturdy red dot sight's to get you on target quickly.

**CASH PRIZE!**

Deadline **Sep.9<sup>th</sup>.2015**

# SHOW YOURSELF 2014

## Photo Contest

The G&G "Show Yourself" international photography competition has years of history. Every year, outstanding entries from around the world compete together for high-cost and great value prizes.

Works that receive a distinction may also feature in the G&G yearbook, catalog and desktop calendars. Showing your work to the world is a great way to show off yourself. Top Russian photographer Roman Kanin, winner of multiple high-ranked finishes over the years, has become a favorite with many airsoft teams due to his skill and performance. They now specifically ask him to help the team preserve great memories and he has won prizes as well. Judging for "Show Yourself" is carried out by the G&G based on a variety of scoring criteria of which the online voting is just one part. Though this prevents concerns over vote rigging, we still present works that enjoy a high number of online votes with the Most Popular Award. This very fair judging scheme has won the praise and encouragement of most competitors as well.

## Show Yourself 2014 Winner Announcement

## G&G Interview with Roman Kanin

### The Perennial Winner of "Show Yourself"

G&G will now introduce Roman Kanin (Russian: Роман Канин) who has been an enthusiastic competitor in the "Show Yourself" international photography competition for many years and a winner of many prizes. Let Roman show himself now!

NAME ■ Roman Kanin (Russian: Роман Канин)

Country ■ The Russian Federation City ■ Tambov

Roman Kanin's first entry and silver medal winner

■ How did you find out about the G&G Show Yourself photography competition? When did you start competing?

I heard about it from a friend 5 years ago and I didn't expect to win when I entered. To my surprise, I came in 2nd place. I've entered and won prizes in the photography competition every year since then.

■ What's your motivation for entering the photography competition?

Right now, I enter the competition to show people new or interesting things. These include new airsoft teams, new shooting locations, new stories or new emotional performances.

■ How did you find an airsoft team for the shoot?

I've known the GERONIMI airsoft team for a long time. It was my first shoot with the Black Devils airsoft team. I am always looking for people or airsoft teams to feature in my photos. Being able to set up a shoot on my own terms is really cool. I spend a lot of time working on the details such as observing military equipment and weapons.

■ Your previous competition entries all have a certain setting and theme. Can you share with us how you chose those settings and themes?

In every competition, I tried to tell something new... A new story, a new player, a new shooting location etc. The storyboard, setting and story then grew out of this.

## Roman Kanin Award

2011	Roman Kanin (Silver Prize) Geronimo (Gold Prize)
2012	U.S.S.R. (Special Prize) Roman Kanin (Special Prize) Geronimo (Gold Prize)
2013	Z-Team (Special Prize) Mochalin Gngoriy
2014	Roman Kanin (Gold Prize) Geronimo (Silver Prize) The Black Devils (Bronze Prize)

■ Did you run into any difficulties or funny stuff during the shooting?

A lot of funny stuff always happens. The shooting is always full of laughs. To get the characters in the mood, I sometimes reshoot the same shot repeatedly and give them many missions. Sometimes, to get a good location, we must travel a long way away or study how to get the effect of a spinal injury across. These difficulties add worth to the photos and make them more satisfying.

■ Can you share with us how you prepared for the shooting?

I spent a year preparing photos for the competition. I am always scribbling down ideas, sketching out drafts and looking for shooting locations. Unfortunately, health reasons meant I didn't get to shoot all of the planned photos. I am sure I will have the photos ready by the 2015 photography competition however.

# YOUR GREATEST GLORY 2014

## Video Contest

The popularization of smart phones and video cameras provided airsoft players and image enthusiasts with new creative possibilities, resulting in the "Your Greatest Glory" short video competition. Players could record their most direct interactions with teammates and enter the competition. Many players even held over-night meetings and discussions with their friends before taking several days to shoot and edit the video. These all made for an unforgettable challenge.

The prize for the best advertisement was a return ticket to Nuremberg to attend the award ceremony at the IWA G&G booth. There was also a free night's hotel accommodation, and US\$10,000 in prize money! Other awards such as "Best Video", "Best Creative Video" and "Distinction" also qualified for prize money, guns and international fame... Nobody said that this competition was going to be easy but it was definitely the best chance to build friendships and win both fame and fortune.

## Your Greatest Glory 2014 Winner Announcement

**Best G&G Commercial Award USD \$10,000 Winner**

[Precision & Skill] Mathias Lönnström / Finland

[Game of Gods] / Ignacio Arauz

[Get Out] Eduardo Hernández Garza / Spain

[Movements] Marcin Maternik / Poland

[The Right Way] Mihail Yuriev / Ukraine

[Mission Critical] R. Kelly / USA

**YOUR GREATEST GLORY 2014**  
Video Contest

**[Cadence]** Sylvia Vivanco / Spain

■ What is your motivation to participate in this contest?

I really like creativity and I love contests. Apart from all this my husband plays airsoft and loves G&G. Also competing with my husband in creativity, jejeje

■ From where did you know about G&G Your Greatest Glory Video Contest?

My husband won last year one prize and I decided to participate this year by myself.

■ What was the inspiration to the idea of your video? How did you draft the whole scenario?

Since G&G Armament announced the Video contest for this year, I was trying to get an idea to convince myself... but I didn't get it! Someday my husband arrived from Madrid with a G&G Catalogue, because he wanted to buy a new replica model, my husband was hesitant... then got it! I was very excited, and liked because I'm realistic and G&G products have very good quality and variety. The idea was born.

**YOUR GREATEST GLORY 2014**  
Video Contest

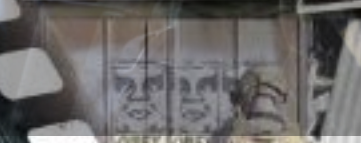

**[GERONIMO Airsoft Team]** Roman Kanin / Russia

■ What is your motivation to participate in this contest?

I had long planned to take part in the contest video, certainly wanted to win, and win a prize!

■ Could you please share your experience during this contest?

When preparing to shoot a lot of time rewriting the script, painted scenes, selected the location for filming, had to take 5 days and it was the most difficult shooting with children, which can be seen in the beginning of the video.

**YOUR GREATEST GLORY 2014**  
Video Contest

**[Overwatch]** R. Kelly / U.S.A.

■ What is your motivation to participate in this contest?

I love making videos and I love airsoft. Powers combine.

■ What was the inspiration to the idea of your video? How did you draft the whole scenario?

We draft ideas according to our assets. In this case, we knew we had a field with a forward operating base we could shoot at, so we scripted the idea around that base. The idea came to me when I was trying to think of the worst-case scenario for a sniper team.

■ Which part is the most difficult for you when filming for this contest?

The greatest adventure was begin upload the video five hours before the end of the deadline, but we're travelling. Suddenly when I was 20% of the internet upload stopped working in the hotel so we had to run to a McDonald's that opened 24 hours to use the internet, in a brutal cold weather. In the risk portable hard drive fell to the ground, at the time and thought it was over... it broke... lost everything, but kept going for a while. So sitting outside the McDonald's we uploaded the video 1 hour before the deadline... at once sent, the hard drive never worked again. The truth the good luck was with us.

■ What was the inspiration to the idea of your video? How did you draft the whole scenario?

I wanted to make a movie about people and the treat this term, about giving them this game.

■ Your feedback/suggestion about this contest.

I enjoyed it! There were many participants with interesting works.

■ Which part is the most difficult for you when filming for this contest?

The most difficult to come up with an idea!

■ Your feedback/suggestion about this contest.

Great contest. Lots of fun. Really encourages activity and a shared vision among players.

■ Which part is the most difficult for you when filming for this contest?

Shot coolies and story. We're always tweaking the story to make sure things are fluid and plausible.

■ If in one sentence to describe G&G, what's began would you describe?

Deadly accurate, but not deadly.

## FAIRS WITH G&G IWA IN GERMANY

The IWA Outdoor Classics show held in Nuremberg, Germany, is over 40 years old. G&G attends every year at great effort and in recent years have expanded our show activities to include the award ceremonies for short video and photo competitions as well as new product conferences. This has attracted a great deal of media coverage at the show. G&G also generously gives away many great gifts through prize draws and quiz games on the day to attendees, generating much excitement.

The 2014 booth features a glass façade with the METII 25-cell square and echolocation game modes to let consumers experience the variety and scalability of our products. This drew a very large audience.

## FAIRS WITH G&G

### SHOT SHOW IN U.S.A.

SHOT Show is the largest trade show of its kind in the world and the fifth largest trade show in Las Vegas, it features more than 1,600 exhibitors filling booth space covering 630,000 net square feet. Every year G&G Armament attends SHOT Show to display the latest and greatest for the upcoming year. 2015 was no different, G&G Armament introduced their new Combat Machine line and WWII

2015

replica guns for this year. Lastly, G&G Armament showcased its new 25 M.E.T. 3 (Multi-function Electronic Targets) rack along with its M.I.T. (Military Intelligence Tracer Unit) to Law Enforcement and Military personnel for training use. With a better booth location that drew more foot traffic from previous years to completely new re-design Combat Machines, G&G Armament is setting the industry standard for 2015.

**G&G ARMAMENT**  
AIRSOFT GUNS & ACCESSORIES  
[www.Guay2.com](http://www.Guay2.com)

In order to endow the guests with a deeper impression of Taipei, they were taken on a walking tour in the Xinyi shopping district to appreciate the omnipresent medium for large-scale land art, and they gleefully took pictures with the LOVE Land art. The fountain on the sidewalk is also a great place to stop and take photos. Featuring an abundance of department stores, hotels and stylish restaurants, the Xinyi shopping district is known as the most valued district in Taipei City. The Taipei 101 Mall is the first international shopping center in Taiwan and the most ambitious construction project in the history of domestic architecture, with 101 floors above ground and 5 floors underground inside the 508m tall building. The players took the world's fastest elevator to the indoor and outdoor observation decks on both 89F and 91F in order to take in the panoramic view of Taipei City.

G&G Armament's customer reward tour took place during September 1-5 this year. Simply register the round tag attached to your G&G airsoft gun online for the "Free Trip to Taiwan" event, and, every month, you will have a chance to draw airsoft guns and win the grand prize - a free trip to Taiwan. The itinerary meticulously designed by G&G will take you traveling from northern to southern Taiwan to visit major scenic attractions; not only is the high-end food, accommodation and transport absolutely free, you also get to visit the G&G headquarters! Let players from the second Free Trip to Taiwan event and store representatives take you on a journey to the beautiful island of Formosa - Taiwan!

First stop on the itinerary: the National Palace Museum. It is not only the largest museum in Taiwan, but also the epicenter of research on ancient Chinese art history and sinology. At noon, the entourage walked to the Silks Palace at the National Palace Museum to enjoy an exquisite Chinese-style lunch.

Elias curiously tasted the fragrant, sweet and refreshing Taiwanese tea.

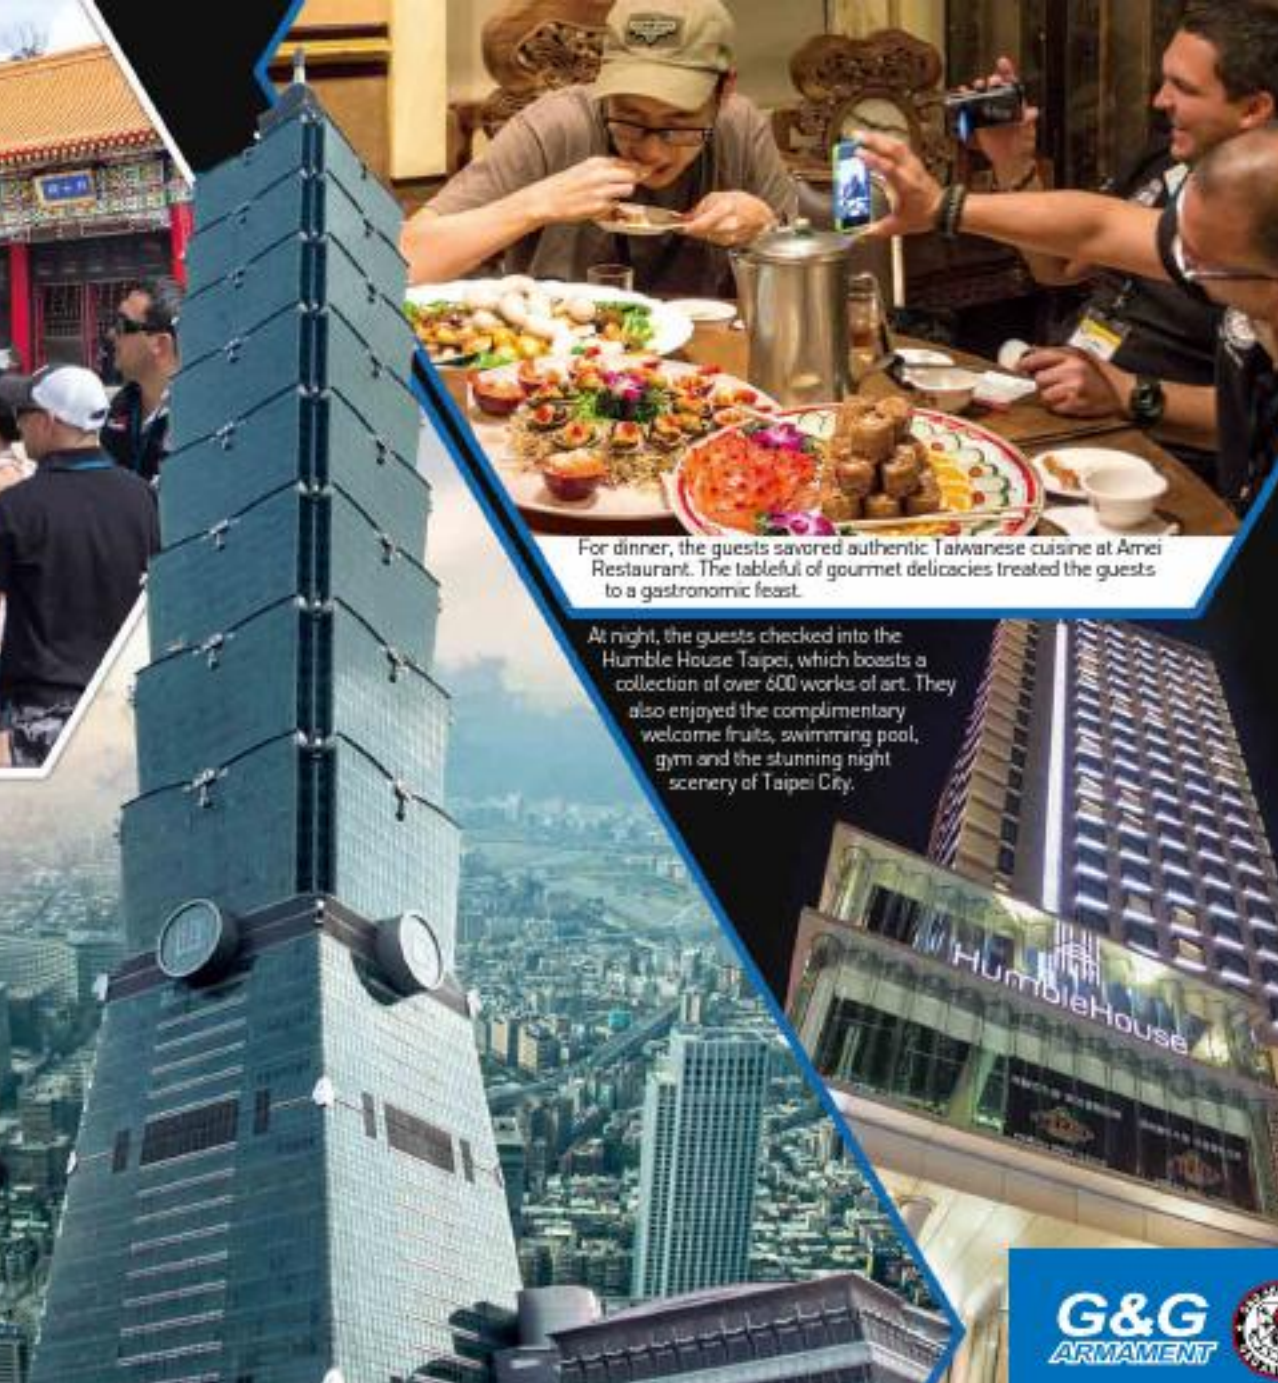

The second stop was the Martyrs' Shrine, which was created to commemorate fallen heroes who sacrificed their lives for their country.

For dinner, the guests savored authentic Taiwanese cuisine at Amei Restaurant. The tableful of gourmet delicacies treated the guests to a gastronomic feast.

At night, the guests checked into the Humble House Taipei, which boasts a collection of over 600 works of art. They also enjoyed the complimentary welcome fruits, swimming pool, gym and the stunning night scenery of Taipei City.

**G&G**  
ARMAMENT

Free trip to Taiwan DAY 2

The guests viewed a 30-minute film documenting the story, culture and history of the citizens of Taipei on the rotating screen of the Taipei Discovery Center. In addition, everyone had a great time at the "Popular Fortuneteller-the Lot-casting Machine".

DingTaiFung Dumpling House is famed for its cuisine across the world. Plump pork XiaoLongBao, which is the signature dish of the restaurant. Ninoslav, who is curious about different cultures, learned how to taste the food by following the instructions. He also jotted down his afterthoughts and key points.

"Treat customers like they're the most important people in your life", Wang Steak's premium steak was the ideal choice for the players' dinner.

G-CQB+OUTDOOR Experience

G&G presents heartwarming guest-exclusive gifts

Visiting G&G Headquarters in Changhua

After lunch, everyone was ushered to the most eagerly anticipated location— G&G headquarters —and CEO Liao led the entire staff in welcoming the guests at the main entrance. After entering the conference room, the myriad G&G airsoft gun collections caught the players' attention, and they quickly snapped away on their cameras. After listening to the G-CQB briefing, they immediately took the CQB+OUTDOOR and position identification challenges by listening and with 25 matrixes. The real-time score display not only spiced up the competitive ambiance, but also boosted everyone's morale. Before leaving the G&G headquarters, the players took a group photo with the entire staff, and G&G also presented them with exclusive gifts. The players proceeded to the next destination on the itinerary with huge grins on their faces.

The foot massage after dinner served to release the fatigue of the guests after a whole day of traveling.

At night, the guests checked into the first five-star hotel in central Taiwan - Millennium Vee Hotel Taichung.

## 廣興紙寮

The first stop of the day was Taiwan Paper, where the narrator explained the papermaking process in detail. Thereafter, the players experienced papermaking DIY and woodblock printing using their favorite motifs. The next DIY activity they performed was making folding fans; everyone followed the instructions attentively, and after the folding fans were completed, each person posed for a photo with their creation. Taiwan Paper is the only paper mill in the country that combines cultural preservation with tourism development. Originally a traditional paper mill, Taiwan Paper subsequently evolved into a tourist factory and a local tourist attraction offering educational activities inspired by different stages of papermaking such as forming, pressing, drying and printing.

Purely handcrafted and personalized Chinese folding fans.

The players jointly squeeze excess water from the paper to complete the handmade paper.

The serene landscape of "Dual Yan AKizuki" at Sun Moon Lake is listed as one of the eight wonders of Taiwan. The name incorporates the Sun Moon Lake, which is famed for its picturesque sceneries. The Sun Moon Lake is the second largest lake and the largest natural lake cum hydroelectric reservoir in Taiwan. The guests boarded a boat which ferried them to the small island in the center of the

The Wen Wan Resort Sun Moon Lake is located at the highest point of Hanbi Peninsula, which was formerly the most prominent residence of Chiang Kai-Shek. Overlooking the Sun Moon Lake, the resort offers pleasant, picture-perfect views. Such an irreplaceable location is the ideal venue to enjoy lunch, and the players felt reluctant to leave as they were surrounded by beauty and gourmet delicacies.

At night, the guests stayed at the Hotel Del Lago, which boasts a front row view of the stunning Sun Moon Lake.

The serene landscape of "Dual Yan AKizuki" at Sun Moon Lake is listed as one of the eight wonders of Taiwan. The name incorporates the Sun Moon Lake, which is famed for its picturesque sceneries. The Sun Moon Lake is the second largest lake and the largest natural lake cum hydroelectric reservoir in Taiwan. The guests boarded a boat which ferried them to the small island in the center of the

lake, where they hiked the mountain trail to the renowned Kuanguang Temple to admire the magnificent scenery. The stone carved with the words Sun Moon Lake is a popular place to take photos, and people often squabble for the opportunity to take pictures with the stone. The stone is thus playfully known as "fighting rock" by locals. The players also put on fighting postures just for fun.

In the evening, everyone visited CartonKing to view various functional, creative and interesting products made from corrugated paper.

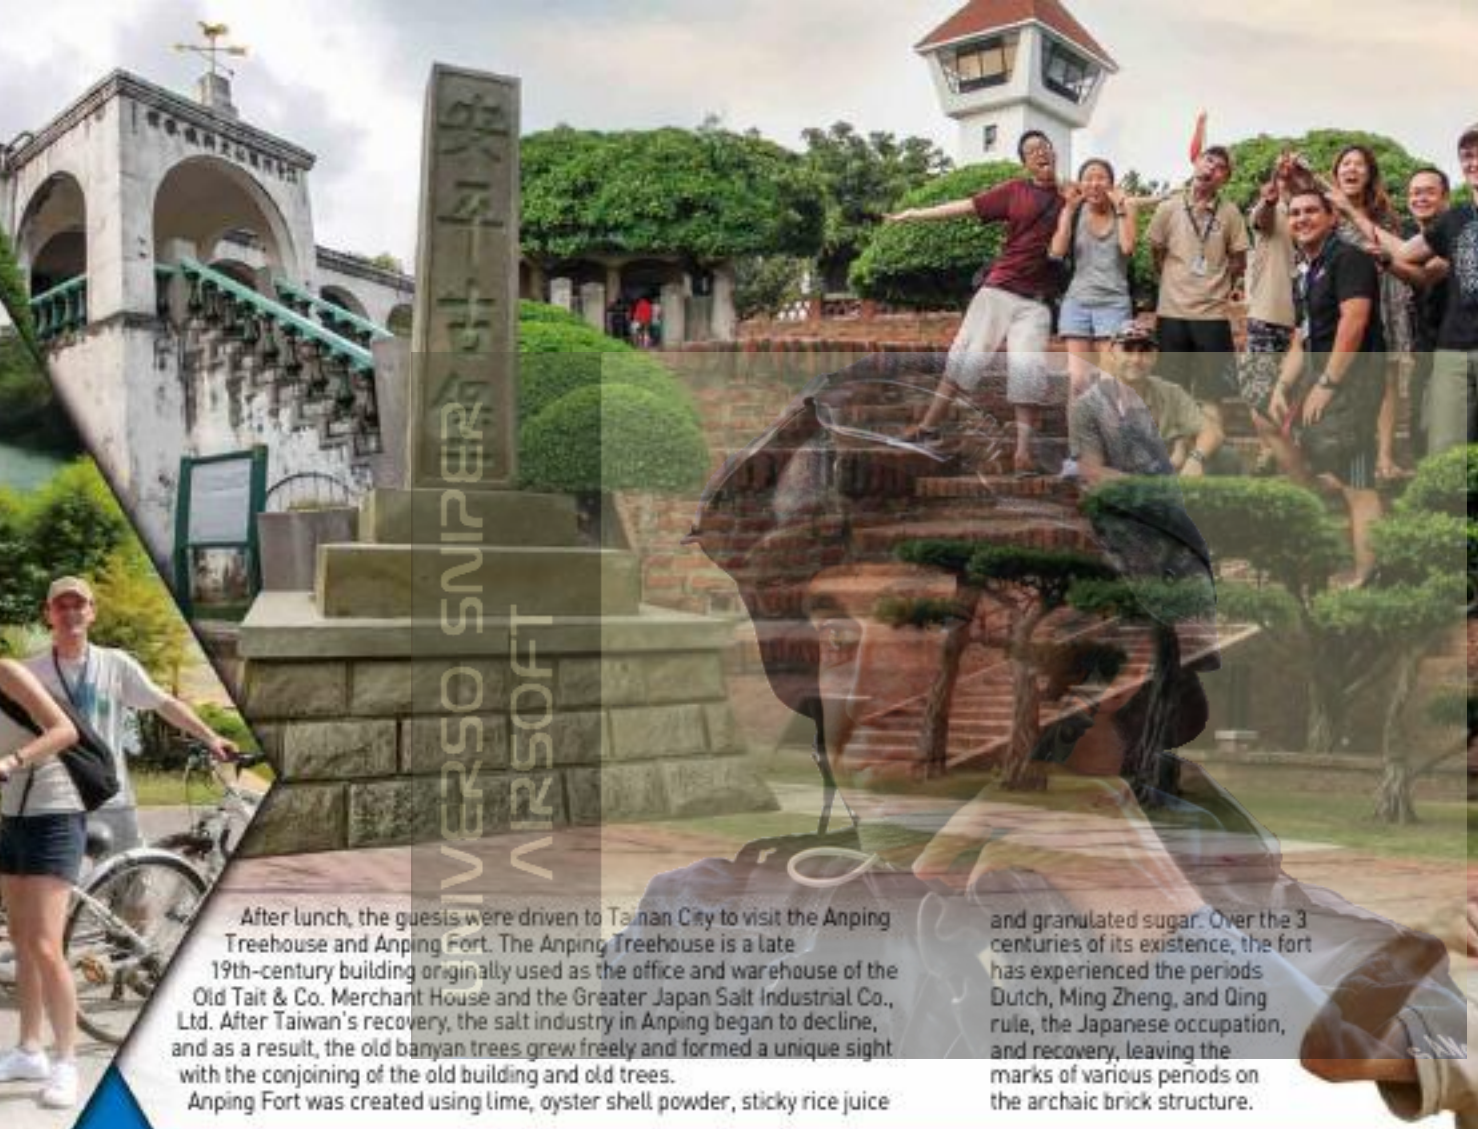

# Free trip to Taiwan

DAY 4 2

After enjoying the hotel's sumptuous breakfast, the party hopped on bicycles to leisurely tour the splendid lakeside landscape of Sun Moon Lake. The 3D introductory film at the Xiangshan Visitor Center endowed everyone with further knowledge about Sun Moon Lake.

Xiangshan Visitor Center

After lunch, the guests were driven to Tainan City to visit the Anping Treehouse and Anping Fort. The Anping Treehouse is a late 19th-century building originally used as the office and warehouse of the Old Tait & Co. Merchant House and the Greater Japan Salt Industrial Co., Ltd. After Taiwan's recovery, the salt industry in Anping began to decline, and as a result, the old banyan trees grew freely and formed a unique sight with the conjoining of the old building and old trees. Anping Fort was created using lime, oyster shell powder, sticky rice juice

and granulated sugar. Over the 3 centuries of its existence, the fort has experienced the periods Dutch, Ming Zheng, and Qing rule, the Japanese occupation, and recovery, leaving the marks of various periods on the archaic brick structure.

The guests spent the evening at the Tayih Landis Hotel Tainan, the first five-star international tourist hotel in Tainan City featuring 315 luxury guestrooms and multiple restaurants. The hotel is equipped with fusion cuisine restaurants and a fitness center, swimming pool and bar. For nighttime recreation, the guests visited the department store and bar and took advantage of the hotel's comprehensive facilities.

Dusiaoyue Danzhi Noodles in Tainan are prepared using smooth, aromatic and chewy oil noodles and are served with a variety of old-fashioned flavored Taiwanese delicacies. The players thoroughly enjoyed the scrumptious feast. On that day, we also encountered many foreign tourists who traveled from Hong Kong, Japan and the US to taste the local flavor, making it an iconic gourmet destination in Taiwan.

The night market is a unique feature in Taiwan, when the players visited the largest night market in Tainan, Flowers Night Market, Adrian, who practices shooting regularly, took home a giant stuffed toy in no time. He also shared his joy with his fellow players.

# Free trip to Taiwan

DAY 5 2

For the historic monument tour on the next day, they visited Wude Hall, the Confucius Temple and Chihkan Tower. The historic monument-inspired souvenirs proved to be very popular among the players. According historical accounts, the construction materials for Chihkan Tower were shipped to Taiwan from overseas by the Dutch, and it was named Fort Provintia, built after the Han Chinese revolt against the Dutch. The historically and culturally meaningful architecture is classified as a class-one national historic monument in Taiwan.

Player Carlos from Miami, US won a spot on the Free Trip to Taiwan because he purchased a G&G gun. During his visit he became acquainted with many friends. According to Carlos, if you want to win amazing prizes, just buy G&G guns!

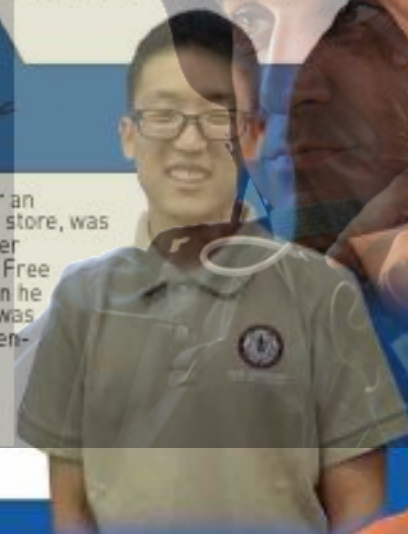

Free trip to Taiwan  
Become G&G's Winner

More information please contact  
or visit [www.guay2.com](http://www.guay2.com)

Elias, a G&G shop owner in Miami, was glad to travel to Taiwan with his clients. The visit to G&G headquarters was a tremendous educational experience for him. He reminded everyone to register the tags on the G&G guns they have purchased!

Paul, who works for an American airsoft gun store, was able to join his customer because he had won the Free Trip to Taiwan with the gun he had purchased. He said he was excited to see the comprehensive gun lineup at G&G headquarters, and it was truly a memorable experience for him.

Malaysian player Wee owns 3 electric airsoft guns from G&G. He said that Taiwan is such a wonderful place and that he will definitely bring his wife to visit Taiwan in the future.

Carlos from Brazil formed an airsoft team to practice in the field during the holidays. His purchase of G&G's CM16 won him the free trip to Taiwan. His most unforgettable memory is the G-CQB activity, which he found to be extremely interesting. With a big smile on his face, Carlos said he also purchased a gorgeous cell phone in Taiwan.

wish you and your company a prosperous and prolific year and look forward to come back to visit you. Best regards.

For Ninoslav from Croatia, his favorite part of the itinerary was the visit to G&G headquarters, where he was able to discuss the characteristics of various guns with our colleagues and offer his feedback. According to him, he was deeply impressed with the G&G staff, who attentively listened to consumers' feedback and opinions.

Lucky Benjamin participated in the event and won 2 G&G guns, one of which allowed him to win the Free Trip to Taiwan. He indicates that Taiwan is a beautiful country with hospitable people, and G&G's G-CQB game is extremely entertaining! He also reminded G&G gun owners to register online and win the magnificent trip.

Thanks for the nice & helpful experience. Enjoy your sport! David, USA

TO: Mr. James Liao and all the G&G Family. Please accept this present as a token of appreciation for all the attentions to our group, we are very pleased to say that this was an amazing experience and that we are grateful for the opportunity. Thank you very much for this invitation to your beautiful country, we wish you and your company a prosperous and prolific year and look forward to come back to visit you. Best regards.

Tribute from the winners of the 'Free Trip to Taiwan' event

This small present to you and your family is just a humble way to thank you for everything you've done for me and my customer (Carlos Palma). There are no words to describe how pleased, grateful and happy we are with the experience we had with this trip. It was the opportunity of a lifetime for us and we really appreciate all your attentions. I also take this opportunity to Thank Amanda Liao, your US Representative, as well as all your team for all their gestures and attentions. I am proud to be your dealer and very happy with all your products and look forward to become your main distributor for Latin America in the future. Thanks again for this amazing opportunity. I look forward to visit your beautiful country again soon.

The final destination on the itinerary was the Miramar Entertainment Park in Dazhi, where the guests dined and took a ride on the first 100m-diameter Ferris wheel in Taiwan.

The G&G specialty store in Shilin Market offers a large selection of guns and accessories, and this is where the players handpicked their favorite products and returned home with full luggage.

UNIVERSITY OF SCIENCE

## Project 123

There are 13 different kinds of G&G stickers in the package and once you receive those stickers from your G&G distributor, or us, you just need to :

- 1 Post at least 5 different G&G stickers in any public space of your office/shop/working area and take pictures of them.
- 2 Complete the G&G survey.
- 3 Email 5 pictures, the survey, and your company logo in JPG file (more than 300KB) to [support@guay2.com](mailto:support@guay2.com). After completing this step, you will receive all the items on the following page.

P-06-001-3

G&G ARMAMENT

P-06-001-1

[Flags] P-06-001-1 (120X80 cm)  
P-06-001-2 (200X65 cm)  
P-06-001-3 (150X120 cm)  
P-06-001-4 (360X75 cm)

P-06-001-2

P-06-001-4

[Maintenance Box] P-06-001  
VALUE: \$200 MSRP!

When you finish Project 123, G&G will display your store information on the G&G's official website, [Guay2.com](http://Guay2.com). You will also receive the following promotional items.

Different promotional materials will be sent out depending on the location, market, and item availability.

[Customized Polos]

G&G will embroider your company logo and your name on the Polo shirt.

Polo shirt -

There will be customized polos for each person, so kindly provide the following information :

- a) Each name of front desk employees.
- b) Polo sizes for each person (The size of our Polo shirts are US sizes 5 to 2XL).
- c) Company logo in high pixels (More than 300KB) in JPG file.
