ABOUT ICS

The First AEG Manufacturer in Taiwan

Everyone wants to be the winner on the battlefields whatever in real lives or games. The weapon for each warrior will be the key factor to determine who is the winner. You can only see the outline design from an AEG, however, the internal parts of AEG are consisted by more than 400 components which are made by die-casting, plastic injection, steel stamping, and CNC milling...etc.

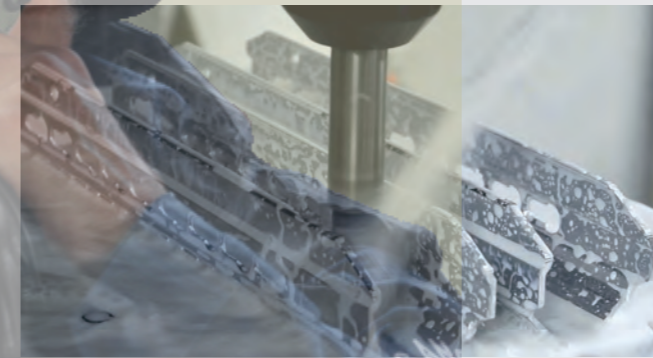

The founder of ICS, Mr. Chu entered the airsoft replicas market in 1995 with enthusiasm and became the first AEG manufacturer in Taiwan, and also the 3rd AEG company in the world which was specialized in design and manufacturing airsoft replicas.

As the professional airsoft replica manufacturer, "Innovation, Efficiency, and High Quality" is the core value of ICS. "No receive, produce, and sell the defective products" is the principle that we insist. By our insistence, we hold a small portion of the airsoft replica market and also leading other airsoft companies in Taiwan to enter the global market. In addition, ICS is qualified with ISO 9001 Quality management system.

To be the leader of the Airsoft replica market, ICS have a strong R&D team that comprise experts from different industries. Combining the new technology with Airsofters' experience is our main design concept, ICS present the product differentiation benefits. In the future, we will devote ourselves to develop new techniques continuously and acquire more patent certifications in order to provide players more modern and satisfying products.

As always, Innovation, Competition, and Satisfaction.

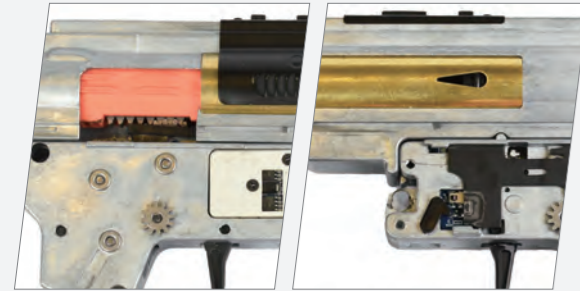

ICS, The Best Thing We Create.

ICS PRECISION OEM / ODM SERVICE

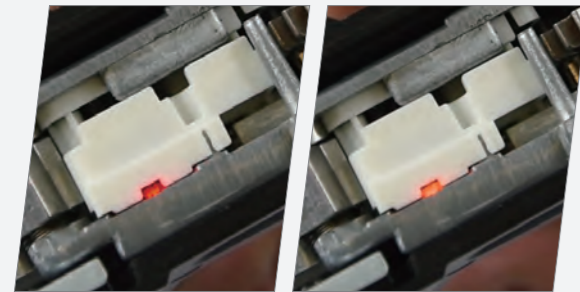

ICS invest in high precision CNC machines in order to produce high quality metal components such as receiver, handguard, tactical rail and gearbox. All CNC machining components are precisely produced to meet the high quality standard. Even military standard 7075 aluminum can be processed for OEM customers.

WHAT'S GOOD WITH THE NEW ICS SSS E-TRIGGER?

Pre-Cocking Function

With the new pre-cocking function, it could greatly increase firing speed and precise gears operation.

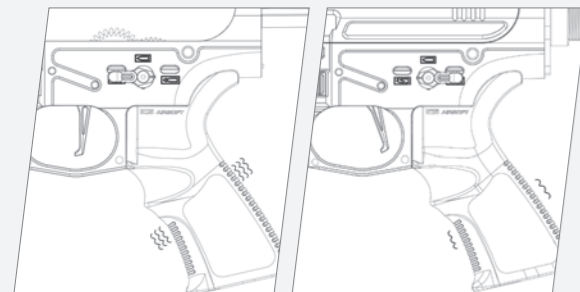

Red LED blinking:
Gears, motor related abnormality.

Orange LED blinking:
Trigger switch abnormality.
Orange LED glowing:
Fire selector assembly abnormality.

World first "Self-Diagnostic Shooting System" in whole Airsoft market!

Troubleshooting is no longer difficult. With the ICS SSS E-trigger, it is easier by identifying the colors of the glowing LED.

Green color glowing: Everything is OK.

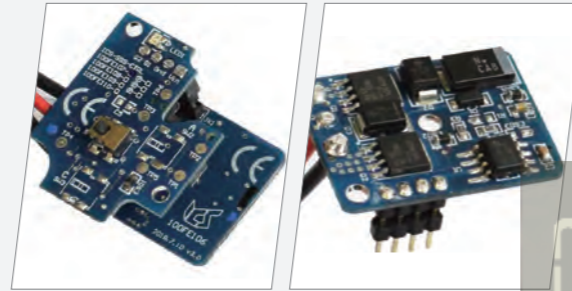

Low voltage detection and Self-protection

When the battery is running low, the SSS E-trigger will remind players in order to protect the battery and AEG.

When the battery is low, the motor will vibrate 3 times to remind that the battery will be depleted.

When the battery is depleted, the motor will vibrate once and not able to fire.

Active E-Brake

It is featured with self-learning function by adjusting its power automatically to precisely position gears while operating.

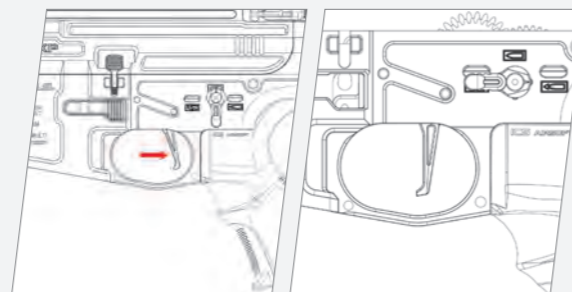

Universal No.3 Sector Gear

All functions on the SSS E-Trigger System can be operated properly with the universal fire selecting control cam on No.3 Sector Gear.

Smart Trigger

ICS do make trigger smart. The smart sensing unit detects every player unique trigger pull to identify short busting or full auto mode. On top of the smart sensing unit, the entire system comes with pre-cocking and short stroked trigger, making ICS smart trigger unit much faster than other AEG trigger systems. The new generation of smart trigger is coming, faster is now the choice for every player.

Switchable Burst mode (Semi/Auto/3 round Burst)

Firing mode can be selected intuitively. Pull and hold the trigger for 5 seconds under Semi mode, and it can switch between Auto mode and 3 round burst mode. Firing mode can be set to default by re-connecting battery.

ICS EXCLUSIVE REALISTIC DESIGN

Split Gearbox & QD Spring & Spring Release

ICS QD receivers, split gearbox with QD spring guide are designed to simulate disassembly of real firearms. This design makes upgrading, maintenance, and troubleshooting a lot easier. Moreover, the spring tension release function could extend the spring lifetime to avoid elasticity fatigue and velocity decrease simultaneously.

EBB System, Battery Stock Tube & Floating H-UP

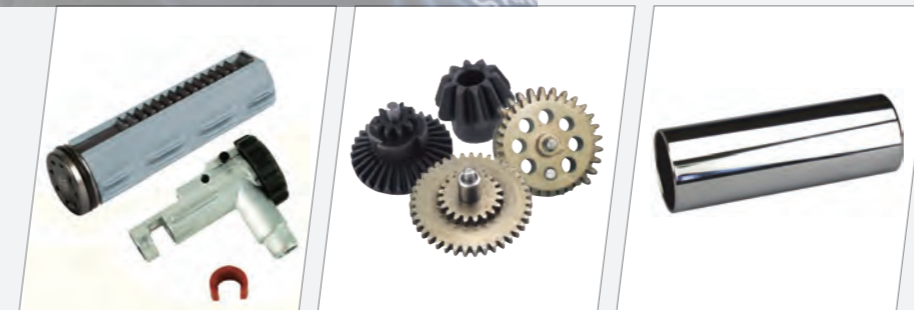

We make perfect improvement to the EBB system by detecting and analyzing the cons of the traditional EBB system, thought outside of the box, and overturned the traditional design specifications. After two years of continuous research and testing, by using the simplest structural design to disperse the impact that will cause damage to the structure. After 100,000 tests, we achieved the perfect evolution that we expected.

ICS is committed to adding the Ergo Technology into our products. The concept of the ambidextrous fire selector, charging handle, and magazine release button, and even the design of the tactical grip and stock, make the products more comfortable for all players.

Low Resistances Switch Assembly & Mini Fuse & Mosfet

Electricity is the power source of the AEG. Constructing a low power impedance working environment is an important issue. ICS adopt a new conductive material widely used in electric switch blades and electric brake wire sets to provide a perfect low power impedance output environment. Moreover, we also adopt a new type of electric brake wire set that featured with the latest wire with diameter of 16AWG, and full-silver-plated metal contacts, upgrade all fuse box to micro type, which has lower power impedance with less heat generated while operating to offer a stable power system. MOSFET is installed to reduce heat and power loss caused by the impedance, to maximize the power output to its best performance.

Advanced Upgrade Parts

The internal components for the ICS EBB models have been upgraded, which include MIM processed torque gears, full steel teeth with FRP piston, 8-hole ventilation piston head, full capacity cylinder, and metal H-UP set, which not only improve product lifetime but also provide players a high performance product straight out of the box.

ABOUT

Master Mods began with some professionals from diverse industries, but with the same passion to bring out the best-upgrade parts to the airsoft players. With years of gaming experiences and outstanding creativity, the professionals devoted themselves into the parts innovation. ICS and MASTER MODS are working together to bring more surprising innovation and take the shooting standard to another whole new level.

HI-CAPA CHALLENGER

CHALLENGE MORE

CHALLENGER

The Hi-Capa CHALLENGER which is right the beast born to challenge. During the developments, we integrated our most delicate and advanced GBB pistol making craftsmanship. Furthermore, we refined all the minor imperfections and made it superior to any other competitors without sacrificing the compatibility with Tokyo Marui Hi-Capa. This beast will soon be unleashed and no doubt it will beat down all the other Hi-Capa products out there. We challenge, we evolve, we dominate.

HI-CAPA

EFFICIENT GAS RELEASE

QUANTITATIVE GAS INJECTION VALVE

NEW PRODUCT

SPECIFICATIONS

MODEL	BLE-007-SB (Metal Slide) BLE-007-PB (Plastic Slide)
Length	220 mm
Inner Barrel	113 mm
Capacity	30 Rds
Weight	962 / 910 g
Caliber	6 mm

HI-CAPA FEATURE INTRODUCTION

Aluminum & Plastic Slide

- The aluminum alloy slide offers a solid and powerful recoil while shooting.
- The new-developed slide catch point on the reinforced plastic slide provides a very agile, light and crisp blowback cycling when the slide travels. It effectively reduces the failure that often occurs on pistols when it locks back.

MASTER MODS R-Hop System

The cooperation between ICS and MASTER MODS gave birth to the very first R-Hop system applied to GBB pistols. Not only it provides perfect friction, extended lifetime, more stability, but also takes heavier BBs for better range performance and accuracy. The Teflon coated Ø6.04 precision inner barrel can fully increase the smoothness when the BB travels.

Fixed H-UP set with Barrel Lock

The exclusive fixing Barrel Lock screw on the H-UP set. It provides higher stability while recoiling and significantly increases the accuracy.

Recoil Reverse Plug Retention Clip

1911/Hi-Capa recoil spring guide rod with reverse plug retention clip is included with the gun, which can remove the cover spring and guide rod assembly more quickly and conveniently.

Adjustable Trigger Stroke

Use an Allen key to adjust the trigger stroke length according to the shooter needs.

3-Dot Luminous Sights

The luminous paint on the iron sights allows shooters to aim the target well while entering from a brighter place into a darker one with the glow.

RMR & DOC Mount

The RMR & DOC mount is made of light aluminum alloy to reduce the weight when the slide moves. The new-developed hammer protection pad to shorten the stroke of the hammer and also reduce the wear caused by the hammer at the same time.

Lightweight Aluminum Alloy Mid-Frame

ICS pre-upgraded the standard platform, with precision CNC machined one-piece-rail mid frame that fully demonstrates the smoothness of low resistance when the slide travels.

Plastic Insert Molding

The ICS upgraded the screw lock point between the middle frame and the trigger guard with the Plastic Insert Molding to strengthen the stability and prevent the frame from shaking.

Pre-upgraded Steel Parts

ICS pre-upgraded the steel-made fire control unit provides greater shooting experience and product lifetime. The sear spring is made of Japan SUS301 stainless steel to allow flexibility for the shooters to adjust the sensibility of the trigger.

REVO Quantitative Gas Injection Valve & Efficient Gas Release Valve

The REVO valve system provides efficient gas release of the magazine, with more gas injection capacity increased.

Magwell

The Magazine well is a must-have component for the competitive shooters, it can speed up the reload time by enhancing your ability to get the magazine aligned correctly.

Reinforced Magazine Base Plate

The thicker magazine base plate is made of nylon fiber which is drop-resistant, the concave design makes holding and loading a lot easier.

SAR 9

SMART TACTICAL

SARSILMAZ

The logo of SARSILMAZ® is registered trademarks of Sarsilmaz Silah San. A.S., Turkey -www.sarsilmaz.com - and is used for airsoft replicas under worldwide exclusive license.

The SAR 9 is a Sarsilmaz Licensed handgun and it's design was based on all the successful handgun features & Ergonomics. This makes the SAR9 the new innovation to the small firearm market. ICS has spent 2 years redesigning the airsoft SAR9, integrating our most advanced gas blow back technology, including the Revo valves, fixed barrel, and CNC machining slide assembly. We are proud to present this beautifully innovated handgun to the airsoft market. Sharing the amazing performance with all the players.

Weight	750 g
Caliber	6 mm

SAR 9 FEATURE INTRODUCTION

SARSILMAZ licensed

1:1 scaled and manufactured under the authorization by real firearm brand SARSILMAZ.

CNC Precision Machining

Precision CNC machining aluminum lightweight slide with 1:1 authorization scaled laser engraved.

MHS (Modular Handgun System) Design Fire Control Unit

The Modular Trigger-Fire Control design provides not only smoother inter-connection, but also easier removal and maintenance.

Fit 579 Holster

The SAR 9 fits with 579 holster.

3-Dot Luminous Sights

The luminous paint on the iron sights allows shooters to aim the target well while entering from a brighter place into a darker one with the glow.

Reversible Magazine Catch

The magazine release button can be replaced either to the left or right side according to the shooter preference.

Interchangeable Backstraps

An interchangeable backstrap with realistic texture provides straight out of the box for grip customization and better gripping experience.

REVO Quantitative Gas Injection Valve & Efficient Gas Release Valve

The REVO valve system provides efficient gas release of the magazine, with more gas injection capacity increased.

Ø6.03 Inner Barrel

Universal spec 6.03mm precision barrel for easier upgrade and maintenance.

Fixed Inner Barrel

Fixed inner barrel provides higher stability while recoiling, which significantly increases the accuracy.

14mm CCW Steel Adapter

14mm CCW steel adaptor out of the box to adapt silencer or extension tube.

M1913 Picatinny Rail

It provides a mounting platform for M1913 accessories.

Loaded Indicator

A red triangle indicator can be found on the trigger for easy loading identification and notification. Trigger is held at the rear once the magazine and chamber are empty.

Black Leopard Eye

ABOUT BLE

Pistol is a "must have" in all milsims or skirmishes, and you want to react like a leopard during the game. You do not only acquire sturdy figure, high mobility, and intelligence, but also maintain extremely high speed while running. Thus, ICS choose the icon of the leopard to represent the capability of the ICS pistols, and symbolize ICS ability to maintain leopard-like vitality, viability and competitiveness on those brutal battlefields and the fast-changing airsoft market.

BLE-XMK

MARK X

The "MARK X" is a combination of all innovative pistol making technology from ICS, such as the REVO valve system, that precisely calculates the magazine gasification efficiency. The aluminum compensator provides reliable stability and accuracy. The slide in two different finishes of matte black and glossy black gives the XMK a ultimate hi-end look.

BLE-XMK FEATURE INTRODUCTION

Special Bump Texture

The bump texture design on the slide increases the frictions while pulling the slide.

Compensator / Front Muzzle End

The XMK compensator / front muzzle end locked on the Picatinny rail prevents the inner barrel from wobbling to increase the accuracy.

14mm CCW Steel Adapter

14mm CCW steel adaptor out of the box to adapt silencer or extension tube.

Safety Function

The safety button hidden under the rail ensures no mistouch during the gaming.

Compatible Holster

The BLE-XMK fits with Swiss Arms Holster even when the compensator is attached.

3-Dot Luminous Sights

The luminous paint on the iron sights allows shooters to aim the target well while entering from a brighter place into a darker one with the glow.

Ø6.03 Inner Barrel

Universal spec 6.03mm precision barrel for easier upgrade and maintenance.

REVO Quantitative Gas Injection Valve & Efficient Gas Release Valve

The REVO valve system provides efficient gas release of the magazine, with more gas injection capacity increased.

BLE-XFG FEATURE INTRODUCTION

CNC Precision Machining

Precision CNC machining aluminum lightweight slide arranges in pairs with brushed style, making the perfect look.

14mm CCW Steel Adapter

14mm CCW steel adaptor out of the box to adapt silencer or extension tube.

M1913 Picatinny Rail

It provides a mounting platform for tactical accessories.

Safety Function

The safety button hidden under the rail ensures no mistouch during the gaming.

Ø6.03 Inner Barrel

Universal spec 6.03mm precision barrel for easier upgrade and maintenance.

Fit USP Holster

The BLE-XMG fits with USP fast draw holster.

3-Dot Luminous Sights

The luminous paint on the iron sights allows shooters to aim the target well while entering from a brighter place into a darker one with the glow.

REVO Quantitative Gas Injection Valve & Efficient Gas Release Valve

The REVO Valve System provides efficient gas release of the magazine, with more gas injection capacity increased.

Ambidextrous Magazine Release and Slide Catch Release

The ambidextrous design is considerate for players of all needs.

Interchangeable Backstraps

A Interchangeable Backstrap with Realistic Texture will be provided out of the box for grip customization and better gripping experience.

BLE-BM9

MONSTERLIKE
DURABILITY
RELIABILITY

The classical US Military Force pistol "M9", the trigger-hammer linkage function and ambi safety design make it a ambidextrous pistol. Due to its excellent performance and good reliability, it is widely used by military troops in worldwide.

BLE-050-ST

BLE-BM9 FEATURE INTRODUCTION

Safety Function

Ambidextrous safety design, convenient for quick switching with left-hand or right-hand.

CNC Precision Machining

Slide and frame been CNC machining that adequately performs to operate unhindered with low drag.

Ø6.03 Inner Barrel

Universal spec 6.03mm precision barrel for easier upgrade and maintenance.

14mm CCW Steel Adapter

14mm CCW steel adaptor out of the box to adapt silencer or extension tube.

Luminous Sights

The luminous paint on the iron sights allows shooters to aim the target well while entering from a brighter place into a darker one with the glow.

TM Spec Grip Plate

The grip plate is suitable TM spec, convenient for owner could switching their needs.

REVO Quantitative Gas Injection Valve & Efficient Gas Release Valve

The REVO valve system provides efficient gas release of the magazine, with more gas injection capacity increased.

Fit M9 Holster

The BLE-BM9 fits with M9 holster.

BLE-PM2

THE MUFFLED ONE

The PM2 NBB CO2 pistol is an imitation of the classical Russian pistol Makarov. It completely reappears its simplicity design without losing its precision. The CO2 NBB design without blowback and recoil features provides a high-performance shooting experience.

BLE-PM2

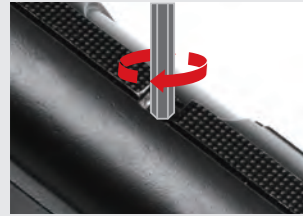

AC-03
A 14mm CCW muzzle end and a Shadow Extension Tube are included, easy to assemble.

SPECIFICATIONS

MODEL	
BLE-002-SB	
Length	265 mm
Inner Barrel	88.5 mm
Capacity	13 Rds
Weight	830 g
Caliber	6 mm

BLE-PM2 FEATURE INTRODUCTION

H-Up Adjustable

Using the Allen key from the top of the gun, can easy and quick adjust H-up.

Ø6.03 Inner Barrel

Universal spec 6.03mm precision barrel for easier upgrade and maintenance.

14mm CCW Steel Muzzle End

14mm CCW steel muzzle end out of the box for adapting silencer or extension tube.

Shadow Extension Tube

The shadow extension tube comes with both CW & CCW 14mm thread.

Shadow Cup

The shadow cups or shadow stabilizer are interchangeable in the shadow extension tube. ICS unique designed shadow cup, could decrease the sound volume, it's the most suitable secondary weapon for sniper to hiding their position.

Reinforced Steel Internals

Original standard pre-upgraded steel hammer and firing pin enhances the lifetime.

Safety Function

The shooter can quickly tell the shooting mode through the red-dot.

CO2 Safety Release Function

Press-To-Vent hammer design makes it safer to change the CO2 cartridge.

Non-Blowback System

BLE-PM2 adopt NBB CO2 system is efficient in severe environment.

BLE-XAE

XTREME AMBI ENHANCED

BLE-XAE

SPECIFICATIONS

Length	184.5 mm

REVO Quantitative Gas Injection Valve & Efficient Gas Release Valve

The REVO valve system provides efficient gas release of the magazine, with more gas injection capacity increased.

Interchangeable Backstraps

An interchangeable backstrap with realistic texture will be provided out of the box for grip customization and better gripping experience.

Fit 579 Holster

The BLE-XAE fits with 579 holster.

HERA ARMS CQR

THE FUTURE IS NEAR

UNIVERSO SNIPER
AIRSOFT

CQR (Close Quarter Rifle) is a model featured with both performance and reliability, authorized by HERA ARMS, Germany under the joint partnership project by ActionSportGames and ICS Airsoft. This rifle is equipped with genuine HERA Arms parts and perfectly manufactured under ICS CXP EBB product lines.

This outstanding model is also equipped with ICS's latest 2nd Gen. SSS E-trigger system, which applied the pre-cocking function that speeds up the piston traveling, and improves both accuracy and trigger responding. The iconic ICS split gearbox with QD spring guide design offers the player to adjust and meet the velocity limitation in different terrains.

HERA ARMS CQR

SPECIFICATIONS

Length/Retractable	706 mm
Inner Barrel	215 mm
Capacity	300 Rds
Weight	3190 g
Caliber	6 mm

HERA ARMS CQR FEATURE INTRODUCTION

SSS.II E-trigger

With the new pre-cocking function, it could greatly speed up the rate of fire.

Spring Tension Release

The unique ICS designed spring release function, when switch to safety mode, it releases spring tension to extend the spring lifetime by avoiding spring fatigued from long time compression.

Electronic Brake (SSS.II Only)

The trigger system memorizes motor characteristic actively to position gears precisely.

HERA 7" RIS Handguard

Licensed 7 inch RIS CNC hard anodized aluminum alloy handguard.

Built-in MOSFET

With the latest built-in MOSFET, it reduces the electrical resistance and working temperature effectively in order to extend the lifetime.

HERA CC Steel Flash Hider

Licensed CC steel flash hider.

EBB System

The decorative bolt-plate travels back and forth while firing to simulate the real firearm bolt moving.

ICS Split Gearbox

The unique ICS designed split gearbox provides the capability of easy maintenance and upgrading, and the receivers could be completely separated just like real firearms.

QD Spring Guide

To arrange in pairs with ICS split gearbox could quickly change spring in 15 seconds.

T-window Magazine

The innovative 300-round high capacity magazine with ammunition viewing window provides players with the maximum control on their firepower.

Short-stroke Trigger

The short-stroke trigger applying with the pre-cocking feature in the SSS.II E-trigger system effectively reduces the shooting cycle and increases firing speed.

HERA CQR Authentic Parts

Authentic CQR Foregrip, Butt Plate, Buttstock Spacer, Sling Mount, QD Sling Mount, Stock Rail Cover.

HERA CQR Stock

Licensed CQR AEG ver. fixed stock.

Reinforced Internals

Pre-upgrades such as high strength engineering plastic piston, metal H-UP unit, reinforced MIM pinion and bevel gears.

EVO I 3500RPM Motor

The EVO motor is equipped with high heat-resistant magnets and ball bearings, which has better heat dissipation ability, power saving, and is able to reach higher RPM.

LIGHTWAY-SERIES

PELEADOR 2.0 / PELEADOR

UNIVERSO SNIPER
AIRSOFT

ABOUT LIGHTWAY

The lightway series are a belief that ICS could deliver the best performing AEG platform with the most cost effective pricing to both beginners and veterans. The specially designed AEG frame adopted all the great design DNAs originated from ICS; which is most ideal for players who are looking for a lightweight package, that performs like a charm.

PELEADOR 2.0

LIGHT, THE WAY

The Lightway Peleador 2.0 is the new solution to perform speeding games. It is constructed from highly reinforced nylon fiber polymer, and equipped with ICS outstanding SSS electronic trigger system. The reinforced piston unit and short stroked trigger makes this light weight AEG a real masterpiece in the fields. By combining lightweight construction and high performance internals, this is definitely the best choice for all players.

ICS are officially authorized by Magpul to use M-LOK standard, allowing us to make more reliable products for the future airsoft industry.

FEATURE INTRODUCTION

CFS Sights
The CFS low-profile folding tactical sights offer maximum functionality and endurance with minimal space usage. Installing optical equipment and backup sights at the same time will no longer be a problem.

SSS.II E-trigger
With the new pre-cocking function, it could greatly speed up the rate of fire.

Electronic Brake (SSS.II Only)
The trigger system memorizes motor characteristic actively to position gears precisely.

Built-in MOSFET
With the latest built-in MOSFET, it reduces the electrical resistance and working temperature effectively in order to extend the lifetime.

ICS Spilt Gearbox
The unique ICS designed split gearbox provides the capability of easy maintenance and upgrading, and the receivers could be completely separated just like real firearms.

Lightweight M-LOK Handguard
Reinforced industrial Nylon Fiber constructure. Our special tooling techniques create invisible parting lines to present a metallic look which comes with both modern design and fine quality.

T-window Magazine
The innovative 300-round high capacity magazine with ammunition viewing window provides players with the maximum control on their firepower.

Competition Short-Stroke Flat Trigger
The short-stroke trigger applying with the pre-cocking feature in the SSS.II E-trigger system effectively reduces the shooting cycle and increases firing speed.

QD Spring Guide
To arrange in pairs with ICS spilt gearbox could quickly change spring in 15 seconds.

MASTER MODS Reinforced Internals
Pre-upgrades MASTER MODS high strength AL6061 piston head & cylinder head.

Spring Tension Release
The unique ICS designed spring release function. Pushing the forward assist knob can release spring to extend the spring lifetime by avoiding spring fatigued from long time compression.

EVO I 3500RPM Motor
The EVO motor is equipped with high heat-resistant magnets and ball bearings, which has better heat dissipation ability, power saving, and is able to reach higher RPM.

FEATURE INTRODUCTION

Smart Trigger (SSS Version Only)

The newly developed Smart Trigger that can intelligently detect how the trigger has been pulled. Under Full-Auto mode, full-auto by holding the trigger; 3 round burst by single tap. More intuitively and conveniently.

SSS.III E-trigger

With the new pre-cocking function, it could greatly speed up the rate of fire. The trigger system memorizes motor characteristic actively to position gears precisely.

MASTER MODS & Reinforced Internals (SSS Only)

Pre-upgrade MASTER MODS high strength full-steel teeth piston, AL6061 piston & cylinder heads and metal H-UP unit, air nozzle and MIM pinion & bevel gears.

Lightweight M-LOK Handguard

The newly designed 8.5-inch industrial grade nylon fiber M-LOK tactical handguard, which has a solid and trendy profile. The lightweight and sturdy design makes it a more adaptable weapon.

Built-in MOSFET

With the latest built-in MOSFET, it reduces the electrical resistance and working temperature effectively in order to extend the lifetime.

Fire Selector Plate

New designed fire selector plate is able to lock the charging handle for easy hop-up adjustment.

Spring Tension Release

The unique ICS designed spring release function, open the upper receiver then pull-up the fire selector plate can release spring tension to extend the spring lifetime by avoiding spring fatigued from long time compression.

Short-stroke Trigger

The short-stroke trigger applying with the pre-cocking feature in the SSS.II V3 E-trigger system effectively reduces the shooting cycle and increases firing speed.

T-window Magazine

The innovative 540-round High-Capacity magazine with ammunition viewing window provides players with the maximum control on their firepower. Another 50/30 rounds mid-capacity magazine capacity could be switched with an Allen key. It's designed for simulating the use of real fire arms and suitable for military simulation or training purposes.

QD Spring Guide

To arrange in pairs with ICS split gearbox could quickly change spring in 15 seconds.

SF1 Quick Response Stock

Specifically designed for the needs of quick engagement. It can be fully-extended directly, then adjusted to proper length through the adjust lever. The cheek rest can be adjusted according to your own aiming angle.

Ergo-Tech Textured Grip

Made of industrial grade Nylon Fiber, the ARK ergo-tech tactical grip is designed with unique ergonomics and anti-slip texture to increase the grip friction. It is super comfortable and sturdy.

EVO I 35000RPM Motor

The EVO motor is equipped with high heat-resistant magnets and ball bearings, which has better heat dissipation ability, power saving, and is able to reach higher RPM.

CXP-MARS PDW9

SMALLER ROUND
BIGGER PUNCH

UNIVERSO SNIPER
AIRSOFT

The PDW9 is the latest member in the CXP-MARS family, and it is packed with ICS most advanced SSS.II Electronic Trigger System, making this PCC an outstanding performer in the airsoft field. After 3 years of refining the design, ICS has finally completed the development of CXP-MARS PDW9. With CXP-MARS PDW9, you will become the best game changer.

ICS are officially authorized by Magpul to use M-LOK standard, allowing us to make more reliable products for the future airsoft industry.

CXP-MARS PDW9

ICS-420(S3)

SPECIFICATIONS

Length/Retractable	619-690 mm
Inner Barrel	160 mm
Capacity	340 Rds
Weight	2692 g
Caliber	6 mm

CXP-MARS PDW9 FEATURE INTRODUCTION

QD Spring Guide

To arrange in pairs with ICS Split Gearbox could quick change spring in 15 seconds.

PDW Stock

New designed adjustable 3-position fast draw deployment stock. Enlarged battery compartment stock tube, available for 3-cell Li-Po battery.

SSS.II E-trigger

With the new pre-cocking function, it could greatly speed up the rate of fire.

ICS Split Gearbox

The unique ICS designed split gearbox provides the capability of easy maintenance and upgrading, and the receivers could be completely separated just like real firearms.

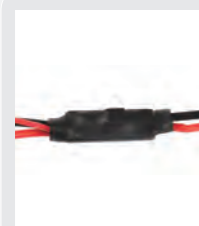

Electronic Brake (SSS.II Only)

The trigger system memorizes motor characteristic actively to position gears precisely.

3-way Mag Release

The Enlarged Mag Release is not only a more fashionable profile, but also the practical function which is convenient for the shooter to load or unload magazine rapidly by both hands.

Built-in MOSFET

With the latest built-in MOSFET, it reduces the electrical resistance and working temperature effectively in order to extend the lifetime.

Spring Tension Release

The unique ICS designed spring release function, when switch to safety mode, it releases spring tension to extend the spring lifetime by avoiding spring fatigued from long time compression.

Competition Short-Stroke Flat Trigger

The short-stroke trigger applying with the pre-cocking feature in the SSS.II E-trigger system effectively reduces the shooting cycle and increases firing speed.

Vertical Ergonomic Pistol Grip

The newly designed 20° vertical ergonomic pistol grip provides larger vertical angle for comfortabe and easier gripping control to adapt more shooting gestures. The QD grip butt cap design provides an easy way for motor maintenance.

CFS Sights

The CFS low-profile folding tactical sights offer maximum functionality and endurance with minimal space usage. Installing optical equipment and backup sights at the same time will no longer be a problem.

MASTER MODS & Reinforced Internals (SSS Only)

Pre-upgrade MASTER MODS high strength full-steel teeth piston, AL6061 piston & cylinder heads and metal H-UP unit, air nozzle and MIM pinion & bevel gears.

Realistic Pistol Caliber Ejection Port EBB System

Fully realistic pistol caliber ejection port with rear-lockable decorative bolt plate for easy hop-up adjustment.

EVO I 35000RPM Motor

The EVO motor is equipped with high heat-resistant magnets and ball bearings, which has better heat dissipation ability, power saving, and is able to reach higher RPM.

Pistol Caliber Style Magazine

330 rounds high-capacity pistol caliber style magazine is bundled with PDW9. The optional 120 rounds mid-capacity magazine with translucent housing and internal mockup bullet design.

Drum Magazine Adaptor (Optional)

The MARS PDW9 small caliber style drum magazine adaptor works with ICS electric drum magazine, which greatly increases BB capacity.

NEW PRODUCT

SPECIFICATIONS

Length/Retractable	997 mm
Inner Barrel	458 mm
Capacity	300 Rds
Caliber	6 mm

The new MARS 2.0 is a revolutionary model that stands for performance and reliability. It inherits the core value from the classic MARS Series, One System All Situation, and adds the most up-to-date design, the M-LOK rail system which gives a reliable platform for accessories. The new Ergo Tech stock design allows the largest compartment for batteries as possible. The 20° Vertical Pistol Grip with short-stroke flat trigger increases the firing speed. The most intelligent SSS E-Trigger System with Smart Trigger detects how the trigger is being pulled to shoot 3 round burst or full-auto intuitively.

ICS are officially authorized by Magpul to use M-LOK standard, allowing us to make more reliable products for the future airsoft industry.

CXP-MARS 2.0

FEATURE INTRODUCTION

SSS.III E-trigger

With the new pre-cocking function, it could greatly speed up the rate of fire. The trigger system memorizes motor characteristic actively to position gears precisely.

Smart Trigger (SSS Version Only)

The newly developed Smart Trigger that can intelligently detect how the trigger has been pulled. Under Full-Auto mode, full-auto by holding the trigger; 3 round burst by single tap. More intuitively and conveniently.

CFS Sights

The CFS low-profile folding tactical sights offer maximum functionality and endurance with minimal space usage. Installing optical equipment and backup sights at the same time will no longer be a problem.

Muzzle Brake

A muzzle brake is a device of a firearm that is intended to redirect a portion of propellant gases to counter recoil and unwanted muzzle rise, and it can be adapted the sound amplifier muzzle like a flaming type.

CNC Machined Receivers

The CNC machined MARS receivers give an aggressive look and geometrical surfaces.

Vertical Ergonomic Pistol Grip

The newly designed 20° vertical ergonomic pistol grip provides larger vertical angle for comfortable and easier gripping control to adapt more shooting gestures. The QD grip butt cap design provides an easy way for motor maintenance.

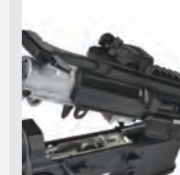

MASTER MODS Reinforced Internals (SSS Only)

Pre-upgrade MASTER MODS high strength full-steel teeth piston, AL6061 piston & cylinder heads and metal H-UP unit, air nozzle and MIM pinion & bevel gears.

EVO I 35000RPM Motor

The EVO motor is equipped with high heat-resistant magnets and ball bearings, which has better heat dissipation ability, power saving, and is able to reach higher RPM.

ICS Split Gearbox

The unique ICS designed split gearbox provides the capability of easy maintenance and upgrading, and the receivers could be completely separated just like real firearms.

Built-in MOSFET

With the latest built-in MOSFET, it reduces the electrical resistance and working temperature effectively in order to extend the lifetime.

Electronic Brake (SSS.II Only)

The trigger system memorizes motor characteristic actively to position gears precisely.

QD Spring Guide

To arrange in pairs with ICS Split Gearbox could quick change spring in 15 seconds.

EBB System

The decorative bolt-plate travels back and forth while firing to simulate the real firearm bolt moving.

CNC Aluminum M-LOK Handguard

This modern-look lightweight handguard with high-quality CNC machined hard anodizing aluminum alloy is engineered to handle the most demanding use.

T-window Magazine

The innovative 300-round high capacity magazine with ammunition viewing window provides players with the maximum control on their firepower.

Competition Short-Stroke Flat Trigger

The short-stroke trigger applying with the pre-cocking feature in the SSS.II E-trigger system effectively reduces the shooting cycle and increases firing speed.

Spring Tension Release

The unique ICS designed spring release function, when switch to safety mode, it releases spring tension to extend the spring lifetime by avoiding spring fatigued from long time compression.

CES-P
LEGEND NEVER DIES

UNIVERSO SNIPER
 AIRSOFT

The MP5 is the legend that lasts from 1960. To pay respect, ICS built CES-P frame with the stamping steel which is the strongest type and followed the real steel production method. The ICS CES-P is equipped with the most advanced ICS SSS.II Electronic Trigger System, this makes it the undefeatable AEG in this market. If you are looking for the most realistic MP5 that is equipped with the outstanding internals, then don't miss the ICS CES-P.

CES-P

FEATURE INTRODUCTION

SSS.II E-trigger

With the new pre-cocking function, it could greatly speed up the rate of fire. Four firing modes can be selected: Safe - Semi- 3 round Burst, and Auto, easily through the fire selector controlled by the micro-chip.

Electronic Brake (SSS Only)

The trigger system memorizes motor characteristic actively to position gears precisely.

Built-in MOSFET

With the latest built-in MOSFET, it reduces the electrical resistance and working temperature effectively in order to extend the lifetime.

QD Spring Guide

To arrange in pairs with ICS Split Gearbox could quick change spring in 15 seconds.

SPCC Weld Processed Stamping Steel

CES-P receiver is made of SPCC weld processed stamping steel as the real firearm, perfectly reproducing real-gun-like durability.

ICS Split Gearbox

The unique ICS designed split gearbox provides the capability of easy maintenance and upgrading, and the receivers could be completely separated just like real firearms.

Power Cut-Off Receivers

The unique ICS designed wireless interference between the upper and lower receivers, which provides better convenience for spring replacement and maintenance. The power is cut off once the receivers are separated to increase safety while processing.

MRS Tactical Handguard

The unique ICS designed MRS Tactical handguard comes with M1913 picatinny rails, which allow you to mount multiple tactical attachments.

SFS Stock

The unique ICS designed SFS stock is a 4-length and foldable stock featured with a rapid adjustable cheek rest.

Realistic Steel Retractable Stock

The retractable stock rods are made by SPCC. It is super sturdy to survive after intensively operation. The stock butt plate is made by wrapping injection process to reproduce the same engineering of the real one.

Spring Tension Release

The unique ICS designed spring release function. Push the anti-reversal lever forward by a pin tool to release the piston spring in order to prevent spring fatigue from long-term compression. It effectively extends the lifetime of the spring.

Short-stroke Trigger

The short-stroke trigger applying with the pre-cocking feature in the SSS.II E-trigger system effectively reduces the shooting cycle and increases firing speed.

EVO I 3500RPM Motor

The EVO motor is equipped with high heat-resistant magnets and ball bearings, which has better heat dissipation ability, power saving, and is able to reach higher RPM.

NOTE:

- The product specification is for reference ONLY and may be subjected to change.
- Battery, charger and BB's are not included.
- For AEG above 360 FPS, it is available to use 11.1V Li-Po or 9.6V Ni-Mh batteries; For AEG below 350 FPS, it is recommended to use only 7.4V Li-Po or 8.4V Ni-Mh batteries.
- Muzzle velocity is measured by 0.20g BB's, and is adjusted to comply with local regulation / requirements

For specific countries as shown below:

Below 106 m/s (350 FPS): Belgium, France, Netherlands, Portugal, Spain, UK

Below 100 m/s (328 FPS): Italy

Below 95 m/s (312 FPS): Japan

Below 45 m/s (148 FPS): South Korea
