## NEW PRODUCT CATALOGUE

G2 GEARBOX / TR16 MBR 308WH / TR16 MBR 308SR /  
NEW GBB PISTOL LINE / GPM92 / GPM1911 / GTP 9 /  
ARP 9 / ARP 556 / PDW-AR / PDW-CQB / GC4-16 IAR / GTW91

**G2 GEARBOX**

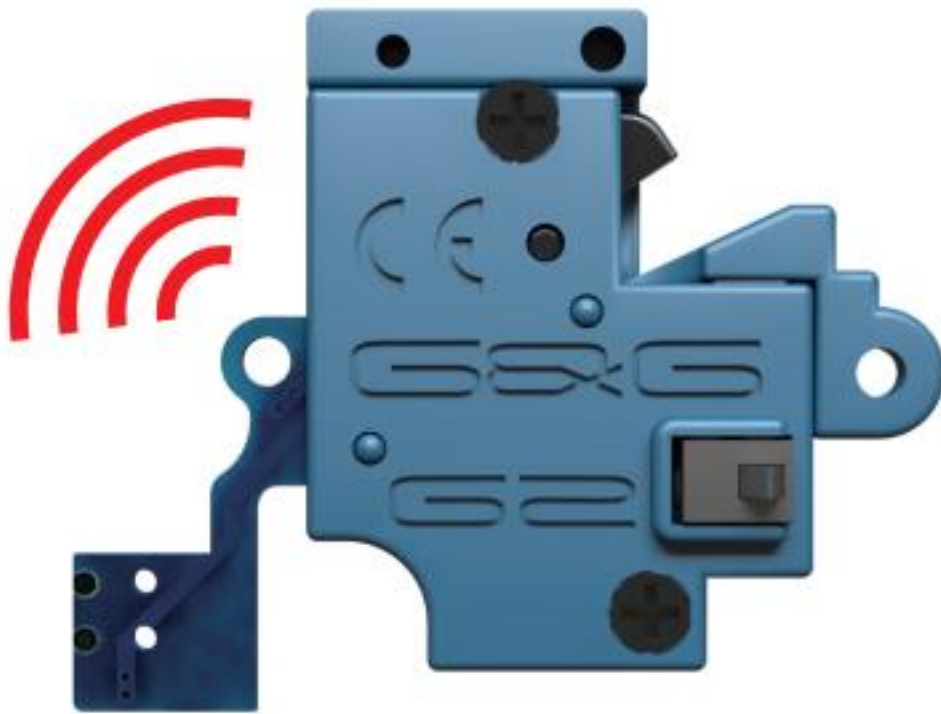

**OLD**

70% more in height and  
74% more in thickness.

1. Double O-ring air nozzle.
2. Thicker padded cylinder head.  
(50% thicker compares to  
G&G previous V2 GB)

ETU + MOSFET with burst control feature. Size of the MOSFET has been reduced by 50% to leave more space in stock tube. The new MOSFET will have a micro speaker to alert player when the battery is low. ETU has been improved for better trigger response and avoid over-press damage.

**BOLT LOCK**

# G2 SYSTEM

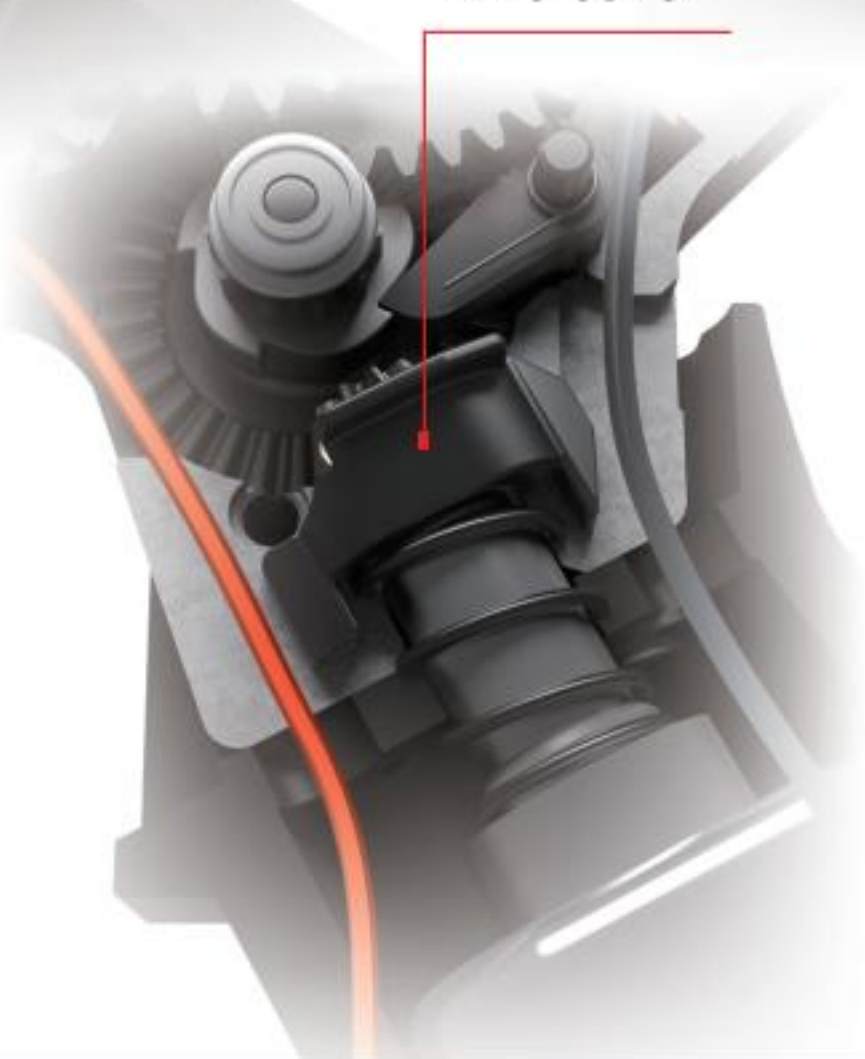

Redesigned bevel gear engagements for better performance. Lower power consumption, less heat generated.

Power cut-off when magazine is removed from the receiver, this feature will also work with hi-cap magazine or any compatible magazine that would fit into the lower receiver. G2 proprietary mid-cap magazine will activate the power cut-off when the magazine is empty.

Ambidextrous fire selector, bolt release and magazine release buttons.

### TR16 MBR 308SR

G2H-016-SRH-BNB-NCM

TYPE | AEG ,LENGTH | 847.5 mm ,RECEIVER | Metal  
BEARING | 8 mm ,MAGAZINE | 40 Rounds  
INNER BARREL | 400 mm  
BLOW BACK | NO ,MOSFET | YES  
VELOCITY | According to Local Regulation

## [ WHIRL CYLINDER VALVE ]

The whirl cylinder valve reduces frost to be built inside by having a high speed rotation.

## UPGRADE PART [ COLLAPSIBLE SAFETY VALVE ]

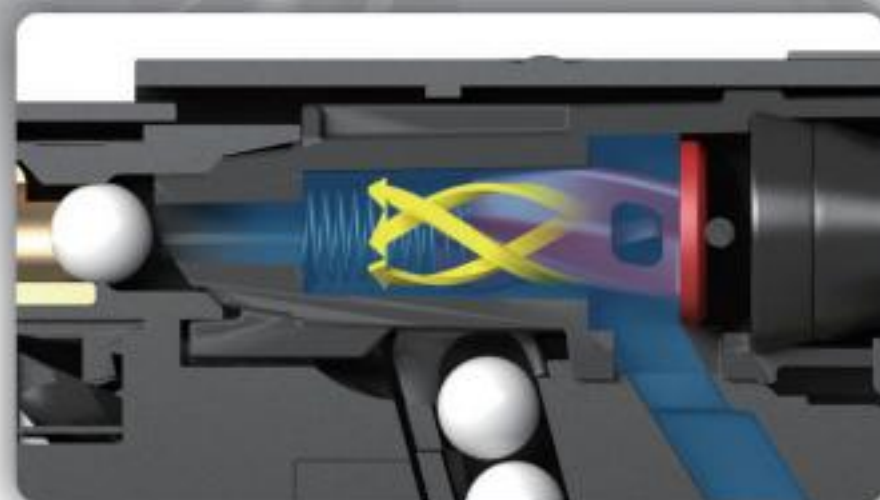

The gas valve will collapse and release gas when the gas pressure exceeds the threshold. This is to avoid magazine blowing up when the gas pressure is too high.

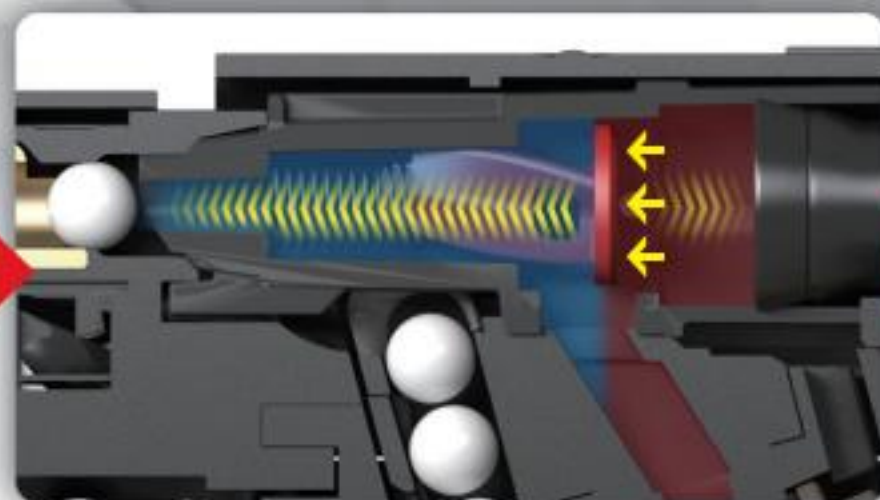

GAS PRESSURE EXCEEDING THE THRESHOLD

## [ METAL GAS FILTER ]

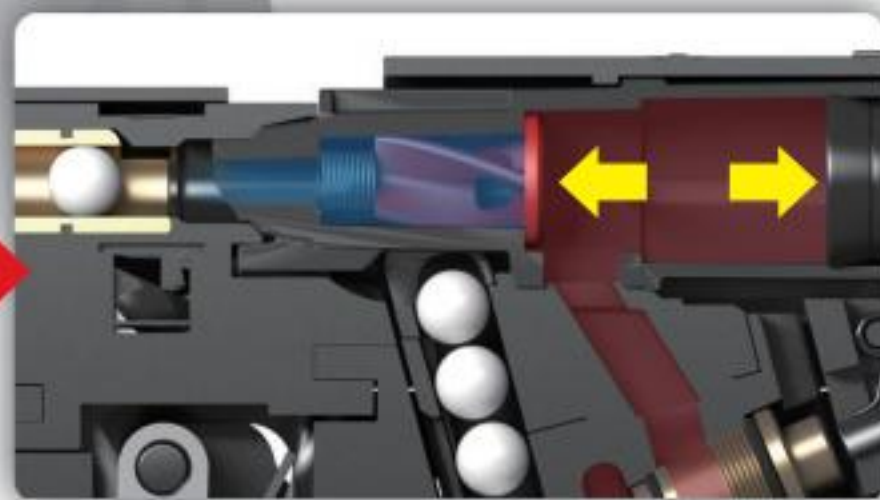

Micro filter only allows gasified gas to go through, leaving liquid gas inside the magazine.

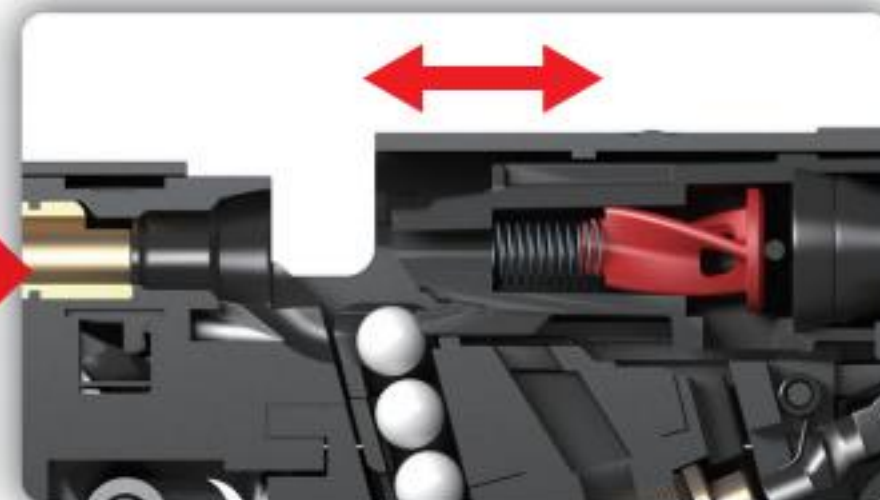

Partial gas pushes cylinder valve to spin.

The remaining gas is filled up to the rear part of the cylinder and it pushes the valve forward.

Whirl valve will be pushed until the cylinder is closed.

The leftover gas will push the piston and bring the slide backwards.

# G&G NIGHT VISION GOGGLES

UNIVERSO SNIPER  
AIRSOFT

G&G Night Vision Goggles  
G-03-195 [Black]

## FROM A PELLET TO THE GLOBE

BB's manufactured by G&G Armament are high precision products, unlike other manufacturers in the market accepting tolerance of size and sphere within 0.01mm, G&G Armament controls the tolerance

within 0.005mm, which is the most precise BB's in the market. Perfect surface and precise size for incredible air-seal and feeding. Bio BBs from G&G Armament are true bio degradable, well received by world market and environmental friendly sites. G&G Armament's BB's are well known for being the best choice for high precision barrels and jam free BB's. Made in Taiwan and G&G Armament represent high quality BB pellets.

Ø 5.95mm±0.01

## G&G M.I.T. Unit G&G Military Intelligence Tracer Unit

G&G Military Intelligence Tracer unit, short for M.I.T. was developed to fulfill the demand of military and law enforcement agencies looking for a cleaner and cost effective alternative. Due to airsoft guns limitation of shooting up to 50 meters, installing the M.I.T. increases the fire range up to 150 meters.

The M.I.T. has several functions, like a tracer unit, a visible laser (laser function has to be used with G&G Battery Box w/Laser Pointer), a BB counter and chronometer to calculate the muzzle velocity.

The MIT is a multi-purpose tracer unit derived from G&G's Gen 1 tracer. It incorporates a simple control panel and what makes it different is the velocity measurement function, BB round counter, and support for integration with G&G battery boxes for coded laser pulses. When combined with helmet and vest receivers it becomes a complete training system. The MIT underwent multiple re-designs and electronic tweaks to improve the product's construction and make it more lightweight. The all-aluminum casing helps to reduce weight. Distance was optimized through extensive day- and night-time testing and calibration of the receivers.

UNIVERSO SNIPER  
AIRSOFT

**G-01-039** (Black)

**G-01-039-1** (Desert Tan)

**M.I.T. Unit**

LASER RADIATION  
DO NOT STARE INTO BEAM

It is designed as a silencer so the M.I.T. Unit can be fitted to any airsoft replica that comes equipped with a threaded barrel.

The most interesting feature is inspired by the concept of the MILES (Multiple Integrated Laser Engagement System), which is used by the US military for training. The MILES is basically a laser tag system, where the laser is activated by blanks being fired from the rifle. The M.I.T Unit functions very similarly. A sensor within the unit detects when a BB is fired and activates a short laser pulse, which would then activate sensors worn by other players when hit.

The target sensor could then signal the hit with sound and/or light. In other words, M.I.T Unit will not transform an airsoft gun into a laser gun because if a player runs out of BBs, the M.I.T Unit would not be activated. Therefore, players are required to manage the consumption of their ammunitions making it more realistic.

In sum, the basic idea of M.I.T Unit combines the advantages of both laser tag and airsoft. At close distances the game would be the same as usual but beyond the maximal effective range of the BB pellets of roughly 50 m, encounters would still be possible up to around 150m.

## G&G M.I.T. Helmet, Sensor Vest

On top of the sensor helmet is a quick-release laser receiver. The receiver has sensors on four sides that allow the player to shoot from the top, front, left and right. The grid pattern on the front and back of the sensor vest can detect coded laser pulses to determine a hit. The signal is then transmitted to the helmet receiver to trigger flashing lights and noise. The hit player is then declared "dead", eliminating any disputes.

**G-12-027** (Black)

**G-12-027-1** (Desert Tan)

**G&G Battery Box w/ Laser Pointer**

Other styles of the sensor vest are available for players to choose from.
